

If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) or your state's Department of Transportation. NHTSA's job is to investigate complaints, to help solve problems, and to help you. If NHTSA agrees with you, it may issue a recall and remedy campaign. However, NHTSA cannot force a manufacturer to recall a vehicle. If you believe you have a problem with your vehicle, you may either call the Auto Safety Hotline toll-free at 1-800-424-9393 (or 366-3136 in the Washington, DC area) or write to: NHTSA, U.S. Department of Transportation, Washington, DC 20590. You can also obtain other information about motor vehicle safety from the hotline.

interest to today's owners and restorers we have combined the entire data from both manuals into a single publication. Please note that wherever the earlier data had been updated we have only included the latest update in order to prevent duplication of information. This combination manual includes alternator and generator testing and servicing instructions, spare parts illustrations and part numbers, plus Technical Data Sheets and Service Bulletins that provide additional information due to model updates and/or electronic equipment modifications. It also includes wiring diagrams by individual model type, including A J S Ariel B S A Dayton Dunkley Excelsior Francis Barnett James Matchless Norton Piatti Raleigh mopeds and Triumph. The entire content of this publication is devoted to the operation, testing, servicing, maintenance, overhaul and adjustment of all the major Wipac electrical components utilized by the various manufacturers listed above. Out of print and unavailable for many years, these manuals are extremely difficult to find on the secondary market and we are pleased to be able to offer this combined reproduction as a service to all owners, restorers and enthusiasts of 1950-1969 Wipac-equipped motorcycles, scooters and mopeds.
