**Investigating Wikipedia** Céline Poudat, Harald Lungen, Laura Herzberg, 2024-11-15 The present volume is intended as a reference book on Wikipedia corpus studies from corpus construction to exploration and analysis Wikipedia is a complex object difficult to manipulate for linguists and corpus researchers In addition to the encyclopedic articles consulted by millions of users it contains vast spaces of written discussions aka talk pages where Wikipedia authors negotiate the

collaborative editing of articles make evaluations or discuss related topics The proposed volume covers Wikipedia articles their revision histories and discussions with a focus on discussions which have not been studied extensively so far and have also been neglected in previous corpus building efforts Wikipedia discussions are instances of computer mediated communication CMC thus constituting a completely different interaction oriented linguistic genre Sophisticated tools and methods of linguistic annotation and corpus exploration are needed to exploit the huge and valuable corpus resources that can be constructed from the Wikipedia discussions The present volume aims at encouraging and facilitating Wikipedia corpus studies providing standards recommendations and innovative methods to build and explore Wikipedia corpora and presenting corpus studies that make the most of the peculiarities of Wikipedia

**Wrong Turnings** Geoffrey M. Hodgson, 2018-01-03

The Left is in crisis Despite global economic turbulence left wing political parties in many countries have failed to make progress in part because they have grown too ideologically fragmented Today the term Left is associated with state intervention and public ownership but this has little in common with the original meaning of the term What caused what we mean by the Left to change and how has that hindered progress With *Wrong Turnings* Geoffrey M Hodgson tracks changes in the meaning of the Left and offers suggestions for how the Left might reclaim some of its core values The term Left originated during the French Revolution when revolutionaries sought to abolish the monarchy and privilege and to introduce a new society based on liberty equality fraternity and universal rights Over time however the meaning radically changed especially through the influence of socialism and collectivism Hodgson argues that the Left must rediscover its roots in the Enlightenment and readopt Enlightenment values it has abandoned such as those concerning democracy and universal human rights Only then will it be prepared to address contemporary problems of inequality and the survival of democracy Possible measures could include enhanced educational provisions a guaranteed basic income and a viable mechanism for fair distribution of wealth *Wrong Turnings* is a truly pathbreaking work from one of our most prolific and respected institutional theorists It will change our understanding of how the left got lost

Iryna Gurevych,Jungi Kim,2013-04-03 Collaboratively Constructed Language Resources CCLRs such as Wikipedia Wiktionary Linked Open Data and various resources developed using crowdsourcing techniques such as Games with a Purpose and Mechanical Turk have substantially contributed to the research in natural language processing NLP Various NLP tasks utilize such resources to substitute for or supplement conventional lexical semantic resources and linguistically annotated corpora These resources also provide an extensive body of texts from which valuable knowledge is mined There are an increasing number of community efforts to link and maintain multiple linguistic resources This book aims offers comprehensive coverage of CCLR related topics including their construction utilization in NLP tasks and interlinkage and management Various Bachelor Master Ph D programs in natural language processing computational linguistics and knowledge discovery can use this book both as the main text and as a supplementary reading The book also provides a valuable reference guide for researchers and professionals for the above topics **Design and Digital Interaction** Doctor Gjoko Muratovski,Craig Vogel,2019-05-22 Just as the term design has been going through change growth and expansion of meaning and interpretation in practice and education the same can be said for design research The traditional boundaries of design are

