analysis Filled with in depth insights and expert advice *Active Credit Portfolio Management in Practice* serves as a  
comprehensive introduction to both the theory and real world practice of credit portfolio management The authors have  
written a text that is technical enough both in terms of background and implementation to cover what practitioners and  
researchers need for actually applying these types of risk management tools in large organizations but which at the same  
time avoids technical proofs in favor of real applications Throughout this book readers will be introduced to the theoretical  
foundations of this discipline and learn about structural reduced form and econometric models successfully used in the  
market today The book is full of hands on examples and anecdotes Theory is illustrated with practical application The authors  
Website provides additional software tools in the form of Excel spreadsheets Matlab code and S Plus code Each section of the  
book concludes with review questions designed to spark further discussion and reflection on the concepts presented
