Re: [presubmission](#) inquiry

To Whom It May Concern:

We would like to inquire as to the suitability of our work for publication in [PLOS Pathogens](#). *Wolbachia pipientis* is a maternally transmitted bacterium that targets and replicates within the developing oocytes (in the [germarium](#)) of *Drosophila melanogaster*. Although *Wolbachia* are primarily maternally transmitted, they can achieve this localization even after injection into the fly abdomen, suggesting they are capable of transiting through multiple cell and tissue types in order to migrate to their final niche. Here, we identify host actin as important for the maintenance and transmission of *Wolbachia* in *Drosophila melanogaster*.

In our study, we ask the following [scientific question](#): “*What mechanism is used by Wolbachia to transit to the germ line in Drosophila melanogaster?*” The manuscript presents [our discovery](#) that a *Wolbachia* infection is sensitive to the polymerization state of actin in the host; mutations in the host actin binding proteins profilin and [yillin](#), which alter F-actin in the [germarium](#), also alter *Wolbachia* titer and transmission fidelity. We [provide evidence](#) through crosses, molecular analyses (PCR, Western blots) as well as immunohistochemistry on developing [oocytes](#), we characterize three mutant alleles in *Drosophila*, each of which result in reduced titer and a *Wolbachia*-clearing phenotype. Although other researchers have identified the microtubule skeleton as important for *Wolbachia* localization in the oocyte (see [Serbus et al., 2007](#); [Ferree et al., 2005](#); and [Landmann et al., 2012](#)), our study is the first to [identify a host component required by Wolbachia to transit to the germ line from the stem cell niches](#).

[Results will be of interest to the PLOS Pathogens readership](#) as we identify that *Wolbachia* use the host actin cytoskeleton to target, replicate within, and persist in the germ line of its hosts. [Our result is of broad import as Wolbachia replication within germ lines is essential to their role in so called “pathogen-blocking” — the use of Wolbachia to reduce viral replication within mosquito hosts.](#) It is therefore essential that we better understand how *Wolbachia* target and persist within the germ line.

In the spring of 1968, the English faculty at the University of Wisconsin-Madison (UW) voted to remedialize the first semester of its required freshman composition course, English 101. The following year, it eliminated outright the second semester course, English 102. For the next quarter century, UW had no real campus-wide writing requirement, putting it out of step with its peer institutions and preventing it from fully joining the composition revolution of the 1970s. In *From Form to Meaning*, David Fleming chronicles these events, situating them against the backdrop of late 1960s student radicalism and within the wider changes taking place in U.S. higher education at the time. Fleming begins with the founding of UW in 1848. He examines the rhetorical education provided in the university's first half-century, the birth of a required two-semester composition course in 1898, faculty experimentation with that course in the 1920s and 1930s, and the rise of a massive, current traditional writing program staffed primarily by graduate teaching assistants (TAs) after World War II. He then reveals how, starting around 1965, tensions between faculty and TAs concerning English 101/102 began to mount. By 1969, as the TAs were trying to take over the committee that supervised the course, the English faculty simply abandoned its long-standing commitment to freshman writing. In telling the story of

composition s demise at UW Fleming shows how contributing factors the growing reliance on TAs the questioning of traditional curricula by young instructors and their students the disinterest of faculty in teaching and administering general education courses were part of a larger shift affecting universities nationally He also connects the events of this period to the long embattled history of freshman composition in the United States And he offers his own thoughts on the qualities of the course that have allowed it to survive and regenerate for over 125 years      **Education for Democracy** Chad Alan Goldberg, 2020-11-17 American public universities were founded in a civic tradition that differentiated them from their European predecessors steering away from the pursuit of knowledge for its own sake Like many such higher education institutions across the United States the University of Wisconsin s mission known as the Wisconsin Idea emphasizes a responsibility to serve the needs of the state and its people This commitment which necessarily requires a pledge to academic freedom has recently been openly threatened by state and federal actors seeking to dismantle a democratic and expansive conception of public service Using the Wisconsin Idea as a lens Education for Democracy argues that public higher education institutions remain a bastion of collaborative problem solving Examinations of partnerships between the state university and people of the state highlight many crucial and lasting contributions to issues of broad public concern such as conservation LGBTQ rights and poverty alleviation The contributors restore the value of state universities and humanities education as a public good contending that they deserve renewed and robust support      **University of Wisconsin-Madison, Department of Art, Sesquicentennial Celebration Faculty Exhibition** Laurie Beth Clark, University of Wisconsin--Madison.
