*Catalog of Copyright Entries. Third Series* Library of Congress. Copyright Office, 1959. Includes Part 1 Number 1 Books and Pamphlets Including Serials and Contributions to Periodicals January June. The History and Preservation of Chemical Instrumentation John T. Stock, Mary Virginia Orna, 2012-12-06. The development of chemistry like that of the other fields of science and technology has depended greatly upon the availability of instruments. Accordingly the study of the history of instrumentation is a major area in any survey of the progress in this science. Recognizing this fact the Division of the History of Chemistry of the American Chemical Society organized and held a very successful symposium on the history of chemical instrumentation during the Washington D C National Meeting in 1979. Remarks both formal and informal made during this symposium stressed points that soon become obvious to anyone who looks at the ancestry of present day instruments. In some cases the total history is measured in years rather than in centuries. Chemical instrumentation by no means confined to the laboratory is vital in industry. There is a natural tendency to discard an item of any kind when a newer version is acquired. Often to discard means to scrap. If the item scrapped is an instrument that is unique sometimes the last of its kind we have a permanent artefactual gap in the history of science.
