Informing with the Case Method T. Grandon Gill, 2011 There are a number of marvelous books that address the topic of the case method If you are interested in facilitating cases you can look to the classic book *Teaching and the Case Method* by Louis Barnes C Roland Christensen and Abby Hansen 1994 The collection of essays on the subject *Education for Judgment The Artistry of Discussion Leadership* by C Roland Christensen David Garvin and Ann Sweet 1991 is a wonderful and inspiring read as well If your interest is case based research it would be nearly impossible to find a more authoritative source than Robert Yin's 2009 4th Edition *Case Study Research Design and Methods* which at last count has been cited nearly 29 000 times according to Google Scholar There is even a new entry to the field William Ellet's 2007 *The Case Study Handbook How to Read Discuss and Write Persuasively about Cases* that is specifically aimed at the student At first glance then the topic of case studies in education and research seems to be pretty well covered Do we really need another book on the subject I write this book believing the answer is yes While I have great affection for the classics there are a number of issues facing most business faculty not to mention faculty members from disciplines outside of business that these books simply do not address In writing this book my intention is to offer some thoughts on some of these Paradoxically these omissions arise

from the very fact that the authors of the classics are undisputed masters of their craft Why this is a problem should become clear as I identify the three areas of focus for this book The first issue that I feel must be considered is using the case method with a novice audience Consider the following When I was enrolled in the MBA program at Harvard Business School HBS in the early 1980s the curriculum consisted of nearly 900 case discussion 15 per week and perhaps as many as 20 class periods given over to lecture style presentations When I teach a case method graduate course at my own institution on the other hand I am constrained to 11 case discussions a 12 week semester As it happens I am also the only course in the entire program that employs pedagogy reasonably faithful to the case method as it is normally defined The math is very simple By the last day of my semester my students have as much experience discussing cases as I did on Thursday afternoon of the first week of my two year MBA program at HBS With the exception of faculty teaching at those rare institutions that have chosen to widely adopt the case method the situation I face is commonplace The second concern that existing books raise for me is their tendency to focus on isolated topics Specifically case facilitation case writing and case research are treated as separable activities I would argue that these three aspects of the case method which I define quite broadly are inseparable For institutions that wish to achieve the full set of benefits provided by the case method all three activities must be pursued in parallel Perhaps this is why so few institutions have achieved success through the case method In this book I will argue that achieving such integration is precisely why those rare institutions have been so successful Once you start believing that the case method can be a key to institutional success how you get there becomes a real challenge At leading institutions featuring the case method such as HBS the philosophy is largely learned through a period of apprenticeship For example I did not encounter any of the references mentioned in the first paragraph excepting Yin at any time during my 5 year doctorate at HBS Instead I went out and wrote cases facilitated discussions and did research under the guidance of faculty members who were masters of the craft How can someone without the benefit of such an experience acquire such mastery While I cannot offer any promises in this regard I will at least provide some examples and easy to follow checklists that may be of service to individuals getting started How to Discuss a Case William Ellet, 2007 **Teaching Shakespeare**

Beyond the Major M. Tyler Sasser, Emma K. Atwood, 2024-02-22 This edited collection considers the task of teaching Shakespeare in general education college courses a task which is often considered obligatory perfunctory and ancillary to a professor's primary goals of research and upper level teaching The contributors apply a variety of pedagogical strategies for teaching general education students who are often freshmen or sophomores non majors and or non traditional students Offering instructors practical classroom approaches to Shakespeare's language performance and critical theory the essays in this collection explicitly address the unique pedagogical situations of today's general education college classroom Digital Business Jens Christensen, 2015-02-03 This book provides a holistic picture of the digital age as it emerges in the 2010s On the background of business analysis concepts from firm to megatrends and all business sectors of the World the digital age of

information systems and digital drivers are thoroughly laid out **Teaching with Cases** William Thomas Schiano, Espen Anderson, Bill Schiano, 2014 Case method teaching immerses students in realistic business situations which include incomplete information time constraints and conflicting goals The class discussion inherent in case teaching is well known for stimulating the development of students critical thinking skills yet instructors often need guidance on managing that class discussion to maximize learning Teaching with Cases focuses on practical advice for instructors that can be easily implemented It covers how to plan a course how to teach it and how to evaluate it The book is organized by the three elements required for a great case based course 1 advance planning by the instructor including implementation of a student contract 2 how to make leading a vibrant case discussion easier and more systematic and 3 planning for student evaluation after the course is complete Teaching with Cases is ideal for anyone interested in case teaching whether basing an entire course on cases using cases as a supplement or simply using discussion facilitation techniques To learn more about the book and to see resources available visit teachingwithcases.hbsp.harvard.edu

