*Down East*, 2004-12 Forthcoming Books Rose Arny, 2004 **The Publishers Weekly**, 2004 Birds of Maine Peter D. Vickery, Charles D. Duncan, Jeffrey V. Wells, William J. Sheehan, 2020-11-03 A comprehensive and beautifully illustrated overview to the birds of Maine. The first comprehensive overview of Maine's incredibly rich birdlife in more than seven decades. *Birds of Maine* is a detailed account of all 464 species recorded in the Pine Tree State. It is also a thoroughly researched accessible portrait of a region undergoing rapid changes with southern birds pushing north, northern birds expanding south, and once absent natives like Atlantic Puffins brought back by innovative conservation techniques pioneered in Maine. Written by the late Peter Vickery in cooperation with a team of leading ornithologists, this guide offers a detailed look at the state's dynamic avifauna from the Wild Turkey to the Arctic Tern, with information on migration patterns and timing, current status, and changes in bird abundance and distribution, and how Maine's geography and shifting climate mold its birdlife. It delves into the conservation status for Maine's birds as well as the state's unusually textured ornithological history involving such famous names as John James Audubon and Theodore Roosevelt and homegrown experts like Cordelia Stanwood and Ralph Palmer. Sidebars explore diverse topics including the Old Sow whirlpool that draws multitudes of seabirds and the famed Monhegan Island, a mecca for migrant birds. Gorgeously illustrated with watercolors by Lars Jonsson and scores of line drawings by Barry Van Dusen, *Birds of Maine* is a remarkable guide that birders will rely on for decades to come. Copublished with the Nuttall Ornithological Club. Daybreak 2000 Roger Tefft, 2000 Photographs from around the world taken at dawn on Jan 1, 2000. A Year with Nature Marty Crump, 2018-11-11 A Year with Nature is an almanac like none you've ever seen, combining science and aesthetics; it is a daily affirmation of the extraordinary richness of biodiversity and our enduring beguilement by its beauty. With a text by herpetologist and natural history writer Marty Crump and a cornucopia of original illustrations by Bronwyn McIvor, this quirky quotidian reverie gazes across the globe, media, and time as it celebrates date-appropriate natural topics ranging from the founding of the National Park Service to annual strawberry, garlic, shrimp, hummingbird, and black bear festivals. With Crump, we mark the publication of classics like Carson's *Silent Spring* and White's *Charlotte's Web* and even the musical premiere of Tchaikovsky's *Swan Lake*. We note the discovery of the structure of DNA and the mountain gorilla, the rise of citizen science projects, and the work of people who've shaped how we view and protect nature from Aristotle to E. O. Wilson. Some days feature US celebrations like National Poinsettia Day and National Cat Day; others highlight country-specific celebrations like Australia's Wombat Day and Thailand's Monkey Buffet.

Festival during which thousands of macaques feast on an ornately arranged spread of fruits and vegetables Crump also highlights celebrations that span borders from World Wildlife Conservation Day to International Mountain Day and global festivities for snakes sea turtles and chocolate Interweaving fascinating facts on everything from jellyfish bodies to monthly birth flowers with folkloric entries featuring the Loch Ness Monster unicorns and ancient Greek Roman and Egyptian mythology the almanac is as exhaustive as it is enchanting A Year with Nature celebrates the wonder and beauty of our natural world as we have expressed it in visual arts music literature science natural history and everyday experience But more than this the almanac's vignettes encourage us to contemplate how we can help ensure that future generations will be able to enjoy the landscapes and rich biodiversity we so deeply cherish Discovery Ricki Lewis,2009-05-11 The goal of Discovery Science as a Window to the World is to relay the excitement of science by exploring selected topics in biology and medicine in a way that reveals the process of discovery Each chapter will focus on the curiosity and creativity that drives scientists to wonder observe question and experiment One impetus for this project is the recognition of a growing demand among instructors for a book that departs from fact stuffed textbooks and instead engages students in the discovery process at a personal level Emphasizes the process of discovery through interviews and key experiments Written by a best selling author Provides an in depth conversational look at the science behind several hot topics in biology Each chapter traces the beginnings of the field with stories of how serendipity and scientific inquiry intertwine Presents the background to a field by including the scientific literature so the reader does not have to do a literature search or plow through a review article Many essays introduce the work of overlooked scientists or unsung heroes Alexey Olovnikov telomeres Leroy Steven stem cells to name a few Also well known scientists are interviewed Stanley Miller Carl Woese John Gearhart and others The essays show how ideas interact and coalesce from different lines of research Highlights the role of the media in interpreting science for the public *Fish and Wildlife News* U.S. Fish and Wildlife Service,2002 *BBC Wildlife* ,2005 **People, Land & Water** ,2005 **The British Journal of Photography** ,1877 *Theodore Roosevelt and the Smithsonian Expedition to British East Africa, 1909-1910* Frank H. Bureau of Biological Survey, 1939      Wild Visions Ben A Minter, Mark Klett, Stephen J. Pyne, 2022-11-22 A stunning combination of landscape photography and thematic essays exploring how the concept of wilderness has evolved over time Our ideas of wilderness have evolved dramatically over the past one hundred and fifty years from a view of wild country as an inviolable place apart to one that exists only within the matrix of human activity This shift in understanding has provoked complicated questions about the importance of the wild in American environmentalism as well as new aesthetic expectations as we reframe the wilderness as to some degree a human creation Wild Visions is distinctive in its union of landscape photography and environmental thought a merging of short thematic essays with a striking visual narrative Often the wild is viewed in binary terms either revered as sacred and ecologically pure or dismissed as spoiled by human activities This book portrays wilderness instead as an evolving gamut of understandings a collage of views and ideas that is still in process      *Report of the Chief of the Bureau of Biological Survey* United States.
