The Science of Why We Exist Tim Coulson, 2024-07-02 From the Big Bang and the evolution of the genetic code to the birth of consciousness this is the extraordinary story of the chain of events that led to human life on earth Have you ever wondered why you exist What had to happen for you to be alive and conscious Scientists have come a long way in answering this question and this book describes what they have found out It also examines whether our existence was inevitable at the

universe's birth 13.77 billion years ago or whether we are just incredibly lucky. The book is aimed at readers who are interested in science but are not experts. Written in an entertaining and accessible style, the narrative begins by describing how scientists discover facts before taking the reader on a journey from the Big Bang to the creation of the human genome. Covering physics, astronomy, chemistry, earth sciences, the emergence of life, evolution, consciousness, the rise of humanity, and how our personalities are moulded by genes, chance, and the environment, the journey explains how the universe started as a point of intense energy that over time in our corner of the universe resulted in our wonderful planet and in you.

A first and second year undergraduate organic chemistry textbook specifically geared to British and European courses and those offered in better schools in North America, this text emphasises throughout clarity and understanding.

An Introduction to Materials, 1992. For more than ten years, The Science for Conservators Series has provided the key basic texts for conservators throughout the world. Scientific concepts are basic to the conservation of artefacts of every type, yet many conservators have little or no scientific training. These introductory volumes provide non-scientists with the essential theoretical background to their work.

The molecular world The Open University, 2002-01-01. The Molecular World series provides an integrated introduction to all branches of chemistry for both students wishing to specialise and those wishing to gain a broad understanding of chemistry and its relevance to the everyday world and to other areas of science. The books, with their Case Studies and accompanying multi-media interactive CD-ROMs, will also provide valuable resource material for teachers and lecturers. The CD-ROMs are designed for use on a PC running Windows 95/98/ME or 2000.

How Molecular Forces and Rotating Planets Create Life Jan Spitzer, 2021-02-09. A reconceptualization of origins research that exploits a modern understanding of non-covalent molecular forces that stabilize living prokaryotic cells. Scientific research into the origins of life remains exploratory and speculative. Science has no definitive answer to the biggest questions: What is life and how did life begin on earth? In this book, Jan Spitzer reconceptualizes origins research by exploiting a modern understanding of non-covalent molecular forces and covalent bond formation, a physicochemical approach propounded originally by Linus Pauling and Max Delbrück. Spitzer develops the Pauling-Delbrück premise as a physicochemical jigsaw puzzle that identifies key stages in life's emergence from the formation of first oceans, tidal sediments, and proto-biofilms to progenotes, proto-cells, and the first cellular organisms.

Metals and Chemical Change David Arthur Johnson, Royal Society of Chemistry (Great Britain), Open University, 2002. This book considers how molecules react and how the feasibility and outcome of chemical reactions can be understood and predicted. The activity

series of metals is used as a gateway into a discussion of why some reactions occur and others do not Chemical thermodynamics is then introduced and applied to both inorganic and organic reactions The principles introduced are applied to the chemistry of main group metallic elements sodium potassium magnesium aluminum including industrial uses and biological function An interactive CD ROM accompanies the book This book is part of The Molecular World series which aims to provide a broad foundation in chemistry The Age of the Molecule Royal Society of Chemistry (Great Britain),1999 VHS An Introduction to Chemistry Michael Mosher,Paul Kelter,2023-03-18 This textbook is written to thoroughly cover the topic of introductory chemistry in detail with specific references to examples of topics in common or everyday life It provides a major overview of topics typically found in first year chemistry courses in the USA The textbook is written in a conversational question based format with a well defined problem solving strategy and presented in a way to encourage readers to think like a chemist and to think outside of the box Numerous examples are presented in every chapter to aid students and provide helpful self learning tools The topics are arranged throughout the textbook in a traditional approach to the subject with the primary audience being undergraduate students and advanced high school students of chemistry

Introducing Biological Energetics Norman W. H. Cheetham,2010-10-08 This novel interdisciplinary text presents biological understanding in terms of general underlying principles treating energy as the overarching theme and emphasizing the all pervading influence of energy transformation in every process both living and non living Key processes and concepts are explained in turn culminating in a description of the overall functioning and regulation of a living cell The book rounds off the story of life with a brief account of the endosymbiotic origins of eukaryotic cells the development of multicellularity and the emergence of modern plants and animals Multidisciplinary research in science is becoming commonplace However as traditional boundaries start to break down researchers are increasingly aware of the deficiencies in their knowledge of related disciplines Introducing Biological Energetics redresses the reciprocal imbalance in the knowledge levels of physical and biological scientists in particular Its style of presentation and depth of treatment has been carefully designed to unite these two readerships **Proceedings of the National Science Foundation Workshop on the Role of Faculty from the Scientific Disciplines in the Undergraduate Education of Future Science and Mathematics Teachers** ,1993 *Eureka!* Carol Chapman,2001 Eureka is a complete 11 14 science course The scheme meets all the requirements of the National Curriculum and provides a scheme of work that matches the content of QCA s non statutory scheme of work ICT numeracy and literacy are integrated into the course **Practical Volumetric Analysis** Peter McPherson,2014-09-17 Written by someone who has experienced both teaching and working as a research chemist this textbook will provide the theoretical chemistry associated with volumetric analysis supported by a selection of practicals for undergraduate students taking modules in introductory and analytical chemistry as well as for non specialists teaching chemistry *Active Pharmaceutical Ingredients* Stanley Nusim,2016-04-19 To successfully bring an Active Pharmaceutical
