## Wii Of Spells:

**A Casual Revolution** Jesper Juul, 2012-02-10 How casual games like Guitar Hero Bejeweled and those for Nintendo Wii are expanding the audience for video games We used to think that video games were mostly for young men but with the success of the Nintendo Wii and the proliferation of games in browsers cell phone games and social games video games changed fundamentally in the years from 2000 to 2010 These new casual games are now played by men and women young and old Players need not possess an intimate knowledge of video game history or devote weeks or months to play At the same time many players of casual games show a dedication and skill that is anything but casual In A Casual Revolution Jesper Juul describes this as a reinvention of video games and of our image of video game players and explores what this tells us about the players the games and their interaction With this reinvention of video games the game industry reconnects with a general audience Many of today's casual game players once enjoyed Pac Man Tetris and other early games only to drop out when video games became more time consuming and complex Juul shows that it is only by understanding what a game requires of players what players bring to a game how the game industry works and how video games have developed historically that we can understand what makes video games fun and why we choose to play or not to play them Important Notice The digital edition of this book is missing some of the images found in the physical edition [The Proximity Paradox](#) Kiirsten May, Alex Varricchio, 2020-03-24 You're too close to your business and it's killing your creativity Traditional business structures love stability and predictability Yet many organizations believe the two essential ingredients for long term success are creativity and innovation Kiirsten May and Alex Varricchio founders of the marketing agency UpHouse call the relationship between these two opposing expectations the Proximity Paradox the belief that those who are closest to a subject are best qualified to innovate for it when in reality intense proximity limits creativity Instead people need to create distance from challenges in order to see the best way forward May and Varricchio believe that until we can separate innovation and execution within ourselves we will only innovate to the level at which we can execute the idea To be effective we need to create distance between our innovation brain and our execution brain Unpacking ten common Proximity Paradoxes that affect a company's people processes and industry the authors share some practical ideas to create the distance necessary for your next great idea An especially valuable book for creatives and non creatives in creative industries but equally applicable to all businesses that depend on innovation The Proximity Paradox encourages us to ask hard questions about how we work how our businesses are structured and why we routinely find our creativity at odds with what's asked of us as executors and stewards of the bottom line **Beyond 3D TV** Tony Sperry, *Worldwide Casebook in Marketing Management*, 2016 Introduction to case analysis Consumer behaviour San Pellegrino Italy Nintendo Wii Japan Zara Spain Branding Lenovo China Red bull Austria Singtel Singapore Marketing communication Foster's Australia Google the US Walkers the UK Tag heuer Switzerland Cirque du soleil Canada Retailing Currys the UK Cold storage Singapore