dissolving and connections are being established with other fields at an exponential rate Based on the proceedings from the IASDR 2017 Conference Re Research is an edited collection that showcases a curated selection of 83 papers just over half of the works presented at the conference With topics ranging from the introduction of design in the primary education sector to designing information for Artificial Intelligence systems this book collection demonstrates the diverse perspectives of design and design research Divided into seven thematic volumes this collection maps out where the field of design research is now From Software Engineering to Information Design Yvette Shen Most academic methodologies are developed from a prescribed methodological process that is limited to a specific area of study However the disciplinary landscape in which the knowledge is established is being rapidly reconfigured Given the vast varieties of practices and knowledge base required from information designers it is even more crucial for them to look outside of the traditional visual design fields and seek diversities for better research and creation methods The two disciplines software engineering and information design are often perceived as one provides technical solutions to the other This essay intends to move beyond the common perception and identify relevant issues in software engineering design that resonate with the information design process The issues include the multi component planning approach the human oriented agile method design concepts such as abstraction decomposition component modularity hierarchical relationship and extensibility The perspectives from software engineering design and information design is examined through units of analysis terminology explanations and forms of communications The collective design methods and principles provide a systematic framework to the methodological thinking in information design The discussion serves the purpose of encouraging more conceptual based conversations between information design and other disciplines especially in the fields of science and technology Designing Information for Artificial Intelligence Path Recommendation and User Acceptance in a Virtual Space Jong Myoung Lee Kyung Hoon Hyun In this study the authors propose two information layout strategies informative layout and decisive layout that influence the user acceptance rate on recommended information The informative layout is the degree of descriptions in the recommendation process The decisive layout is the degree of choices in recommendations Thus the objective of the paper is to discover how users acceptance of a recommendation changes when the recommendation is displayed in different degrees of informative and decisive layouts To this end we have conducted the following tasks 1 sophisticated software was created with JavaScript to conduct experiments with users online 2 experiment subjects N 247 with various education and demographic levels were recruited 3 user acceptance rate depending on the information layout strategy was collected 4 the relationships between information layout strategy and user acceptance of the recommended information were computationally analyzed The results of the study indicate that the information layout strategy proposed in this research significantly influences user acceptance of the recommended information Also this research identified effective combinations of informative and decisive layouts to maximize the user acceptance The Research on Design Framework for Citizen Science Zhiyong Fu Jia Lin Lu Wang Citizen

science is a process in which ordinary citizens contribute to scientific research How to create citizen science design framework to achieve better awareness initiative and action is our research focus This paper will explore citizen science design in the context of smart city on the basis of activity theory and by means of digital social innovation Smart City concept provides new elements including social communication collaborative design and innovative community to citizen science With the rapid development of science and information and communication technologies ICTs and with the arrival of Web 2 0 social innovation is endowed with digital factors so as to be evolved to digital social innovation DSI which gives various design perspectives on citizen science and also plays an important part in establishing citizen science evaluation model In this paper a citizen science design framework consisting of citizen science content model design model and evaluation model is proposed by discussing related theories models and citizen science cases It acts as not only design lead to inspire two citizen science case practices but also an evaluation term in the view of citizen science The framework and models developed in this research will hopefully be leveraged and refined to support citizen science design in the future

Finding the Expectations of Smart Home and Designing the Meaningful Technology for Delivering Customers Satisfaction Yaliang Chuang Lin Lin Chen Yu Shan Athena Chen Smart home is becoming a focus in both literature and product development practices The current study employed a human centered design approach to understand users desires and expectations from their living context Six critical themes were developed via in deep interviews field observations and data analysis They are housed as a supportive friend atmosphere generator theme songs for every moment coordinator and reminder life memory collector and routine builder for young generations Those concepts were partially integrated to define the value proposition for the target user group of parents with young children This guides the design ideation and video prototyping to illustrate the user experiences Through a focus group discussion the design concepts were validated with six potential customers The results also show that the design concept has the potential to motivate children s behaviors help to build their routine and has the flexibility to fulfill different needs toward the changes of the family s life cycle

Using Frame Analysis to Organize Designers Experience on the Cloud Julija Naskova This paper demonstrates how Goffman s frame analysis is applied in a research on designers experience with Cloud based digital tools At the base of Goffman s structure is the primary frame in this case designers experience with computer based digital tools These tools transition to the Cloud initiated by business are called fabrications Goffman s structural issues in fabrication such as retransformations and the nature of recontainment are also discussed through contemporary examples These fabrications are used or keyed by active agents from various design fields The data collected showed different levels of understanding of Cloud technology and the application of various tools in everyday design practices Thus the interviewees were clustered into three groups designers developers and artists Their experiences form the creative technology and experimental frame derived from keying of the primary frame Design researchers can selectively borrow elements from frame analysis complex structure to build an effective user experience

