Stephen Davies

Why Bother With History Ancient Modern And Postmodern Motivations:

Why Bother with History? Beverley C. Southgate, 2000 This text looks at the debates concerning the value of history but differs from many of the other books by offering perspectives from across the centuries rather than just the dense philosophical present

Why Bother with History? Beverley C. Southgate, 2013-11-04 Why Bother With History argues for an increasingly important role for a revitalised historical study Examining the motivations of past historians the author rejects the ancient aspiration to a history for its own sake and argues that historians importance lies in their own adoption of a moral standpoint from which a story of the past can be told that facilitates the attainment of a future we desire Inevitably controversial in that it challenges many of the assumptions of modernist history this is an interdisciplinary book which draws in particular on psychology and literature

Postmodernism in History Beverley Southgate, 2003-09-02 This book traces the philosophical precursors of postmodernism and identifies the roots of current concerns Beverley Southgate describes the core constituents of postmodernism and provides a lucid and profound analysis of the current concerns

Recent Themes in Historical Thinking Donald A. Yerxa, 2008 Described as the New York Review of Books for history Historically Speaking has emerged as one of the most distinctive historical publications in recent years actively seeking out contributions from a pantheon of leading voices in historical discourse from both inside and outside academia Recent Themes in Historical Thinking represents some of the best writing on historiography to appear in the past five years The prominent historians featured in this collection of essays and interviews drawn from Historically Speaking comment on such wide ranging topics as the impact of postmodernism on the field the relationship between professional and popular history the importance of historical consciousness and the limitations of the field in its current state

On the Future of History Ernst Breisach, 2007-11-01 What does postmodernism mean for the future of history Can one still write history in postmodernity To answer questions such as these Ernst Breisach provides the first comprehensive overview of postmodernism and its complex relationship to history and historiography Placing postmodern theories in their intellectual and historical contexts he shows how they are part of broad developments in Western culture Breisach sees postmodernism as neither just a fad nor a universal remedy In clear and concise language he presents and critically evaluates the major views on history held by influential postmodernists such as Derrida Foucault Lyotard and the new narrativists Along the way he introduces to the reader major debates among historians over postmodern theories of evidence objectivity meaning and order truth and the usefulness of history He also discusses new types of history that have emerged as a consequence of postmodernism including cultural history microhistory and new historicism For anyone concerned with the postmodern challenge to history both advocates and critics alike On the Future of History will be a welcome guide

What is History For? Beverley Southgate, 2006-06-01 An experienced author of history and theory presents this examination of the purpose of history at a time when recent debates have rendered the question what is history for of utmost importance Charting the development of

historical studies and examining how history has been used this study is exceptional in its focus on the future of the subject as well as its past It is argued that history in the twenty first century must adopt a radical and morally therapeutic role instead of studying for its own sake Providing examples of his vision of history in post modernity Beverley Southgate focuses on the work of four major historians including up to date publications Robert A Rosenstone s study of Americans living in nineteenth century Japan Peter Novick s work on the Holocaust Sven Lindqvist s A History of Bombing Tzvetan Todorov s recently published work on the twentieth century This makes compulsive reading for all students of history cultural studies and the general reader as notions of historical truth and the reality of the past are questioned and it becomes vital to rethink history s function and renegotiate its uses for the postmodern age Nation Building Wang Gungwu,2005 The book addresses questions such as how should historians treat the earlier pasts of each country and the nationalism that guided the nation building tasks Where did political culture come in especially when dealing with modern challenges of class secularism and ethnicity What part do external or regional pressures play when the nations are still being built The authors have thought deeply about the issues of writing nation building histories and have tried to put them not only in the perspective of Southeast Asian developments of the past five decades but also the larger areas of historiography today The Discourse of History Jing Hao,J. R. Martin,2024-05-31 Taking a Systemic Functional Linguistic perspective this book explores how language builds our knowledge about the past and gives value to historical events thereby shaping contemporary culture It brings together cutting edge research from an international team of scholars to provide a detailed study of texts from three different world languages English Spanish and Mandarin Chinese revealing how the discourse of history is constructed in these languages Each chapter provides examples and step by step analyses of how knowledge and value are constructed in history texts drawing on Systemic Functional Linguistics to develop theory and description in relation to text analysis It also makes connections with disciplinary literacy and history education showing how linguistic findings can benefit the teaching and learning of historical literacy Providing theoretical and analytical foundations for studies of the discourse of history it is essential reading for anyone interested in literacy discourse analysis and language description History, what and Why? Beverley C. Southgate,2001 This is a highly accessible introductory survey of historians views about the nature and purpose of their subject and discusses the traditional model of history as an account of the past as it was **Truth Considered and Applied** Stewart E. Kelly,2011 A classroom text for philosophy and theology students learning to defend Christianity with love and truth in the context of history and against the challenges of postmodernist thought **Historics** Martin L. Davies,2007-05-07 From an author at the forefront of research in this area comes this provocative and seminal work that presents a unique and fresh new look at history and theory Taking a broadly European view the book draws on works of French and German philosophy some of which are unknown to the English speaking world and Martin L Davies spells out what it is like to live in a historicized world where any event is presented as historical as or even before it happens

