Kawasaki - The Green Machine Matthew Richardson, 2025-11-30 Kawasaki eager to grab their own slice of the glory was the last of the major Japanese manufacturers to enter the high octane world of Grand Prix motorcycle racing Although the company had a long history of engineering innovation it adopted motorcycles relatively late in the day However Kawasaki did more than simply copy what the other Far Eastern firms were producing and struck out on their own with some truly innovative designs These were machines which are still regarded as classics today This then is the story of how a previously little known Japanese conglomerate became a household name in the West through its trailblazing motorcycles which were larger and faster than anything that their rivals had at that time Kawasaki chose to showcase their machinery in the Isle of Man at the world famous TT races and in the 1970s the era of big hair big flares and even bigger engines they ripped up the record book time after time The so called Green Meanies became part of TT folklore and the era of Kawasaki dominance was to be one of the most exciting in the history of the event *Japanese Production Racing Motorcycles* Mick Walker, 2004-09-02 As this book explains the Japanese did not suddenly become proficient in the design and development of motorcycles when they first appeared in Europe at the end of the 1950s Instead the Japanese had been involved with motorcycles since the beginning of the 20th century True early Japanese motorcycles copied Western design a trend that continued for several years after WWII But soon they designed a succession of highly innovative machinery not only to the Grand Prix world's benefit but to the paying over the counter customer too Honda Kawasaki Suzuki and Yamaha plus Bridgestone and Tohatsu have all built and sold racing motorcycles which the public could also buy and enjoy