narrative Un intended Value Implications of Graphical Representations of Data Milena Radzikowska Stan Ruecker The design of meaningful graphical objects to represent collection items must balance the following amount of useful information that can be communicated through the object s graphical form meaningful graphical difference between individual items or groups of items and restraint in form complexity to allow for the simultaneous display of numerous collection items at a small size How the user interprets difference and sameness and more importantly whether the user attaches hierarchical value to the emergent categories may play a significant role in determining whether that user focuses attention on one set of data over another on one set of processes over another and ultimately on one set of tasks over another This paper examines the significant consequences for the understanding of the user resulting from representation of data files and other objects in a human computer interface HCI and proposes that new approaches may be indicated given the growing complexity of what is being represented and how what is represented can be used Mapping Communication Design through the Web Giulia De Rossi Paolo Ciuccarelli Design is by nature an interdisciplinary dynamic and fluid discipline To define what design is has proved to be a very difficult if not impossible and meaningless exercise making also the understanding of the evolution of both the design discipline and practice a complex challenge A rapidly changing technological landscape increases the breadth of design both in geographical terms and by extending to new domains merging with different and new disciplines Communication Design especially being closer to the information and the media spheres is the most sensitive and receptive design area Communication Design finds online a fertile ground for its growth and developments thus the online environment and the Web especially can be explored dug and mapped as mirrors of that evolution The aim of our research is to map through the Web the complexity of the intersections between design as a discipline and design as a field of practice Our exploration and representation of the online design territory covered four online environments Behance Wikipedia Google and the websites of the top 100 design universities The study has been conducted by using digital statistical and visualization methods This exploration seeks neither to confirm theories nor predict the future rather it wants to make explicit and observable what Communication Design has become today It aims to screenshot the state of the art the emerging paths in order to understand where and how it is going to develop The attempt is to make design as a complex phenomenon visible through the construction of a set of maps and representations for professors students and associations These representations are tools to trigger reflections on the discipline and the profession bringing a contribution to the experimental research in this field A Content Analysis of Wired Magazine and Self Tracking Devices Serefraz Akyaman Living in a modern society is becoming more complex so in order to keep up with a person should accomplish various kinds of task at once Daily life requirements obligations and the capacity of human memory lead us to collect and control our behaviors bodies and lives through self tracking devices Aim of this paper analysis of emerging digitalized self tracking trend through content analysis of Wired Magazine Wired Magazine both in printed and online monthly publish technology related articles how emerging

technologies affect culture the economy and politics It reaches more than 30 million people each month through wired com digital edition Since the term quantified self emerged for the first time in Wired Magazine for this reason Wired Magazine is one of the most important sources to be used for content analysis This present study carries out a content analysis of all the issues until December 2016 through self tracking and two other related terms quantified self and lifelogging The usage period and popularity of these terms and the relation network with the main topics and the subtopics are examined As a result it is possible to define Wired Magazine as a medium in which industry academia and users come together and feed each other reciprocally Wired Magazine has contributed significantly and continues to contribute to the development of the digitalized self tracking trend in terms of its content

Interaction Design and Use Innovation for Interactive Products

Geehyuck Jeong James Self Product use innovation is a means to facilitate the design driven innovation approach We explore how the mode of use concept may apply to state of the art product interactions to enhance user experience and provide opportunities for design driven innovation within the interactive product space To achieve this we apply taxonomy of interactions to classify interaction styles as along the two dimensions explanatory or exploratory and discrete or composite Adopting the research through design approach two interactive mood lamps were developed and expressed as high fidelity prototypes These were then used as stimuli to evaluate the influence of interaction style on product experience Results indicated the touch free magic interaction style an interaction providing explorative and composite modes of interaction was initially considered more innovative in terms of use However participants also expressed negative emotions related to dissatisfaction and embarrassment toward the touch free magic interaction due to an inability to intuitively understand the use functions Implications for the application of use innovation within the interactive product context are finally discussed

Study of the Implementability of Tactile Feedback While Operating Touch Panel Device From Two Directions of Efficacy and Feasibility Jien Wakasugi Masayoshi Kubo In a few years the number of apparatuses with touch panel displays like smartphones will increase People who are visually impaired hearing impaired and disabled can use tactile feedback for receiving incoming communications However opportunities for tactile feedback applications are limited Our hypotheses follow as there are haptics patterns suitable for use cases we will design haptics samples of tactile feedback and inspect their effectiveness This study focuses on haptics patterns showing a relationship between the user's impression and various use situations Previous studies have been insufficient so our target subjects inspected a limited number of objects This study consists of two inspections We collected various haptics patterns that users had defined and analyzed the first inspection For the next inspection we manufactured a smartphone prototype We matched the impression of eight haptics patterns types that we got from the subjects in the first analysis with different situations and tested various replies Tests were repeated and recorded for various situations As different haptics vibrations were added to e mails we inspected whether subjects could distinguish a difference in their meanings Thus we added different haptics patterns that corresponded to various situations