Cinderella Church: the Story of Early Christianity R. John Kinkel, 2008-09-29 Christianity is the largest religion in the world with approximately 2.1 billion adherents Nonetheless when measured by the gold standard early Christian teachings and practice we find considerable slippage Two words describe current church problems and failures dull and devious At the highest levels of Catholic leadership for example we find scandals galore Top officials pilfer 40 million in Detroit to build national shrines Cardinals and bishops cover up priest sexual abuse and the pope most recently ignores high ranking bishops and cardinals pleas to allow Catholics to use condoms to prevent the spread of HIV AIDS That is the devious part At the lower end of the totem pole are priests and laity that just don't get it They say their prayers go to mass and have their baptisms they wonder why their kids don't go to church any more Not enough priests We will close the small churches and build a mega church One small city in Wisconsin pop 40,000 did this at the cost of 12 million Care to measure the cost of celibacy Pay pray and obey is the mantra and the young people don't like it Little wonder that only 1 in 3 Christians practice their faith to any appreciable degree and fail to pass religious traditions on to the next generation Instead of going after the lost sheep the pope says maybe we need a small dedicated remnant of believers Interesting strategy when you have driven the sheep away with questionable policies no women priests no married priests no condoms to fight AIDS Case Research in Public

Dr. Aan Hendrayana, M. Pd.,2024-07-20 Case Based Learning CBL is an instructional approach that utilises real world or realistic scenarios cases as the springboard for active learning These cases can be factual accounts of past events fictionalised narratives mirroring real world situations or even open ended challenges designed to stimulate critical thinking Students engage in the analysis of these instances carefully examining the information provided identifying crucial matters developing solutions and ultimately reaching conclusions to enhance their problem solving skills and decision making abilities Khan et al 2015 *Integrating Work in Theological Education* Kathleen A. Cahalan,Edward Foley,Gordon S. Mikoski,2017-03-09 If only we could do a better job of helping students at connecting the dots theological educators commonly lament Integration often proposed as a solution to the woes of professional education for ministry would help students integrate knowledge skills spirituality and integrity When these remain disconnected incompetence ensues and the cost runs high for churches denominations and ministers themselves However we fail in thinking that integrating work is for students alone It is a multifaceted constructive process of learning that is contextual reflective and dialogical It aims toward important ends competent leaders who can guide Christian communities today It entails rhythms not stages and dynamic movement including disintegration Integrating work is learning in motion across domains and among and between persons It is social and communal born of a life of learning together for faculty staff administrators and students It is work that bridges the long standing gaps between school ministry practice and life It s a verb not a noun Here a diverse group of theological educators through descriptive case studies theological reflection and theory building offer a distinctive contribution to understanding integrating work and how best to achieve it across three domains in community curriculums and courses Process Management and Burnout Prevention Yevgen Bogodistov,Jürgen Moormann,2024-07-03 How can we work towards ensuring that organisations are robust and highly productive and avoid issues such as tiredness burnout high employee turnover motivational issues or problems with the emotional climate Bringing together the fields of process management and organisational behaviour for the first time this book provides sorely needed practical guidance on how

organisations can diagnose anticipate and address psychological issues in their workforces as well as process vulnerabilities in their operations Advocating for a human centred approach to process management the authors help discover and prevent negative psychological issues related to emotional exhaustion This book offers a step by step toolkit for burnout recognition and systematic prevention using established process management tools Thus the book offers a deep look into psychological aspects far beyond classical process management

Hitler: Philosopher King Mark Morris,2020-08-30 Hitler and the NSDAP are a social and historical phenomenon and this book proposes that Hitler's Aspergic personality and postmodern philosophy combined to enable both his personal political success and then the nature of the regime that he constructed Hitler himself was clearly not a normal human being genius and exceptional in some areas his Asperger's enabled him to single mindedly pursue personal and political power Nietzsche's crystallisation of the previous century and a half of German idealism in a rigorous moral and cultural nihilism was reified and rolled out with Weberian bureaucratic and Prussian militaristic efficiency The post modern state created did not rest on history religious or cultural traditions Ideology was shaped instrumentally in order to yield the maximal amount of the only currency that survives the caustic deconstruction of postmodernism namely power itself
