

FIREWIRE DRIVEDOCK™

USER'S MANUAL

Revised July 2, 2007

Installation Instructions:

1. **Attach bottom plate to your 3.5 inch IDE hard drive.** Attach bottom plate to your drive. Use the four screws which are supplied. Attach a rubber bumper to each corner. You may use an additional bumper under the DriveDock, to prevent rocking, if you desire.
2. **Set drive to "Master" (or rarely, to "Cable Select").** The drive you used must be jumpered as a master. Usually this information is printed on a label directly on the drive. Otherwise, check with the manufacturer. In rare circumstances, certain drives are required to be jumpered as "Cable Select" (usually Western Digital drives).
3. **Attach DriveDock to your drive.** The forty pin IDE connector on the DriveDock matches exactly with your drive. The connector has a polarization pin installed. Ensure that you have carefully lined it up. Attach the DriveDock to your drive, using extreme care to ensure that no pins are bent. Attach the four pin power cable from the DriveDock to the drive. First installation may be difficult.
4. **Power supply.** Power must be supplied to DriveDock by the AC adapter. Once power is attached, the DriveDock is ready to attach to a computer utilizing a FireWire cable (not included). When turned on, the LED closest to the drive power connector will illuminate.
5. **Access light.** The other light will briefly illuminate after the unit is powered up. Thereafter, it will illuminate whenever the drive is accessed. If the drive does not briefly illuminate after power up, it may indicate a problem with the DriveDock or the drive.
6. **Usage with a Mac.** Operation is plug and play under Mac OS 9.1, 9.2 and OSX.
7. **Usage with a PC.** FireWire DriveDock is Plug and Play with 98SE, 2K, ME, and XP.
8. **Usage with CD/DVD Drives.** The power connector may not clear the unit. If this is the case, one of the power connector plastic tabs may be trimmed off with a knife.
9. **Usage with DVD-RAM or MO.** User experiences indicate that this does not work, due to unknown incompatibilities between these units and Oxford 911 bridge chips.
10. **Macintosh Booting.** The firmware supports FireWire booting on a Mac.

FCC Compliance Statement: "This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation."

In the event that you experience Radio Frequency Interference, you should take the following steps to resolve the problem:

- Ensure that the bottom plate and case of your attached drive is grounded, either to the DriveDock case or to an Earth ground.
- Use a FireWire cable with RFI reducing ferrites on each end.
- Use a power supply with an RFI reducing ferrite approximately 5 inches from the DC plug.