We concluded the hypothesis was effective for subjects We could inspect the hypotheses in relation to subjects impressions of the haptics pattern Additionally we obtained different results between elders and youths Consequently we suggested design guidelines for the new tactile feedback of the smartphone application We suspect that haptics will be possible for a variety of interactive designs Sensory Reflection toward Product Design Ideation Pratiksha Prabhakar Heekyoung Jung Vittoria Daiello As humans information processing abilities have become more and more disconnected from their senses due to an increasing quantity of abstract information so have design processes There is a demand for designers to include human sensation as part of engaging product forms and experiences This qualitative case study explores the role of senses and their potential use in design ideation A literature review of related theoretical and pragmatic perspectives and a survey of 15 20 product examples that provide unique sensory experiences are analyzed and sorted through four sensory design strategies Sensory Augmentation Conversion Transition and Isolation Using the four strategies as core concepts a Sensory Reflective Framework with a mindful focus on sensory appreciation and translation is proposed to support designers ideation in creating unique product forms and experiences The paper reports the process and findings of a sensory ideation workshop which was conducted based on the framework and further discusses the development and implications of the framework in supporting designers sensory ideation

**Say What You Think** Douglas Perkins,2015-03-18 How can we know what we think until we see what we say Articulating your thoughts is a way of clarifying them both to others and to yourself This English conversation textbook is divided into four parts Discussion Presentation Debate and Emotion Each part is composed of three chapters The textbook briefly touches on topics such as dangerous sports foreign countries epistemology and Shakespeare The overall goal is that students learn how to think and express their thoughts more clearly Critical thinking is not only a useful life skill but it s also engaging To the extent that students use their brains they will learn a great deal and simultaneously enjoy the experience

**Vision and Visual Perception** Duco A. Schreuder,2014-12-03 Vision is about insight and visual perception is about cognition and they form the foundation of how we see the world Duco A Schreuder a physicist and psychologist explores the finer details of each in this groundbreaking book that explores human consciousness and perception Sharing virtually everything he s learned over a varied career spanning more than sixty years he examines a wide array of topics including how we understand what we visually process how we store and retrieve information the role that neurons play in how what we see and much more While Schreuder isn t afraid to disagree with other leading thinkers he relies on science and focuses on the facts behind it so you can understand lighting visual perception engineering design and applied and experimental physics Looking is about insight whereas seeing is about knowledge and you need to know how each one works to truly understand how humanity views the world Whether you re an illuminating engineer considering the fundamentals of the trade or a student or professional in an allied discipline you ll be well served by taking a closer look at Vision and Visual Perception

### **Parallel Religious Revolutions in Britain in 1688 and Egypt in 2013** Thomas West, Sonia Alianak, 2022-05-11

Revolutionary periods like Britain underwent in 1642 1688 and Egypt experienced in 2011 2013 are characterized by idealistic goals So when and why did the idealistic goals of religious toleration and constitutional democracy in Britain and Egypt as introduced by their respective post revolutionary rulers James II and Mohamed Morsi lead to counter revolutions

Why did religion not stabilize regimes unlike Marx's palliative or Alianakis stabilization in times of crisis but instead led to revolutions and counter revolutions This book explores these questions and provides an explanation by introducing a theoretical construct of the presence of sectarian strains in both countries that magnified the unwitting perceived basic blunders of these new and inexperienced rulers and hence led to counter revolutions albeit with different end results a constitutional monarchy in Britain with the re-establishment of a secure Church of England and a return to a perceived non sectarian military rule an illiberal democracy in Egypt *Neo-Assyrian History - timing of chronology* Pekka

Mansikka,2024-09-19 A short presentation of how can timing to date the chronologies of the Near East using the Bible's chronology and solar eclipses Popularizing National Pasts Stefan Berger,Chris Lorenz,Billie Melman,2012-08-21

