Drought Policies: Case Studies on Mega-droughts for the High Level Experts and Leaders Panel on Water and Disasters (HELP) Jerome Delli Priscolli ,Kenzo Hiroki ,2019-11-15 This book focuses on mega droughts of the past 20 years Twelve cases from both developed and developing countries are elaborated in the book Its intention is to draw lessons from the cases of extremely severe water shortages so that countries and stakeholders can be better prepared for extreme drought events in the future Several recurrent themes emerge from the diverse case studies and descriptions of programs For example most chapters discuss the

necessity to move from reactive compensatory to preventive policies This theme has implications for use of insurance in developing countries e g is insurance encouraging investments to help countries avoid disasters or is it acting mostly in a humanitarian way to compensate for losses to help people Several authors point to the importance of risk assessment and to developing risk based policies for drought This raises statistical issues of how such assessments of uncertainty and risks are done and how they relate to actual occurrence of events Most chapters call for more inter sectoral policies policies which integrate water resources management approaches and to the necessity of raising public awareness of droughts in times of no drought The issue of structural versus nonstructural is clear in most cases While often cast as either or the message that emerges is more one of how do you integrate these approaches Finally a few chapters bring to light how prevention is needed for national security as well as water security In Focus a book series that showcases the latest accomplishments in water research Each book focuses on a specialist area with papers from top experts in the field It aims to be a vehicle for in depth understanding and inspire further conversations in the sector

Contradictions of Democracy Nicholas Rush Smith, 2019-01-17 Despite being one of the world s most vibrant democracies police estimate between five and ten percent of the murders in South Africa result from vigilante violence This is puzzling given the country s celebrated transition to democracy and massive reform of the state s legal institutions Where most studies explain vigilantism as a response to state or civic failure in Contradictions of Democracy Nicholas Rush Smith illustrates that vigilantism is actually a response to the processes of democratic state formation In the context of densely networked neighborhoods vigilante citizens often interpret the technical success of legal institutions for instance the arrest and subsequent release of suspects on bail as failure and work to correct such perceived failures on their own Smith also shows that vigilantism provides a new lens through which to understand democratic state formation Among young men of color in some parts of South Africa fear of extra judicial police violence is common Amid such fear instead of the state seeming protective it can appear as something akin to a massive vigilante organization An insightful look into the high rates of vigilantism in South Africa and the general challenges of democratic state building Contradictions of Democracy explores fundamental questions about political order the rule of law and democratic citizenship

In between Life and Death Lena Kroeker, 2015 This book recounts the stories of 30 expectant mothers living with HIV in Lesotho and how they made decisions during an uncertain time Social concerns such as poverty familial disruption limited opportunities and early infant care are present during a time in between life and death Medical and non medical solutions are found to make this life changing event a success Familial care medical counseling and ritual practices were combined yet there were often conflicting demands In between Life and Death is about the navigation of such conflicts Series Contributions to the Africa Research Beitrage zur Afrikaforschung Vol 61 Subject Sociology Women s Studies African Studies Healthcare

Transboundary Water Management and the Climate Change Debate Anton Earle, Ana Elisa Cascao, Stina Hansson, Anders Jägerskog, Ashok Swain, Joakim Öjendal, 2015-05-26 Climate change has an impact on the

ability of transboundary water management institutions to deliver on their respective mandates The starting point for this book is that actors within transboundary water management institutions develop responses to the climate change debate as distinct from the physical phenomenon of climate change Actors respond to this debate broadly in three distinct ways adapt resist as in avoiding the issue and subvert as in using the debate to fulfil their own agenda The book charts approaches which have been taken over the past two decades to promote more effective water management institutions covering issues of conflict cooperation power and law A new framework for a better understanding of the interaction between transboundary water management institutional resilience and global change is developed through analysis of the way these institutions respond to the climate change debate This framework is applied to six river case studies from Africa Asia and the Middle East Ganges Brahmaputra Jordan Mekong Niger Nile Orange Senqu from which learning conclusions and policy recommendations are developed
