Schaefer, 2022-04-04 In Wild Experiment Donovan O Schaefer challenges the conventional wisdom that feeling and thinking are separate Drawing on science studies philosophy affect theory secularism studies psychology and contemporary literary criticism Schaefer reconceptualizes rationality as defined by affective processes at every level He introduces the model of cogency theory to reconsider the relationship between evolutionary biology and secularism examining mid nineteenth century Darwinian controversies the 1925 Scopes Trial and the New Atheist movement of the 2000s Along the way Schaefer reappraises a range of related issues from secular architecture at Oxford to American eugenics to contemporary climate denialism These case studies locate the intersection of thinking and feeling in the way scientific rationality balances excited

discovery with anxious scrutiny in the fascination of conspiracy theories and in how racist feelings assume the mantle of rational objectivity The fact that cognition is felt Schaefer demonstrates is both why science succeeds and why it fails He concludes that science secularism atheism and reason itself are not separate from feeling but comprehensively defined by it