Popularizing National Pasts is the first truly cross national and comparative study of popular national histories their representations the meanings given to them and their uses which expands outside the confines of Western Europe and the US It draws a picture of popular histories which is European in the full sense of this term One of its fortes is the inclusion of Eastern Europe The cross national angle of Popularizing National Pasts is apparent in the scope of its comparative project as well as that of the *longue durée* it covers Apart from essays on Britain France and Germany the collection includes studies of popular histories in Scandinavia Eastern and Southern Europe notably Romania Bulgaria Croatia Armenia Russia and the Ukraine as well as considering the US and Argentina Cross national comparison is also a central concern of the thirteen case studies in the volume which are each devoted to comparing between two or more national historical cultures Thus temporality both continuities and breaks in popular notions of the past its interpretations and consumption is examined in the long continuum The volume makes available to English readers probably for the first time the cutting edge of Eastern

European scholarship on popular histories nationalism and culture **Eloquence of Effort** Indar Maharaj,2017-09-27 The *Eloquence of Effort* echoes the merits of conscientious toil It provides an insightful look into the benefits of sustained socio economic effort To convincingly argue that dreams are only achievable through mind numbing toil the writer draws heavily from biographical philosophical economic religious historical and scientific data Work is the mission the multiple rewards are the byproducts he argues Moreover the pleasure resides in the effort not the results Against the dark backdrop of malignancies inflicted on society by unrepentant leeches the benefit of conscientious work is sharply focused The reader is imperceptibly nudged into a higher plane of reality namely purposeful effort regardless of its nature is supremely rewarding The writer forces the realization that regardless of the outcome effort is never wasted Conversely indolence is the bane of progress and the root cause of economic crimes Indeed corruption in all its diabolical forms is nothing but laziness masquerading as diligence and embraced by vacuous minds craving the most for the least Analysis of biographical data sustains the thesis that industry prolongs life inaction truncates it a finding supported by the second Law of Thermodynamics The persuasiveness of the arguments is supported by a wealth of references Together they form the final authority they have

given resonance to the arguments contained herein      **Offshore Oil & Gas Rigs JOB INTERVIEW** Petrogav International Oil & Gas Training Center,2020-07-01 The job interview is probably the most important step you will take in your job search journey Because it s always important to be prepared to respond effectively to the questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a job in oil and gas industry Since these questions are so common hiring managers will expect you to be able to answer them smoothly and without hesitation This eBook contains 272 questions and answers for job interview and as a BONUS web addresses to 289 video movies for a better understanding of the technological process This course covers aspects like HSE Process Mechanical Electrical and Instrumentation Control that will enable you to apply for any position in the Oil and Gas Industry      Harnessed Mark Changizi,2011-08-02 The scientific consensus is that our ability to understand human speech has evolved over hundreds of thousands of years After all there are whole portions of the brain devoted to human speech We learn to understand speech before we can even walk and can seamlessly absorb enormous amounts of information simply by hearing it Surely we evolved this capability over thousands of generations Or did we Portions of the human brain are also devoted to reading Children learn to read at a very young age and can seamlessly absorb information even more quickly through reading than through hearing We know that we didn t evolve to read because reading is only a few thousand years old In Harnessed cognitive scientist Mark Changizi demonstrates that human speech has been very specifically designed to harness the sounds of nature sounds we ve evolved over millions of years to readily understand Long before humans evolved mammals have learned to interpret the sounds of nature to understand both threats and opportunities Our speech regardless of language is very clearly based on the sounds of nature Even more fascinating Changizi shows that music itself is based on natural sounds Music seemingly one of the most human of inventions is literally built on sounds and patterns of sound that have existed since the beginning of time From Library Journal Many scientists believe that the human brain s capacity for language is innate that the brain is actually hard wired for this higher level functionality But theoretical neurobiologist Changizi director of human cognition 2AI Labs The Vision Revolution brilliantly challenges this view claiming that language and music are neither innate nor instinctual to the brain but evolved culturally to take advantage of what the most ancient aspect of our brain does best process the sounds of nature it will certainly intrigue evolutionary biologists linguists and cultural anthropologists and is strongly recommended for libraries that have Changizi s previous book From Forbes In his latest book Harnessed neuroscientist Mark Changizi manages to accomplish the extraordinary he says something compellingly new about evolution Instead of tackling evolution from the usual position and become mired in the usual arguments he focuses on one aspect of the larger story so central to who we are it may very well overshadow all others except the origin of life itself communication
