Media, 2022-05-09T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The price we pay for the illusion of free information is that most of the overall economy isn't about information Eventually most productivity will become software mediated This could lead to a period of hyper unemployment and political and social chaos 2 People are becoming poorer than they need to be because popular digital designs do not treat people as being special enough in the digital world People are treated as small elements in a bigger information machine when in fact people are the only sources or destinations of information 3 The primary influence on the way technologists think about the future is their direct experience of digital networks through consumer electronics As information technology becomes millions of times more powerful any particular use of it becomes cheaper 4 The cloud is driven by statistics and even in the worst individual cases of personal ignorance dullness idleness or irrelevance every person is constantly feeding data into the cloud these days The value of such information could be treated as genuine but it is not An Executive Summary of Jaron Lanier's 'Who Owns the Future?' **New Patterns of Power and Profit** Eric K. Clemons, 2018-10-09 How did Capital One and Uber implement nearly identical business models focusing on customers that are most profitable to serve Why are Google and Amazon so valuable to us Why are Google Apple Microsoft and Amazon so difficult for competitors to displace And why can Google charge almost anything it wants for keywords since no form of competition will force prices down The information based business models of these companies and many more are exploiting the patterns described in this book This book instills pattern based thinking that will prepare all readers for greater success in our rapidly changing world It will help executives regulators investors and concerned citizens better navigate their way through the digital transformation of everything Professor Clemons presents six patterns for staying competitive and achieving profitable business models The author sreframe recognize respond framework teaches readers how to transform unfamiliar problems into familiar patterns how to determine which patterns to apply in different situations and how to respond most effectively Information changes everything This book is a guide to power and profit from understanding changes in the age of digital transformation **The Human Imperative** Paul Nemitz, 2023-11-25 This important new book is about power in the age of Artificial Intelligence It looks at what the new technical powers that have accrued over the last decades mean for the freedom of people and for our democracies AI must not be considered in isolation but rather in a very specific context the concentration of economic and digital technological power that we see today Analysis of the effects of AI requires that we take a holistic view of the business models of digital technologies and of the power they exercise Technology economic power and political power are entering into ever closer symbiosis Digital technologies and their corporate masters now know more than people know about themselves or governments know about the world These technologies accumulate more and more decision making powers Taken together this leads to a massive asymmetry of knowledge and power in the relationship between man and machine The classical models of action and decision making in democratic societies are being gradually undermined by such developments In a new way the question of the control of technical power arises This is the first book to look in detail in a holistic way at the challenges of digital power and Artificial Intelligence to Democracy and Liberties and to set out what can and needs to be done about these challenges in terms of engineering ethics and democratic action of policy making and legislation Key audiences are scholars in media sciences political sciences computer sciences and engineering law and philosophy as well as policy makers corporate and

**Beyond the Valley** Ramesh Srinivasan, 2020-09-01 How to repair the disconnect between designers and users producers and consumers and tech elites and the rest of us toward a more democratic internet In this provocative book Ramesh Srinivasan describes the internet as both an enabler of frictionless efficiency and a dirty tangle of politics economics and other inefficient inharmonious human activities We may love the immediacy of Google search results the convenience of buying from Amazon and the elegance and power of our Apple devices but it's a one way top down process We're not asked for our input or our opinions only for our data The internet is brought to us by wealthy technologists in Silicon Valley and China It's time Srinivasan argues that we think in terms beyond the Valley Srinivasan focuses on the disconnection he sees between designers and users producers and consumers and tech elites and the rest of us The recent Cambridge Analytica and Russian misinformation scandals exemplify the imbalance of a digital world that puts profits before inclusivity and democracy In search of a more democratic internet Srinivasan takes us to the mountains of Oaxaca East and West Africa China Scandinavia North America and elsewhere visiting the design labs of rural low income and indigenous people around the world He talks to a range of high profile public figures including Elizabeth Warren David Axelrod Eric Holder Noam Chomsky Lawrence Lessig and the founders of Reddit as well as community organizers labor leaders and human rights activists To make a better internet Srinivasan says we need a new ethic of diversity openness and inclusivity empowering those now excluded from decisions about how technologies are designed who profits from them and who are surveilled and exploited by them
