

**Figure 5.1.** Lever up directs the light path to the CCD camera.

**Figure 5.2.** Lever down directs the light path to the eyepiece.

## Using the Imaging Flip Mirror

Keep the flip mirror lever in the "up" position (Figure 5.1) to let the telescope focus on the camera. Flip the mirror to the "down" position to let the telescope focus on the eyepiece (Figure 5.2).

With the flip mirror lever in the "up" position, focus your CCD camera using your telescope's focuser. Then, flip the mirror to the "down" position to switch the light path to your eyepiece. Focus the eyepiece using the helical focus mechanism, making sure not to disrupt the telescope's focus. When your eyepiece is focused, lock the helical focus mechanism by tightening the focus lock thumbscrew.

## Other Adjustments

The flip mirror lever tension and stop angle are factory set. However, if needed, adjustments can be made to change the lever tension and stop angle.

### Adjusting the Lever Tension

Locate the two silver socket head set screws (one on each side) located above the lever (Figure 6).

Using the provided 1.5mm hex key, loosen or tighten the set screws as needed to reach the desired lever tension.

### Adjusting the Flip Mirror Stop Angle

Check if any adjustment is necessary first. The Imaging Flip Mirror stop angle is factory-set and typically does not require adjustment. Center the image subject in your CCD camera. Then flip the mirror down to bring the light path to the eyepiece. The subject should be centered in the eyepiece. If the subject is not centered in the eyepiece as it was in the CCD camera, you need to adjust the mirror stop angle.

To adjust the flip mirror stop angle:

1. Locate the socket head set screw on the bottom of the flip mirror body (Figure 7).
2. If the subject is above the center of the field of view (when facing the rear of the flip mirror), turn the set screw clockwise

**Figure 6.** (above) The two silver socket head screws located above the lever adjust the lever tension.

**Figure 7.** (right) The socket head set screw located beneath the flip mirror body adjusts the mirror stop angle.

(using the provided 2.5mm hex key). If the subject is below the center of the field of view, turn the set screw counter-clockwise.

3. Check your adjustment by comparing the CCD camera view with the eyepiece view. The subject should be centered in both views.

## Care and Storage

The mirror surface should only be cleaned on a minimal bases. Small dust particles will not effect the optical performance. You can occasionally remove dust with compressed air or a blower bulb. If you need to clean the mirror surface, first unthread the 1.25" eyepiece holder from the flip mirror body to allow easy access to the mirror. Use a cotton Q-tip with a drop of isopropyl alcohol or lens cleaning solution. Lightly drag the Q-tip across the surface of the mirror. Replace the Q-tip frequently while cleaning to ensure you do not smear particles across the mirror. Use caution, as scratching or stripping the delicate aluminum surface can easily occur.

To avoid excessive dust buildup, be sure to attach the dust caps prior to storing, and use a foam-lined accessory case. The foam-lined box your Imaging Flip Mirror arrives in also acts as a convenient storage container. Store in a dry place away from direct sunlight.

*Choosing and Using a Dobsonian Telescope* Neil English, 2011-07-25 In the 1960 s American amateur astronomer John Dobson designed a revolutionary kind of astronomical telescope featuring a lightweight large aperture reflecting system on a simple mounting using the then revolutionary material called teflon The design combines simplicity and portability with large aperture prowess Thirty years later Dobsonians remain supreme for visually observing faint deep sky objects and are one of the best selling large telescopes in the USA and Europe This popularity is reflected in the recent increase of companies now heavily marketing Dobsonians in particular Meade the Lightbridge range Orion USA XT Intelliscope series and Skywatcher Skyliner and Flextube models This book is the ultimate guide to buying and using commercial Dobsonians both Econo and Primo models with in depth accounts for the various models plus accessories on the market and descriptions of the many innovations that amateurs have made to optimize their telescopes performance **Using Commercial Amateur**
