Attention:

- 1) You need a saved Flight with the aircraft parked at parking position and parking break set! If you don't have such a flight you won't be able to load the aircraft in Dark & Cold mode. So create such a flight, set the parking break and save it.
For every new flight, set D&C in the configurator, load the flight and then change the location the desired airport.
- 2) Auto-Functions in FMC are only available in Beginner and Intermediate mode (configurator).
- 3) Intermediate mode is recommended as IRS alignment otherwise takes 10 minutes.
- 4) Thrust levers (e.g. CH Throttle Quadrant) have to be calibrated in special way for the Wilco Airbus Series, because FLEX and TO/GA detents can't be reached otherwise. When calibrating set the max forward position about 1cm behind the normal max forward position. With the configuration you can push the Airbus Series thrust levers over the 100% manual thrust position to reach FLEX and TO/GA detents. Alternate method: Use keyboard for t/o thrust setting and use throttles only for taxi and manual approach.
