Octavia E. Butler Gerry Canavan, 2016-10-31 I began writing about power because I had so little Octavia E Butler once said Butler's life as an African American woman an alien in American society and among science fiction writers informed the powerful works that earned her an ardent readership and acclaim both inside and outside science fiction Gerry Canavan offers a critical and holistic consideration of Butler's career Drawing on Butler's personal papers Canavan tracks the false starts abandoned drafts tireless rewrites and real life obstacles that fed Butler's frustrations and launched her triumphs Canavan departs from other studies to approach Butler first and foremost as a science fiction writer working within responding to and reacting against the genre's particular canon The result is an illuminating study of how an essential SF figure shaped themes unconventional ideas and an unflagging creative urge into brilliant works of fiction **Science Fiction After 1900** Brooks Landon, 2014-05-01 First published in 2003 Brooks Landon analyses science fiction not as a set of rules for writers but as a set of expectations for readers He presents science fiction as a social phenomenon that moves beyond literary experience through a sense of mission based on the belief that SF can be a tool to help you think He offers a broad overview of the genre and the stages through which it has developed in the twentieth century from the dime store novel through the New Wave of the 60s the cyberpunk 80s and soft agenda SF of the 90s The writers he examines range from E M Forster and John W Campbell to Philip K Dick and Ursula K Le Guin He also examines the large body of criticism now devoted to the genre and includes a bibliographic essay and a list of recommended titles Alien Constructions Patricia Melzer, 2010-01-01 An incisive critical work that looks at Octavia Butler's writing the movies of the Matrix and Alien series and more through a feminist lens Femspec Feminist thinkers and writers are increasingly recognizing science fiction's potential to shatter patriarchal and heterosexual norms while the creators of science fiction are bringing new depth and complexity to the genre by engaging with feminist theories and politics This book maps the intersection of feminism and science fiction through close readings of science fiction literature by Octavia E Butler Richard Calder and Melissa Scott and the movies The Matrix and the Alien series Patricia Melzer analyzes how these authors and films represent debates and concepts in three areas of feminist thought identity and difference feminist critiques of science and technology and the relationship among gender identity body and desire including the new gender politics of queer desires transgender and intersexed bodies and identities She demonstrates that key political elements shape these debates including global capitalism and exploitative class relations within a growing international system the impact of computer industrial and medical

technologies on women's lives and reproductive rights and posthuman embodiment as expressed through biotechnologies the body machine interface and the commodification of desire Melzer's investigation makes it clear that feminist writings and readings of science fiction are part of a feminist critique of existing power relations and that the alien constructions cyborgs clones androids aliens and hybrids that populate postmodern science fiction are as potentially empowering as they are threatening

*Contemporary African American Fiction* Robert Butler, 1998 The book argues that from its very beginnings African American journey narratives are distinctively non teleological that is they typically resist being directed toward an end point in a particular place and instead exult in movement through indefinite space They view movement as intrinsically valuable a process of endless becoming rather than a carefully mapped journey resulting in a completed state of being rooted in a fixed place As such these journeys are a compelling metaphor of the American desire for the new life consisting of unlimited personal development The writers examined in this book offer a unique set of variations on this kind of open journey
