William F Perrin Book:

Handbook of Marine Mammals Sam H. Ridgway, Richard John Harrison, 1998-09-23 Twenty three separate papers each describing a single species **Fisheries Review** ,1995 **National Union Catalog** ,1978 *Make It a Green Peace!* Frank Zelko, 2013-04-03 The emergence of Greenpeace in the late 1960s from a loose knit group of anti nuclear and anti whaling activists fundamentally changed the nature of environmentalism its purpose philosophy and tactics around the world And yet there has been no comprehensive objective history of Greenpeace s origins until now *Make It a Green Peace* draws upon meeting minutes internal correspondence manifestos philosophical writings and interviews with former members to offer the first full account of the origins of what has become the most recognizable environmental non governmental organization in the world Situating Greenpeace within the peace movement and counterculture of the 1960s Frank Zelko provides a much deeper treatment of the group s groundbreaking brand of radical media savvy direct action environmentalism than has been previously attempted Zelko traces the complex intellectual and cultural roots of Greenpeace to the various protest movements of the 1950s and 1960s highlighting the influence of Quakerism with its practice of bearing witness Native American spirituality and the non violent resistance of Gandhi Unlike the more strait laced less confrontational Sierra Club and Audubon Society early Greenpeacers smoked dope dropped acid wore their hair long and put their bodies on the line interposing themselves between the harpoons of whalers and the clubs of seal hunters to save the animals and achieve what they hoped would be a lasting transformation in the way humans regarded the natural world And while it may not have achieved its most revolutionary goals Greenpeace inarguably created a heightened awareness of environmental issues that endures to this day Narrating the key campaigns and arguments among the group s early members *Make It a Green Peace* vividly captures all the drama pathos and occasional moments of absurd comic relief of Greenpeace s tumultuous first decade **Federal Register** ,1988-05-17 **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1978 **Natural Things in Early Modern Worlds** Mackenzie Cooley, Anna Toledano, Duygu Yildirim, 2023-05-09 The essays and original visualizations collected in *Natural Things in Early Modern Worlds* explore the relationships among natural things ranging from pollen in a gust of wind to a carnivorous pitcher plant to a shell like skinned armadillo and the humans enthralled with them Episodes from 1500 to the early 1900s reveal connected histories across early modern worlds as natural things traveled across the Indian Ocean the Ottoman Empire Pacific islands Southeast Asia the Spanish Empire and Western Europe In distant worlds that were constantly changing with expanding networks of trade colonial aspirations and the rise of empiricism natural things obtained new meanings and became alienated from their origins Tracing the processes of their displacement each chapter starts with a piece of original artwork that relies on digital collage to pull image sources out of place and to represent meanings that natural things lost and remade Accessible and elegant *Natural Things* is the first study of its kind to combine original visualizations with the history of science Museum goers

scholars scientists and students will find new histories of nature and collecting within Its playful visuality will capture the imagination of non academic and academic readers alike while reminding us of the alienating capacity of the modern life sciences *Wildlife Review* ,1985 **Report of Activities** Southwest Fisheries Center (U.S.),1989 **Dolphin Societies** Karen Pryor,Kenneth S. Norris,1991 A survey of current dolphin research [The Future of Cetaceans in a Changing World](#) Wil Burns,Alexander Gillespie,2021-10-01 This volume consists of fifteen chapters by prominent authorities in the fields of cetacean law policy and science The overarching purpose of the book is to assess the challenges faced by cetacean species in the 21st century and the role of legal political and scientific institutions to meet these challenges The book also contains several chapters that address the abiding ethical questions dividing those who seek to continue to exploit cetaceans as resources and those who maintain that direct exploitation should be permanently banned on the grounds of sentience or intelligence Published under the Transnational Publishers imprint **Nature's Ghosts** Mark V. Barrow,2011-04-15 The rapid growth of the American environmental movement in recent decades obscures the fact that long before the first Earth Day and the passage of the Endangered Species Act naturalists and concerned citizens recognized and worried about the problem of human caused extinction As Mark V Barrow reveals in *Nature's Ghosts* the threat of species loss has haunted Americans since the early days of the republic From Thomas Jefferson's day when the fossil remains of such fantastic lost animals as the mastodon and the woolly mammoth were first reconstructed through the pioneering conservation efforts of early naturalists like John James Audubon and John Muir Barrow shows how Americans came to understand that it was not only possible for entire species to die out but that humans themselves could be responsible for their extinction With the destruction of the passenger pigeon and the precipitous decline of the bison professional scientists and wildlife enthusiasts alike began to understand that even very common species were not safe from the juggernaut of modern industrial society That realization spawned public education and legislative campaigns that laid the foundation for the modern environmental movement and the preservation of such iconic creatures as the bald eagle the California condor and the whooping crane A sweeping beautifully illustrated historical narrative that unites the fascinating stories of endangered animals and the dedicated individuals who have studied and struggled to protect them *Nature's Ghosts* offers an unprecedented view of what we've lost and a stark reminder of the hard work of preservation still ahead *Closing of the Frontier* John G Butcher,2003-08-01 This book is the first on the history of the marine fisheries of Southeast Asia It takes as its central theme the movement of fisheries into new fishing grounds particularly the diverse ecosystems that make up the seas of Southeast Asia This process accelerated between the 1950s and 1970s in what the author calls the great fish race Catches soared as the population of the region grew demand from Japan and North America for shrimps and tuna increased and fishers adopted more efficient ways of locating catching and preserving fish But the great fish race soon brought about the severe depletion of one fish population after another while pollution and the destruction of mangroves and coral reefs degraded fish habitats

Today the relentless movement into new fishing grounds has come to an end for there are no new fishing grounds to exploit. The frontier of fisheries has closed. The challenge now is to exploit the seas in ways that preserve the diversity of marine life while providing the people of the region with a source of food long into the future. **Transcript of the Enrollment Books** New York (N.Y.). Board of Elections, 1937. *Dolphin Confidential* Maddalena Bearzi, 2012. Discusses the life of a marine scientist and offers firsthand accounts of dolphin behavior including addressing conservation and environmental concerns.

Collected Reprints Southwest Fisheries Center (U.S.), 1985. **Mammals** Devra G. Kleimann, 2004. Books in Series, 1985. Vols. for 1980 issued in three parts. **American Scientist**, 1942.
