## Who Built The Moon:

**Who Built the Moon?** Christopher Knight, Alan Butler, 2014-01-30 Thought provoking Daily Mail The moon has confounded scientists for many years It does not obey the known rules of astrophysics and there is no theory of its origin that explains the known facts in fact it should not really be there When researching the ancient system of geometry and measurement used in the Stone Age that they discovered in their previous book *Civilization One* the authors discovered to their great surprise that the system also works perfectly on the Moon On further investigation they found a consistent sequence of beautiful integer numbers when looking at every major aspect of the Moon no pattern emerges for any other planet or moon in the solar system For example the Moon revolves at exactly one hundredth of the speed that the Earth turns on its axis the Moon is exactly 400 times smaller than the Sun and is precisely 400 times closer to the Earth They also discovered that the Moon possesses little or no heavy metals and has no core in fact many specialists suspect that the Moon is hollow If our Moon did not exist nor would we Experts are now agreed that higher life only developed on Earth because the Moon is exactly what it is and where it is When all of the facts are dispassionately reviewed it becomes unreasonable to cling to the idea that the Moon is a natural object The only question that remains is who built it **They Built the Earth** Alan Butler, 2025-04-29 A book that is set to open up a whole new direction for humanity by opening the message left for us from those who seeded life on Earth *The Moon's Galactic History* Constance Victoria Briggs, 2022-10-28 The Moon's Galactic History A Look at the Moon's Extraterrestrial Past and Its Connection to Earth follows the past and present research about the Moon's strange enigmatic history with a focus on an extraterrestrial presence The book examines such questions as Are there Moon inhabitants Are the UFOs seen today connected to the Moon Is there a city on the Moon and more Additionally Briggs discusses things observed on the Moon including anomalous strange lights unidentified flying objects odd constructions artifacts symbols and more This book examines new thoughts and ideas from researchers and what their ideas are today about the extraterrestrial Moon Earth connection and what it means for us With all the information on unidentified flying objects in the news today it is time to have an updated book with current research that investigates both the past and present material on the Moon Did you know that Several of the NASA astronauts reported seeing UFOs while traveling to the Moon the Moon might be hollow Apollo 10 astronauts heard strange space music when traveling on the far side of the Moon mysterious anomalous activity has been seen on the Moon for centuries there are said to be ruins of structures on the Moon and more Critical Thinking Notes, Jeffrey Grupp, U. of Michigan - Dearborn Jeffrey Grupp, 2015-11-07 This book consists of notes covered in class for Phi 233 Critical Thinking during my last year of teaching at the University of Michigan Dearborn in Dearborn Michigan *Intervention - How Humanity from the Future Has Changed Its Own Past* Alan Butler Author, 2012-09-09 From Alan Butler the bestselling author of *Who Built the Moon* and *Civilization One* comes a persuasive new theory about humankind's origins evolution and historical turning points being planned and directly affected by humans

from the future Many key events in the history of humankind show evidence of having been intended by human beings from the future who took specific actions that would steer the world in a particular direction Time travellers some of them anonymous some celebrated in history have made alterations to our planetary and global environment the creation of the Moon the extinction of the dinosaurs that were necessary to allow us to exist and to develop as an intelligent species They have also left us markers that show what steps we need to take to progress further All these interventions were placed retroactively within the timeline for future generations not for those immediately affected Key interventions include The creation of the Moon If the Moon did not exist nor would we The author demonstrates that the Moon was built to make it possible for the Earth to become an incubator of life The megalithic yard Neolithic peoples created a sophisticated fully integrated system of measurements based on the actual size and mass of the Earth a marker for future scientific developments surfacing again apparently out of the blue in 18th century Washington DC But the most spectacular revelation lies in our future By looking at the mathematics underlying many of the inventions we discover with unexpected precision when our first contact with our future selves will happen This will occur within the lifetime of most readers of this extraordinary book

*The Greatest Story NEVER Told* Elvis Newman, 2015-06-04 What we call imagination is actually the universal library of what's real You couldn't imagine it if it weren't real somewhere sometime Terence McKenna Scientific theories that were once considered right and mighty were later proven wrong This is the case even with the best and most thorough scrutiny and investigation There is no knowing when a better scientific theory will come to replace the old It is clear that the study of Sumerian clay tablets will continue to interest areas of science history archaeology cosmology and more due to its

continued effect of encompassing studies from unrelated fields The Sumerians were the most extraordinary people who ever lived on the face of the earth They seemed to come from out of nowhere and they single handedly invented civilization when most of the rest of the world was still living in the Stone Age What s more they did it thousands of years before anyone else The Sumerian civilization was already ancient when it ended in 2004 B C twenty centuries before Julius Caesar sixteen centuries before Socrates and seven centuries before Tutankhamen The highest form of ignorance is when you reject something you don t know about Wayne Dyer **Who Am I? return present new evidence about the Moon that will shake up our world What if the Moon isn t a natural object but an artificial construct Christopher Knight and Alan Butler realized that the ancient system of geometry they presented in their earlier breakthrough study works as perfectly for the Moon as it does the Earth On further investigation they found a consistent sequence of beautiful integer numbers when looking at every major aspect of the Moon no such pattern emerges for any other planet or moon in the solar system Knight and Butler also discovered that the Moon possesses few or no heavy metals and has no core something that should not be possible Their persuasive conclusion if higher life only developed on Earth because the Moon is exactly what it is and where it is it becomes unreasonable to cling to the idea that the Moon is a natural object The only question that remains is who built it *The Ancient Alien Theory: Part Nine* C.R.
