in improving student success The contributors uncover a variety of approaches as they evince proven suggestions The chapters are refreshing and edifying This book is essential for all teachers lecturers and trainers who want to improve their teaching practice immensely Professor Vuyisile T Msila Researcher at the Thabo Mbeki African School of Public and International Affairs University of South Africa *Doctoral Education in South Africa* Nico Cloete, Johann Mouton, 2015-12-08 Worldwide in Africa and in South Africa the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade This heightened attention has not only been concerned with the traditional role of the PhD namely the provision of future academics rather it has focused on the increasingly important role that higher education and particularly high level skills is perceived to play in national development and the knowledge economy This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust CHET and the Centre for Research on Evaluation Science and Technology CREST as well as on studies from the rest of Africa and the world In addition to the historical studies new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book The findings presented in *Doctoral Education in South Africa* pose anew at least six tough policy questions that the country has struggled with since 1994 and continues to struggle with if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030 Discourses framed around the single imperatives of growth efficiency transformation or quality will not however generate the kind of policy discourses required to resolve these tough policy questions effectively What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously **Revaluation and Preservation of Indigenous Knowledge Systems in Modern Society** Tlou Masenya, Monicca Bhuda, 2025 The overall objective of this book is to present scholarly perspectives ideas and recommendations in addition to publishing excellent articles that explore the role and importance of indigenous knowledge in the modern society **Software Engineering Perspectives in Intelligent Systems** Radek Silhavy, Petr Silhavy, Zdenka Prokopova, 2020-12-15 This book constitutes the refereed proceedings of the 4th Computational Methods in Systems and Software 2020 CoMeSySo 2020 proceedings Software engineering computer science and artificial intelligence are crucial topics for the research within an intelligent systems problem domain The CoMeSySo 2020 conference is breaking the barriers being held online CoMeSySo 2020 intends to provide an international forum for the discussion of the latest high quality research results *Technology Development and Platform Enhancements for Successful Global E-Government Design* Bwalya, Kelvin Joseph, 2013-12-31 While electronic research has developed in many governments around the world the majority of its research has focused on the supply and demand aspects of e government instead of the focus on technology integration for successful e government design *Technology Development and Platform Enhancements for Successful Global E Government Design* compiles the shared experiences of e government designers and practitioners with a

focus on technological design By highlighting the different technological nuances that need to be incorporated into successful e government designs this book is a useful tool for professionals and researchers concerned with the organizational development in different types of e government communities and environments *Deanship in the Global South* Oliver J.J. Seale,2021-02-08 The university today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats *Deanship in the Global South Bridging Troubled Waters* is about the deans lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership development within their critical bridging roles between the academe and administration Tourism Safety, Security and Resilience Rami K. Isaac,Shem Wambugu Maingi,Vanessa GB Gowresunkaar,2024-11-18 This significant volume critically explores the implications of tourism safety and security and how communities in tourism destinations try to be resilient in the face of these impacts Written by leading scholars this book offers new insight into the conceptual and practical knowledge of community resilience due to tourism security and safety issues Chapters examine these topics through an integrated community perspective to provide comprehensive consideration of the interconnected facets of a community encompassing social economic environmental and cultural dimensions when evaluating and addressing matters pertaining to tourism management safety security and resilience This book is structured around different conceptual theoretical and practical strategies employed by destinations to foster and sustain community resilience particularly during periods of crises as well as communities in the context of tourism recovery It examines this across geographical borders and in many different contexts not just locations of tourism or types of tourism such as religious tourism and different types of crises including natural disasters pandemics and terrorism This book is an essential reading for all tourism students researchers and academics as well as for those interested in conflict and crises recovery **Bioplastics for Sustainability** Ajay Kumar Mishra,Chaudhery Mustansar Hussain,2024-02-02 *Bioplastics for Sustainability* Manufacture Technologies and Environment offers an innovative approach to bioplastics integrating state of the art materials and technologies with detailed analysis of lifecycle recycling circularity and environmental impact of bioplastics and enabling circular utilization and successful scale up of bioplastics The book begins by introducing the fundamentals of bioplastics including biodegradable

compostable and oxodegradable materials and discusses the various factors involved in encouraging commercial uptake of these materials. The second part of the book highlights cutting edge approaches to the production of bioplastics covering novel sources such as microalgae and organic waste and solutions for industrial scale manufacturing. Other sections cover the environmental impact of bioplastics and routes to environmentally friendly usage and more. This is a valuable resource for researchers and advanced students across polymer science, sustainable materials, plastics engineering, materials science, chemistry, environmental science and engineering. In an industrial setting, this book supports engineers, scientists and R D professionals with an interest in sustainable manufacture and application of bioplastics across a range of products, parts and industries. Presents the latest advances in novel materials and manufacture techniques for bioplastics. Focuses on sustainable use of bioplastics, assessing biodegradability, life cycle, recycling, waste and environmental impact. Addresses other key considerations such as industrial scale up, commercialization, policies and regulation.

Tourism and Hospitality for Sustainable Development Emmanuel Ndhlovu, Kaitano Dube, Ngoni Courage Shereni, 2024-09-12. The tourism and hospitality industry in the 21st century cannot be adequately planned, executed, marketed, managed or studied without taking into account digital technology and its impact. The Fourth Industrial Revolution provides the framework for sustainable development in this sector. Technology not only increases profitability but also enables the industry to effectively respond to pressing global sustainability challenges such as pandemics, climate change, energy crises, staffing shortages and hyperinflation. Moreover, technology allows the industry to consider its current and future economic, social and environmental consequences, addressing the needs of tourists, the industry, the environment and destinations. However, implementing technology efficiently and ethically is a complex process and the opportunities, costs and challenges vary depending on the geopolitical and socio-economic context. The application of digitalisation and technological innovations have played a significant role in promoting universal design and reasonable accommodation for older adults and individuals with disabilities in both developed and developing countries. These advancements are crucial for the growth of accessible tourism and hospitality. This edited book aims to explore the trends, challenges and complexities of integrating digitalisation and technology into the tourism and hospitality industry. It also examines the strategic shifts that will shape future research in this area. The book provides a comprehensive overview of the current state of research, including theoretical insights, empirical evidence and evidence-based recommendations. It covers a range of technologies such as blockchain, robots, artificial intelligence, virtual reality, big data and analytics. The goal is to understand how these disruptive technologies are being used and their potential impact on various stakeholders as well as their future possibilities and limitations.