Challenging basic assumptions made by historians Davies focuses on historical ideas and thought about the past instead of examining history as a discipline The value of history in and for contemporary culture is explained not only in terms of cultural and institutional practices but in forms of writing and representation of historical issues too Historics stimulates thinking about the behaviours and practice that constitute history and introduces complex ideas in a clear and approachable style This important text is recommended not only for a wide student audience but for the more discerning general reader as well

Professional Historians in Public Berber Bevernage,Lutz Raphael,2023-07-24 The past decades public interest in history is booming This creates new opportunities but also challenges for professional historians This book asks how historians deal with changing public demands for history and how these affect their professional practices values and identities The volume offers a great variety of detailed studies of cases where historians have applied their expertise outside the academic sphere With contributions focusing on Latin America Africa Asia the Pacific and Europe the book has a broad geographical scope Subdivided in five sections the book starts with a critical look back on some historians who broke with mainstream academic positions by combining their professional activities with an explicit political partisanship or social engagement The second section focusses on the challenges historians are confronted with when entering the court room or more generally exposing their expertise to legal frameworks The third section focuses on the effects of policy driven demands as well as direct political interventions and regulations on the historical profession A fourth section looks at the challenges and opportunities related to the rise of new digital media Finally several authors offer their view on normative standards that may help to better respond to new demands and to define role models for publicly engaged historians This book aims at historians and other academics interested in public uses of history

The Pursuit of History John Tosh,2015-02-11 This classic introduction to the study of history invites the reader to stand back and consider some of its most fundamental questions what is the point of studying history How do we know about the past Does an objective historical truth exist and can we ever access it In answering these central questions John Tosh argues that despite the impression of fragmentation created by postmodernism in recent years history is a coherent discipline which still bears the imprint of its nineteenth century origins Consistently clear sighted he provides a lively and compelling guide to a complex and sometimes controversial subject while making his readers vividly aware of just how far our historical knowledge is conditioned by the character of the sources and the methods of the historians who work on them The sixth edition has been revised and updated with key new material including a brand new chapter on public history sections on digitised sources and historical controversy discussion of topics including transnational history and the nature of the archive an expanded range of examples and case studies a comprehensive companion website providing valuable supporting material study questions and a bank of primary sources Lucid and engaging this edition retains all the user friendly features that have helped to make this book a favourite with both students and lecturers including marginal glosses illustrations and suggestions for further reading Along

