Tswane University Of Technology New Application 2016:

New Models for Technical and Vocational Education and Training Makgato, Moses, Afeti, George, 2020-12-18

Technical and vocational education and training at technical schools are major contributing factors in combating poverty unemployment and inequality. The primary purpose of technical and vocational education and training is to prepare students and learners for the world of work and for a smooth transition from education institutions into the workplace. As the Fourth Industrial Revolution continues to create more radical changes in the labor market, experts are calling for a reform of education including vocational education and training and adult and professional education. **New Models for Technical and Vocational Education and Training** is an essential scholarly research book that examines TVET and CET colleges and programs that provide intermediate skills to enhance students' chances of employability and entrepreneurship in Industry 4.0. The book explores knowledge in respect to workforce preparation, digital skills development, teaching and learning of TVET, flexibility and articulation of TVET to respond to work, integrated learning and reskilling and upskilling to avoid skill mismatches. It is ideal for TVET schools, academicians, curriculum designers, managers, training officers, administrators, vocational professionals, researchers, and students.

Higher Education Pathways Ashwin, Paul, Case, Jennifer M., 2018-12-14

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public as well as private benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

Innovations in online teaching and learning Judah P. Makonye, Nokulunga S. Ndlovu, 2023-03-01

This book's research is on online pedagogical approaches devised by teacher educators and researchers to circumvent a face-to-face curriculum delivery during the COVID-19 pandemic. The challenge faced by educators was that they were uncertain of how to use digital technologies in teaching, learning, and assessment productively. This book reports on case studies on teaching student teachers with technology in a way that advanced not only communication but also the cognitive growth of students in relation to disciplinary knowledge. The scholars from South African universities used both conceptual and empirical methodologies, mostly in qualitative set-ups. The scholarly contributions in this book are varied. They cover theoretical nuances for ICT use in education, considerations for the use of computers in the classroom, pedagogical thinking, and pedagogical integration of ICTs.

in education affordances of iPads in visible teaching and learning supporting student cognition in Languages Mathematics Science Engineering Graphics and Design with ICTs The use of software applications such as GeoGebra and Excel in teaching and learning mathematics is researched among others The rich discussions that emerged from their research enable academics to learn from others innovative moments that came as a result of pandemic pressure The recommendations in this book can be used in blended learning beyond the COVID 19 era as curriculum delivery methods are bound to change The value of this book is that it reports on pedagogical innovations in using digital technologies in teacher education Researchers have an opportunity to learn from this book how to deal with the tantalising teaching and learning problem of our time How can the use of digital technology transform teaching and learning in general and teacher education in particular South African Computer Science and Information Systems Research Trends Aurna Gerber,2024-07-07 This book contains a selection of the best papers of the 45th Annual Conference SAICSIT 2024 held in Gqeberha South Africa in July 2024 The 26 full papers included in this book were carefully reviewed and selected from 81 submissions They focus on the transforming relationship between humans and machines This year s theme is Human Machine Digital Convergence

Global Education in Bioethics Henk ten Have, 2018-06-14

This book presents and elaborates on how the teaching of global ethics in healthcare contributes to furthering ideals of cosmopolitanism solidarity equality respect for differences and concern with what human beings and specifically patients have in common regardless of where they live and who they are Global problems such as pandemic diseases disasters lack of care and medication homelessness and displacement call for global responses The new area of global bioethics is providing answers by arguing that ethical discourse should first of all criticize the structures of violence and injustice that underlie many threats to global health Education of health professionals should articulate that they are citizens of the world like their patients This book first demonstrates that a moral vision of global education is necessary to gain a global dimension It is argued that a global framework of ethical principles is available the challenge is to elaborate

and specify that framework into specific educational approaches and models The book subsequently analyzes goals and challenges of global education in biomedicine and healthcare It is shown how such challenges e g inequities and cultural differences can be overcome Finally the book presents concrete examples cases methods and practices of global education in bioethics The unique feature of the book is that it addresses global education challenges specifically in the area of healthcare medicine and medical science It combines two areas of research and experience that are usually not connected global bioethics and global education This book is written for all those involved in global ethics teaching in medicine nursing ethics philosophy law and theology courses
