immaterial substances and theistic explanations for the origins of consciousness but a more vibrant interest in the origins of the soul and the implications it has for numerous theological topics This is due in part to the growing recognition in theistic circles that we are not material beings at least not solely but rather we are ensouled beings and it is this part aspect or feature of us that needs some explaining beyond biological evolution The conversation that takes place in this volume will be of interest to scholars and students of both theology and philosophy
