The Cambridge Introduction to Literature and the Environment Timothy Clark, 2011-01-06 The degrading environment of the planet is something that touches everyone This 2011 book offers an introductory overview of literary and cultural criticism that concerns environmental crisis in some form Both as a way of reading texts and as a theoretical approach to culture more generally ecocriticism is a varied and fast changing set of practices which challenges inherited thinking and practice in the reading of literature and culture This introduction defines what ecocriticism is its methods arguments and concepts and will enable students to look at texts in a wholly new way Boxed sections explain key critical terms and contemporary debates in the field with hands on examples and comparisons Timothy Clark's thoughtful approach makes this an ideal first encounter with environmental readings of literature Remembering the Cultural Geographies of a Childhood Home Peter Hughes Jachimiak, 2016-04-08 Using an innovative auto ethnographic approach to investigate the otherness of the places that make up the childhood home and its neighbourhood in relation to memory derived and memory imbued cultural geographies Remembering the Cultural Geographies of a Childhood Home is concerned with childhood spaces and children's perspectives of those spaces and consequentially with the personalised locations that make up the childhood family home and its immediate surroundings such as the garden the street etc Whilst this book is primarily structured by the author's memories of living in his own Welsh childhood home during the 1970s that is the auto ethnographic framework it is as much about living anywhere amid the remembered cultural remnants of the past as it is immersing oneself in cultural geographies of the here and now As a result Remembering the Cultural Geographies of a Childhood Home is part of the ongoing pursuit by cultural geographers to provide a personal exploration of the pluralities of shared landscapes whereby such an engagement with space and place aid our construction of cognitive maps of meaning that in turn manifest themselves as both individual and collective cultural experiences Furthermore touching upon our co habiting of ghost topologies Remembering the Cultural Geographies of a Childhood Home also encourages a critical exploration of children's spirituality amid the haunted cultural and geographical spaces and places of a house and its neighbourhood the cellar hallway parlour stairs bedroom attic shops cemeteries and so on The Heart of the Woods Wyl Menmuir, 2024-07-30

The Heart of the Woods blends crafted narrative with stunning nature photography An eye opening study of trees humankind Trees in Paradise Jared Farmer, 2013-10-28 Describes how the first settlers in California changed and the natural world the brown landscape there by creating groves wooded suburbs and landscaped cities through planting eucalypts in the lowlands citrus colonies in the south and palms in Los Angeles The Book of Nature Barbara Mahany, 2023-03-21 We live inside a nautilus of prayer if only we open our senses and perceive what is infused all around Throughout millennia and across the monotheistic religions the natural was often revered as a sacred text By the Middle Ages this text was given a name The Book of Nature the first best entry point for encounter with the divine The very act of reading the world of focusing our attention on each twinkling star and unfurling blossom humbles us and draws us into sacred encounter As we grapple to make sense of today s tumultuous world one where nature is at once a damaged and damaging source of disaster as well as a place of refuge and retreat we are called again to examine how generously it awaits our attention and devotion standing ready to be read by all Weaving together the astonishments of science the profound wisdom and literary gems of thinkers poets and observers who have come before us and her own spiritual practice and gentle observation Barbara Mahany reintroduces us to The Book of Nature an experiential framework of the divine God's first revelation came to us through an ongoing creation one that through stillness and attentiveness to the rumblings of the heavens the seasonal eruptions of earth the invisible pull of migration of tide and of celestial shiftings draws us into sacred encounter We needn t look farther for the Plant a Tree and Retree the World Ben Raskin, 2023-01-03 This handbook explains all the ways trees are essential divine for our climate our urban and rural environment our society and our mental health The Shakespearean Forest,

Making One's Way in the World Martin Bell,2020-02-28 The book draws on the evidence of landscape archaeology palaeoenvironmental studies ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable The premise is that archaeologists tend to focus on sites while neglecting the patterns of habitual movement that made them part of living landscapes Evidence of past movement is considered in a multi scalar way from the individual footprint to the long distance path including the traces created in vegetation by animal and human movement It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations In other instances radical changes of axes of communication and landscape structures provide evidence of upheaval and social change Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning animal movement faeces deposition and transplantation which can create readable routes along which are favoured resources Evidence from European hunter gatherer sites hints at similar practices of niche construction on a range of spatial scales On a local scale footprints help to establish axes of movement the locations of lost settlements and activity areas Wood

trackways likewise provide evidence of favoured patterns of movement and past settlement location Among early farming communities alignments of burial mounds enclosure entrances and other monuments indicate axes of communication From the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long term continuity of routeways Where fields flank routeways a range of methods including scientific approaches provide dates Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and rather better evidence for early routes crossing topography and providing connections between different environmental zones The book concludes with a case study of the Weald of South East England which demonstrates that some axes of cross topographic movement used as droveways and generally considered as early medieval can be shown to be of prehistoric origin One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the parts played by riverine and maritime longer distance communication It is argued that understanding the origins of the paths we use today contributes to appreciation of the distinctive qualities of landscapes Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of connectivity between different landscape zones including fragmented nature reserves and valued places In these ways an understanding of past routeways can contribute to sustainable landscapes The Long, Long Life of Trees Fiona Stafford, 2016-08-16 A lyrical tribute to the diversity of communities and quality of life trees their physical beauty their special characteristics and uses and their ever evolving meanings Since the beginnings of history trees have served humankind in countless useful ways but our relationship with trees has many dimensions beyond mere practicality Trees are so entwined with human experience that diverse species have inspired their own stories myths songs poems paintings and spiritual meanings Some have achieved status as religious cultural or national symbols In this beautifully illustrated volume Fiona Stafford offers intimate detailed explorations of seventeen common trees from ash and apple to pine oak cypress and willow The author also pays homage to particular trees such as the fabled Ankerwyke Yew under which Henry VIII courted Anne Boleyn and the spectacular cherry trees of Washington D C Stafford discusses practical uses of wood past and present tree diseases and environmental threats and trees potential contributions toward slowing global climate change Brimming with unusual topics and intriguing facts this book celebrates trees and their long long lives as our inspiring and beloved natural companions Tales of Darkness and Light Soso Tham, 2018-04-25 Soso Tham 1873 1940 the acknowledged poet laureate of the Khasis of northeastern India was one of the first writers to give written poetic form to the rich oral tradition of his people Poet of landscape myth and memory Soso Tham paid rich and poignant tribute to his tribe in his masterpiece The Old Days of the Khasis Janet Hujon's vibrant new translation presents the English reader with Tham's long poem which keeps a rich cultural tradition of the Khasi people alive through its retelling of old narratives

and acts as a cultural signpost for their literary identity This book is essential reading for anyone with an interest in Indian literature and culture and in the interplay between oral traditions and written literary forms This edition includes English translation Critical apparatus Embedded audio recordings of the original text A Gathering of Spoons Norman D.
