

Why do I Want to Go Study Abroad

Study abroad is a long way, since I chose this path, I will continue to uphold the weather until success. We do everything for a reason and purpose, so does studying abroad. In the following essay, I will discuss the reason and purpose of my study abroad. The following is my discussion and opinion. First of all, I study abroad to improve my self-knowledge and ability. I have great ambition for my future, not only to graduate from an ideal university or to pursue a diploma, but also to expand my vision and enhance my abilities in various aspects.

For example, I hope studying abroad can advance my ability to find problems, analyze problems and solve problems. Secondly, the life in foreign country can also enhance my independence. To tell the truth, my ability to look after myself is not good enough, therefore, I hope that I will be able to sharpen my self-care ability through studying abroad. I need to learn how to use my power to solve all kinds of problems in my life. In addition, it is significant for me to know how to survive in the complex society, and make best of myself. Thirdly, studying abroad is to expand my horizons. Studying abroad is not just about learning knowledge, what's more important is to broaden my horizon. If a person stays where he is, he will never make progress. Take the frog in the well as an example, if I don't study abroad, I can't see the real world. That is to say, if I finally choose to stay in the country, I will not be able to see a complete sky. It is sorrowful to thought the sky above is all the sky. On the contrary, once we study abroad successfully, we will be suddenly enlightened, the world before us will be a different and moving spectacle. Fourthly, going abroad is about having an edge.

This advantage can make my future job search smoother. So where does this advantage come from? The answer is work experience. We had no chance to gain work experience when we were studying in a university in China, different from studying in a university in foreign country, we will have more opportunities to gain work experience. Don't trivialize work experience, it can greatly assist us in a lot of ways. For instance, it can enhance our hands-on skills, and it can also promote the development of our practical ability. On the other hand, it also improves our work efficiency and quality of work. Last but not least, it is crucial to have a comprehensive sublimation of one's life and understanding. There are many

At the same time, institutional rewards for time invested in course design are fewer than ever. *Understanding Bible by Design* introduces the reader to *Understanding by Design*, an approach to course design that is proven, time-efficient, and grounded in the instructor's most closely held convictions about her subject matter's big ideas and essential questions. Lester's synopsis of course design and suggested action is followed by a collaborative dialogue with Jane S. Webster and Christopher M. Jones.

As the daughter of an experienced college counselor, Amanda Madenberg has been visiting colleges for as long as she can remember, on family vacations, weekend road trips, and school holidays. Most importantly, Amanda greatly enjoyed her own college application process, from visiting campuses to writing supplemental essays. Writing as both a typical high school student and as the daughter of a college counselor, Amanda lends a unique and entertaining perspective to *Love the Journey to College*.

Integrative Learning in US Undergraduate Public Health Education: Effective High-Impact Practices Andrew Harver, Katie Darby Hein, Terrel Lee Rhodes, 2020-01-28 This current Research Topic does not derive directly from Boyer's Model of Scholarship but nonetheless represents a well-timed exploration and example of where higher education has progressed in bringing the innovative, integrative conceptualization of higher education scholarship and practice laid out by Boyer to realization through the growing arena of undergraduate public health programs. At the same time, the authors included here were invited to specifically address a second arena of scholarly practice associated with additional elements of Boyer's legacy: effective High Impact Practices (HIPs), practices that engage students, faculty, and often broader communities in integrative learning that connect academic and extra-academic learning environments. Undergraduate public health programs are perfectly positioned to provide a framework for integrated learning through High Impact Practices. Such practices encompass not only the essential learning outcomes that employers
