*VMware Implementation with IBM System Storage DS5000* Sangam Racherla, Diego Silva Cogo, Mario David Ganem, Hartmut Lonzer, Minja Obradovic, Gabriel Requejo, IBM Redbooks, 2013-06-14

In this IBM Redbooks publication, we compiled best practices for planning, designing, implementing, and maintaining IBM Midrange Storage Solutions. In this publication, we use IBM System Storage DS5000 storage subsystem for the implementation procedures, and the same procedures can be used for implementations with DCS3700 or DS3500 storage subsystems. We also compiled configurations for a VMware ESX and VMware ESXi Server host environment. Setting up an IBM Midrange Storage Subsystem is a challenging task. Our principal objective in this book is to provide you with a sufficient overview to effectively enable storage area network (SAN) storage and VMware. There is no single configuration that is satisfactory for every application or situation. However, the effectiveness of the VMware implementation is enabled by careful planning and consideration. Although the compilation of this publication is derived from an actual setup and verification, we did not stress test or test for all possible use cases that are used in a limited configuration assessment. Because of the highly customizable nature of a VMware ESXi host environment, you must consider your specific environment and equipment to

achieve optimal performance from an IBM Midrange Storage Subsystem When you are weighing the recommendations in this publication you must start with the first principles of input output I O performance tuning Each environment is unique and the correct settings that are used depend on the specific goals configurations and demands for the specific environment This publication is intended for technical professionals who want to deploy VMware ESXi and VMware ESX Servers with IBM Midrange Storage Subsystems *IBM FlashSystem and VMware Implementation and Best Practices Guide* Vasfi Gucer, Duane Bolland, Nezh Boyacioglu, Jordan Fincher, David Green, Warren Hawkins, Ibrahim Alade Rufai, Leandro Torolho, IBM Redbooks, 2022-10-26 This IBM Redbooks publication details the configuration and best practices for using the IBM FlashSystem family of storage products within a VMware environment The first version of this book was published in 2021 and specifically addressed IBM Spectrum Virtualize Version 8.4 with VMware vSphere 7.0 This second version of this book includes all the enhancements that are available with IBM Spectrum Virtualize 8.5 Topics illustrate planning configuring operations and preferred practices that include integration of IBM FlashSystem storage systems with the VMware vCloud suite of applications VMware vSphere Web Client vWC vSphere Storage APIs Storage Awareness VASA vSphere Storage APIs Array Integration VAAI VMware Site Recovery Manager SRM VMware vSphere Metro Storage Cluster vMSC Embedded VASA Provider for VMware vSphere Virtual Volumes vVols This book is intended for presales consulting engineers sales engineers and IBM clients who want to deploy IBM FlashSystem storage systems in virtualized data centers that are based on VMware vSphere **NetApp and VMware View Solution Guide** Chris Gebhardt, Abhinav Joshi,
