Visual Diagnosis and Care of the Patient with Special Needs Taub, Mary Bartuccio, Dominick M. Maino, 2012 Visual Diagnosis and Care of the Patient with Special Needs provides a thorough review of the eye and vision care needs of patients with special needs This book gives you a better understanding of the most frequently encountered developmental and acquired disabilities seen in the eye care practitioner's office These disabilities include patients with autism brain injury Fragile X syndrome and Down syndrome as well as those with psychiatric illness dual diagnosis and more The text discusses in great detail the visual issues inherent in these populations and their possible treatment A group of authors with approximately 500 years of experience in the field of eye care and special populations have been brought together to develop this comprehensive reference It may appear that this book is written primarily for eye care practitioners such as optometrists and ophthalmologists while vision is the overriding topic this book serves as an excellent resource for a multitude of professions including those engaged in occupational therapy physical therapy speech and language therapy physiatry social work pediatric medicine and special education

Hands On, Minds On Claire E. Cameron, 2018 A growing body of research indicates that three foundational cognitive skills executive function motor skills and spatial skills form the basis for children to make a strong academic behavioral and social transition to formal school Given inequitable early learning environments or opportunity gaps in the United States these skills are also a source of substantial achievement and behavioral gaps Hands On Minds On describes the importance of children's foundational cognitive skills for academic achievement in literacy and mathematics as well as their connections with other areas of school readiness including physical health social and emotional development and approaches to learning The author emphasizes how social relationships and interactions both in and outside the classroom encourage or constrain young children's development in these skills The book concludes with a summary of the growing evidence in favor of guided object play which teachers can introduce to children to exercise and strengthen foundational cognitive skills Teachers both novice and veteran are eager to learn how to apply brain research to their practice and Dr Cameron has offered some very real knowledge and support to this effort From the Foreword by Sharon Ritchie FPG Child Development Institute Research has accelerated in the last decade and Hands On

Minds On deftly summarizes and integrates these exciting advances This is a must read for educators and policymakers
Daniel T Willingham University of Virginia Offers educators an entry point into what developmental research is telling us
about early childhood and how best to support our youngest learners Nora S Newcombe Temple University **A Review of
Assessment Instruments and Procedures for Young Exceptional Children** Lynn Zentner,1980 Pediatric
Neuropsychological Intervention Scott J. Hunter,Jacobus Donders,2007-05-03 Pediatric neuropsychology is the practice of
understanding and elucidating brain behavior relationships as applied to children and adolescents This 2007 volume
examines trends in the assessment and treatment of common disorders including traumatic brain injuries brain tumors
epilepsy and autistic spectrum disorders Its primary aim is to help practitioners and researchers identify and understand the
evidence to support interventions with a range of acquired or congenital neuropsychological disorders The text is divided into
three sections Section one provides a foundation by considering general issues relevant to assessment and treatment in
pediatric neuropsychology Section two guides practitioners in their approach to the use of interventions in a range of
conditions and disorders and the book closes with a section focusing on medical and experimental initiatives with an
emphasis on interdisciplinary issues This book is essential reading for pediatric neuropsychologists child clinical
psychologists and school psychologists as well as pediatric neurologists and psychiatrists
