That is why I have designed this training program to help you develop skills by teaching you PLC hardware configuration and programming step by step. This will give you a big head start if you have never installed or configured a PLC before. One of the questions I get asked often by a novice is where can I get a free download of RSLogix 500 to practice. I provide in this volume links to a free version of the RSLogix Micro Starter Lite which provides essentially the same programming environment as the RSLogix 500 Pro and a free version of the RSLogix Emulate 500. I also provide links to download the training edition of RSLogix 5000 Studio 5000 Logix Designer to your system. First ensure you create an account at RockwellAutomation.com. Once you have done that you don't even need to have a full blown PLC to learn run and test your ladder logic programs. In addition to showing you how to get these important Rockwell Automation software for free and without hassle I also demonstrate with HD training videos how to install, configure, navigate and use them to write ladder logic programs. Finally help support staff are available 24/7 to help you. So if you have questions or need further help use the support link provided for this training. The support staff will get back to you very quickly.

Automation with Programmable Logic Controllers Peter Rohner, 1996. Facilitates a thorough understanding of the fundamental principles and elements of automated machine control systems.
