Why We Build Power And Desire In Architecture:

Why We Build Rowan Moore, 2013-08-20 In an era of brash expensive provocative new buildings a prominent critic argues that emotions such as hope power sex and our changing relationship to the idea of home are the most powerful force behind architecture yesterday and especially today We are living in the most dramatic period in architectural history in more than half a century a time when cityscapes are being redrawn on a yearly basis architects are testing the very idea of what a building is and whole cities are being invented overnight in exotic locales or here in the United States Now in a bold and wide ranging new work Rowan Moore former director of the Architecture Foundation now the architecture critic for The Observer explores the reasons behind these changes in our built environment and how they in turn are changing the way we live in the world Taking as his starting point dramatic examples such as the High Line in New York City and the outrageous island experiment of Dubai Moore then reaches far and wide back in time to explore the Covent Garden brothels of eighteenth century London and the fetishistic minimalism of Adolf Loos across the world to assess a software magnate s grandiose mansion in Atlanta and Daniel Libeskind s failed design for the World Trade Center site and finally to the deeply naturalistic work of Lina Bo Bardi whom he celebrates as the most underrated architect of the modern era [Introducing Architectural Theory](#) Korydon Smith, Miguel Guitart, 2024-01-22 Building on the success of the first edition an engaging and reader friendly work on complex ideas [Introducing Architectural Theory](#) Expanding the Disciplinary Debate broadens the range of themes voices and geographies represented to provide a more comprehensive and contemporary theory book This book presents major discourses in architectural theory and design in a debate like format integrating a series of edited texts across architectural history with context and newly written commentaries by the authors This new edition has been fully revised updated and expanded to include long standing debates such as simplicity vs complexity or the relationship between form and function as well as newer discussions on innovation globalization and social equity Authors Smith and Guitart provide a comprehensive means and conceptual framework for readers to compare multiple points of view The chapter structure discussion questions and additional resources allow teachers to facilitate in class discussions and writing assignments This book remains the most accessible architectural theory textbook written for beginning architecture students and those outside the discipline Its reflective and critical approach will equally engage the minds of upper level students and experts **Why We Build** Rowan Moore, 2012-08-30 Buildings are driven by human emotions and desires hope power money sex the idea of home In *Why We Build* Rowan Moore explores the making of buildings from conception to inhabitation and reveals the paradoxical power of architecture it looks fixed and solid but is always changing in response to the lives around it Moving across the globe and through history through works of folly beauty spectacle and subtlety Moore gives a provocative and iconoclastic view of what makes architecture why it matters and why we find it fascinating You will never look at a building in the same way again **What Architecture Means** Denise Costanzo, 2015-07-24 What Architecture

Means introduces you to architecture and allows you to explore the connections between design ideas and values across time space and culture It equips you to play an active and informed role in architecture either as a professional or as a consumer client and citizen By analyzing famous and everyday buildings while presenting and questioning the positions of important architects and theorists this book will help you to evaluate and decide what qualities ideas and values you believe are important in architecture You ll learn How various definitions of architecture establish different relationships with all buildings and even non buildings How buildings express and accommodate ideas of the sacred the family and the community What an architect is and what priorities they bring to design and construction How an architect s expertise relates to that of the engineer and why these are distinct disciplines About values like beauty originality structural expression and cultural memory and their purpose in architectural design About the interests and ethical values that architects and architecture serves and promotes Topics include sacred spaces the house the city architects and engineers aesthetics and design originality and method technology and form memory and identity and power and politics
