data **Refining Design for Business** Michael Krypel, 2014-03-23 Innovation and technology have forever changed what it means to be a business. Some businesses now exist only online; increasingly, companies are being built with new technologies that require new skills, and customers are routinely accessing businesses via interactive visual and audio experiences through web pages or apps, computers and mobile devices. These experiences are based on design, which has never been so important to the business world. Customers interact with designs by looking, clicking, typing, listening, speaking to, and touching them. These interactions largely occur where and when the customer chooses: alone on the couch at home, at work, at social events while traveling on an airplane, and elsewhere. When people say they read an article, bought a friend a gift, watched a video, or booked a hotel, they're talking about engaging with businesses by interacting with their designs. No matter how great a business idea is or what technology it relies on behind the scenes, a company needs to express itself visually in a way customers will understand and be able to interact with easily in order to be successful. The number of ways to translate an idea into a design is infinite, but which designs will also drive customer value? Michael Krypel's *Refining Design for Business* answers this key question, showing you how to build a successful online business by creating engaging and measurable customer experiences. In this book, you will learn how to: Change the standard design process most companies follow to enhance accountability for generating business and customer value while creating new opportunities for collaboration and innovation; Understand customer goals and build a strategic marketing plan to continually realign the business around them; Use A/B testing and segmentation strategies to personalize experiences across a business; Develop new approaches through visual business cases that show how different companies have solved problems, including before and after examples of what the online businesses themselves actually looked like. Natural Language Processing: Python and NLTK Nitin Hardeniya, Jacob Perkins, Deepti Chopra, Nisheeth Joshi, Iti Mathur, 2016-11-22 Learn to build expert NLP and machine learning projects using NLTK and other Python libraries. About This Book Break text down into its component parts for spelling correction, feature extraction, and phrase transformation. Work through NLP concepts with simple and easy-to-follow programming recipes. Gain insights into the current and budding research topics of NLP. Who This Book Is For If you are an NLP or machine learning enthusiast and an intermediate Python programmer who wants to quickly master NLTK for natural language processing, then this Learning Path will do you a lot of good. Students of linguistics and semantic sentiment analysis professionals will find it invaluable. What You Will Learn The scope of natural language complexity and how they are processed by machines. Clean and wrangle text using tokenization and chunking to help you process data better. Tokenize text into sentences and sentences into words. Classify text and perform sentiment analysis. Implement string matching algorithms and normalization techniques. Understand and implement the concepts of information retrieval and text summarization. Find out how to implement various NLP tasks in Python. In Detail Natural Language Processing is a field of computational linguistics and artificial intelligence that deals with human-computer interaction. It provides a seamless interaction between

computers and human beings and gives computers the ability to understand human speech with the help of machine learning. The number of human computer interaction instances are increasing so it is becoming imperative that computers comprehend all major natural languages. The first NLTK Essentials module is an introduction on how to build systems around NLP with a focus on how to create a customized tokenizer and parser from scratch. You will learn essential concepts of NLP, be given practical insight into open source tools and libraries available in Python, shown how to analyze social media sites and be given tools to deal with large scale text. This module also provides a workaround using some of the amazing capabilities of Python libraries such as NLTK, scikit-learn, pandas and NumPy. The second Python 3 Text Processing with NLTK 3 Cookbook module teaches you the essential techniques of text and language processing with simple straightforward examples. This includes organizing text corpora, creating your own custom corpus, text classification with a focus on sentiment analysis and distributed text processing methods. The third Mastering Natural Language Processing with Python module will help you become an expert and assist you in creating your own NLP projects using NLTK. You will be guided through model development with machine learning tools, shown how to create training data and given insight into the best practices for designing and building NLP based applications using Python. This Learning Path combines some of the best that Packt has to offer in one complete curated package and is designed to help you quickly learn text processing with Python and NLTK. It includes content from the following Packt products: NLTK essentials by Nitin Hardeniya, Python 3 Text Processing with NLTK 3 Cookbook by Jacob Perkins, Mastering Natural Language Processing with Python by Deepti Chopra, Nisheeth Joshi and Iti Mathur. Style and approach: This comprehensive course creates a smooth learning path that teaches you how to get started with Natural Language Processing using Python and NLTK. You will learn to create effective NLP and machine learning projects using Python and NLTK.
