The Five Rights of the Individual Philip Schuyler, 2012 The US government makes 350 pages of new laws each day including directives of policy that limit what an individual may do at home alone or with consenting adults Such laws are intended to make people safer healthier or more productive but they often violate the Five Rights because they sacrifice personal choices to some presumed greater good Directives of policy may include laws that violate the rights to privacy or free speech laws restricting abortion or physician assisted suicide restrictions on gun rights prohibitions on unhealthy foods cigarettes alcohol or drugs laws that discriminate against gays and laws that violate property rights Drug prohibition laws have been the most damaging Over the past 40 years the US population grew 50 percent while its prison population grew 1 000 percent due mostly to antidrug laws There are now two million Americans in jail half of whom didn't harm coerce or defraud anyone The land of the free has one twentieth of the world's population and one fifth of its prison population Our incarceration rate is seven times that of European countries No democracy has ever had such a large percentage of its people behind bars Legalization of marijuana and decriminalization of other drugs would free hundreds of thousands of individuals end prison overcrowding and save billions of dollars now spent trying to enforce unenforceable laws There would be less need for spying wiretapping and breaking down doors Americans could stop thinking of the police as the enemy and vice versa permitting a renewal of respect for the Five Rights

Dramatising Disaster Christine Cornea, Rhys Owain Thomas, 2013-02-14 The imagining of disaster has intensified across a wide range of media entertainment formats and genres in recent years and themes of disaster are regularly deployed in fictional films television drama series drama documentaries comic books and video games This being the case it is therefore vital that film and media scholars pay attention to the ways in which disaster is presented to us to the figurative strategies employed to the representational history of disaster in media to the metaphorical resonances of disaster themes and even to the ways in which entertainment media texts might be understood as part of a broader discourse of disaster within certain historical and cultural contexts *Dramatising Disaster* presents new and innovative research from both early career and more established academics Some of the chapters in this edited collection are based upon papers originally presented at a highly successful conference study day held by the School

of Film Television and Media at the University of East Anglia in 2011 while others are specifically solicited contributions Distinct from previous more particularised film and media studies in this area this edited collection is focused not upon a specific disaster or specific disaster context but upon the wider topic of disaster in popular culture **Creativity Without Law** Kate Darling,Aaron Perzanowski,2017-02-28 Behind the scenes of the many artists and innovators flourishing beyond the bounds of intellectual property laws Intellectual property law or IP law is based on certain assumptions about creative behavior The case for regulation assumes that creators have a fundamental legal right to prevent copying and without this right they will under invest in new work But this premise fails to fully capture the reality of creative production It ignores the range of powerful non economic motivations that compel creativity and it overlooks the capacity of creative industries for self governance and innovative social and market responses to appropriation This book reveals the on the ground practices of a range of creators and innovators In doing so it challenges intellectual property orthodoxy by showing that incentives for creative production often exist in the absence of or in disregard for formal legal protections Instead these communities rely on evolving social norms and market responses sensitive to their particular cultural competitive and technological circumstances to ensure creative incentives From tattoo artists to medical researchers Nigerian filmmakers to roller derby players the communities illustrated in this book demonstrate that creativity can thrive without legal incentives and perhaps more strikingly that some creative communities prefer and thrive in environments defined by self regulation rather than legal rules Beyond their value as descriptions of specific industries and communities the accounts collected here help to ground debates over IP policy in the empirical realities of the creative process Their parallels and divergences also highlight the value of rules that are sensitive to the unique mix of conditions and motivations of particular industries and communities rather than the monoculture of uniform regulation of the current IP system *At a Tipping Point* United States. Congress. Senate. Committee on Commerce, Science, and Transportation,2015 **Seriality Across Narrations, Languages and Mass Consumption** Linda Barone,Novella Troianiello,2019-07-25 The contributions gathered in this volume define and discuss concepts themes and theories related to contemporary audiovisual seriality The series investigated include Black Mirror Game of Thrones House of Cards Penny Dreadful Sherlock Orange Is the New Black Stranger Things Vikings and Westworld to mention just some Including contributions from social and media studies linguistics and literary and translation studies this work reflects on seriality as a process of social linguistic and gender genre transformation It explores the dynamics of reception interaction and translation the relationship between authorship and mass consumption the phenomena of multimodality and intertextuality