with its companion website this is an essential guide to the theory and practice of history *Global Innovation of Teaching and Learning in Higher Education* Prudence C. Layne, Peter Lake, 2014-11-19 This book examines current trends in higher education and the Scholarship of Teaching and Learning It introduces readers to pedagogical strategies that instructors worldwide are using to overcome some of the challenges they face in higher education To maximize their students learning this work argues that institutions are compelled to innovate their policies and instructors must be collaborative and creative in their practices in response to students growing demands needs challenges to their learning and the shifting terrain of a rapidly globalizing world The text explores the idiosyncrasies and challenges that drive innovation across particular cultures disciplines and institutions It suggests that the responses to these drivers offer some universal and compatible lessons that not only optimize teaching and learning but also transgress institutional cultural and disciplinary boundaries in higher education The contributors to this collection work in the United States the United Kingdom Africa Asia Australia Scandinavia and the Middle East They represent a broad range of disciplines fields and institutional types They teach in varied contexts durations delivery modes and formats including online study abroad blended accelerated condensed intensive and mortar and brick settings Their higher education students are equally as diverse in age cultural backgrounds and needs but willingly lend their voices and experiences to their instructors study of teaching and learning in their particular contexts This book harnesses the rich diversities and range our contributors represent and shares the results of their expertise research and assessments of some of the most creative and effective ways to improve student learning in the face of stagnant practices limited resources and other deficiencies that instructors and students face in higher education Gallipoli Jenny Macleod, 2004-07-01 This new book traces the disparities in the memory of Gallipoli that are evident in the countries that participated in the campaign It explores the way in which history is written at the personal local professional and national levels *The Education of Black Males in a 'Post-Racial' World* Anthony L. Brown, Jamel K. Donnor, 2013-09-13 The Education of Black Males in a Post Racial World examines the varied structural and discursive contexts of race masculinities and class that shape the educational and social lives of Black males The contributing authors take direct aim at the current discourses that construct Black males as disengaged in schooling because of an autonomous Black male culture and explore how media social sciences school curriculum popular culture and sport can define and constrain the lives of Black males The chapters also provide alternative methodologies theories and analyses for making sense of and addressing the complex needs of Black males in schools and in society By expanding our understanding of how unequal access to productive opportunities and quality resources converge to systemically create disparate experiences and outcomes for African American males this volume powerfully illustrates that race still matters in post racial America This book was originally published as a special issue of Race Ethnicity and Education Multiculturalism in Education and Teaching Carl A. Grant, 2014-11-13 In the World Library of Educationalists series international experts compile career long collections of what they judge to be their finest

pieces extracts from books key article salient research findings major theoretical and practical contributions so the world can read them in a single manageable volume Readers will be able to follow the themes and strands and see how their work contributes to the development of the field Carl A Grant has spent the last 35 years researching teaching thinking and writing about some of the key enduring issues in multicultural education He has contributed to a multitude of books and articles and is former President of the National Association for Multicultural Education In his selected works Carl Grant brings together 14 of his key writings in one place Starting with a specially written Introduction which gives an overview of his career and contextualises his selection within the development of the field the book is divided into three parts Race and Educational Equity Theorizing Multicultural Education Multicultural Teacher Education This book not only shows how Carl Grant s thinking developed during his long and distinguished career it also gives an insight into the development of the fields to which he contributed

Liberal Democracy as the End of History Christopher Hughes,2012-02-20 Francis Fukuyama claims that liberal democracy is the end of history This book provides a theoretical re examination of this claim through postmodernist ideas The book argues that postmodern ideas provide a valuable critique to Fukuyama s thesis and poses the questions can we talk about a universal and teleological history a universal human nature or an autonomous individual It addresses whether postmodern theories concerning the movement of time what it means to be human and what it means to be an individual subject can be accommodated within a theory of a history that ends in liberal democracy The author argues that incorporating elements of postmodern thought into Fukuyama s theory makes it possible to produce a stronger and more compelling account of the theory that liberal democracy is the end of history The result of this is to underpin Fukuyama s theory with a more complex understanding of the movement of time the human and the individual and to show that postmodern concepts can paradoxically be used to strengthen Fukuyama s theory that the end of history is liberal democracy The book will be of interest to students and scholars of political theory postmodernism and the work of Francis Fukuyama

Empiricism and History Stephen Davies,2003-05-16 The central doctrine of empiricism that true knowledge or understanding of the world comes ultimately from sense impressions underlies most of the practices and arguments of professional historians but many historians have denied that there is a theory behind what they do In the last twenty years however postmodernism has had a powerful effect on the discipline of history and is now forcing empiricist historians to articulate their methods and to defend them as both possible and virtuous In this concise introduction Stephen Davies explains what historians mean by empiricism examines the origins growth and persistence of empirical methods and shows how students can apply these methods to their own work

Heritopia Jes Wienberg,2021-03-09 This electronic version has been made available under a Creative Commons BY NC ND open access license Heritopia investigates the meanings of the past in the present focusing on Abu Simbel in Egypt and other World Heritage sites It explores and resolves a number of paradoxes the past is impossible to preserve for eternity all preservation implies change preservation of one site normally

means destruction of others threats are important in the creation of heritage but at the same time heritage may become a threat and threats can become heritage themselves heritage stands in contrast to modernity and is at the same time part of it both the increase and the decrease of modernity create heritage and finally heritage may be global and local at the same time Heritopia will appeal to students and professionals in heritage studies and related subjects such as archaeology history ethnology and museology
