Wikipedia is a *[wiki/wiki](#)*, which means that anyone can easily edit any [unprotected article](#) and have those changes posted immediately to that page.

Editing a Wiki page is easy.

Simply click on the "Edit this page" tab at the top (or the edit link on the right or bottom) of a Wiki page. This will bring you to a page with a text box containing the editable text of that page. (If you want to experiment, please do so in our [sandbox](#), not here. You could open the [sandbox](#) in a separate window or tab to be able to see both this text and your tests in the sandbox.)

Type away, write a short [edit summary](#) on the small field below the edit-box. You may use shorthand to describe your changes, as described in the [legend](#), and when finished, press [options](#) to see how your changes will look. Then press "Save". Depending on your system, pressing "Enter" while the edit box is not active (when there is no typing cursor in it) may have the same effect as pressing the "Save" button. Also, please do not vandalise the information on Wikipedia.

You can also click on the "Discussion" tab (or the "Discuss this page" link) to see the corresponding [talk page](#), which contains comments about the page from other Wikipedia users. Click on the "+" tab (or "Edit this page") to add a comment.
