Williams Report On Mathematics:

Department for Children, Schools and Families Great Britain. National Audit Office, 2008 In 2007 the Department for Children Schools and Families commissioned Sir Peter Williams to undertake an independent review of the quality of primary mathematics teaching and his report was published in June 2008 This report evaluates in particular raising attainment and progress in mathematics and narrowing achievement gaps between certain pupils and their peers and the delivery and effectiveness of the Primary National Strategy s resources and interventions and their impact on pupil and school performance It was found that bringing greater structure and consistency to the way primary mathematics is taught the Strategy initially helped to improve test results at Key Stage 2 Since 2000 however attainment has levelled off It is too early to tell if the 2007 revisions to the Strategy will deliver the step change required The report makes recommendations on this basis *Mathematics Across the Curriculum* Sue Fox, Liz Surtees, 2010-07-08 Looks at the theory and practice of providing inspiring challenging and engaging cross curricular mathematics lesson [Becoming a Primary Mathematics Specialist Teacher](#) Gina Donaldson, Jenny Field, Dave Harries, Clare Tope, Helen Taylor, 2013-08-15 What is the role of the mathematics specialist What is deep subject knowledge in mathematics What sort of pedagogical knowledge does a mathematics specialist need How can you best support your colleagues to improve mathematics teaching and learning *Becoming a Primary Mathematics Specialist Teacher* helps you explore the role of the specialist in promoting positive attitudes towards mathematics and developing the teaching and learning of mathematics in your primary school Illustrated throughout with classroom based examples and referenced to relevant research it is designed to support your development as a reflective practitioner who can confidently review and develop practice in your own classroom as well as challenge and move the whole school forward through collaborative professional development Essential topics explored include The nature of the role of the primary mathematics specialist Understanding how attitudes to mathematics evolve and why it is crucial to challenge and change negativity What we mean by deep subject knowledge in primary mathematics Pedagogical knowledge of how mathematics is taught and learned The skills of coaching and mentoring to support teachers and teaching assistants Unpicking the principles of progression for high quality teaching in all years groups The key features of deep subject knowledge and pedagogy in three areas of the curriculum multiplication time and data handling *Becoming a Primary Mathematics Specialist Teacher* is an essential source of guidance and ideas for all primary school teachers aiming to achieve Mathematics Specialist status or already taking this role those studying primary mathematics as a specialism and at masters level and for all primary mathematics co ordinators **Mathematics Performance in Primary Schools** Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2009 In 2007 08 the National Strategy to improve performance in primary mathematics cost some 104 million to implement The Strategy aims to raise performance through extensive teaching and learning resources supported by professional development programmes for teachers In 2006 07 some

2 3 billion was spent on teaching mathematics in primary schools out of a total expenditure of 10 billion on primary teaching and teaching support staff Yet improvements in the mathematics results of primary school pupils have levelled off since 2000 In 2008 79 per cent of pupils met the Government's expected standard at Key Stage 2 age 11 This means that over one in five children are starting secondary school without a secure foundation in mathematics There are persistent gaps in the mathematics performance of primary school pupils from different backgrounds and with different characteristics In contrast to other subjects boys are making more progress than girls The biggest attainment gap 18 percentage points is related to deprivation Performance varies across England and between local authorities with the percentage of pupils achieving the expected standard at KS2 ranging from 70 to 87 per cent The Primary National Strategy has contributed to improvements in primary mathematics teaching and learning but weaknesses persist in vital areas such as the use and application of mathematics to real life situations and the assessment of pupils progress The lack of depth in subject knowledge of many primary school teachers and the lack of take up of continuing professional development in mathematics are major concerns which the Department has only recently begun to address through a ten year programme to train 13 000 specialist teachers

Reimers, 2020-03-23 This open access book presents a comparative study on how large scale professional development programs for teachers are designed and implemented

Around the world governments and educators are recognizing the need to educate students in a broad range of higher order cognitive skills and socio emotional competencies and providing effective opportunities for teachers to develop the expertise needed to teach these skills is a crucial aspect of effective implementation of curricula which include those goals This study examines how large scale efforts to empower teachers for deeper instruction have been designed how they have been implemented and their outcomes To do so it investigates six programs from England Colombia Mexico India and the United States Though all six are intended to broaden and deepen students curricular aspirations each takes this expansion of curricular goals in a different direction The ambitious education reforms studied here explicitly focus on building teachers capacity to teach on a broader set of goals Through a discerning analysis of program documents evaluations and interviews with senior leaders and participants in the programs the book identifies the various theories of action used in these programs examines how they were implemented and discusses what they achieved As such it offers an indispensable resource for education leaders interested in designing and implementing professional development programs for teachers that are aligned with ambitious instructional goals

Conference on Graduate Training of Mathematics Teachers, Sir George Williams University, 5 Juin 1969 Canadian Mathematical Congress, 1972 International Handbook of Mathematical Learning Difficulties Annemarie Fritz, Vitor Geraldi Haase, Pekka Räsänen, 2019-01-30

This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society
