Dottolo,Carol Dottolo,2018-03-02 This book is about Italian American women food identity and our stories at the table This mother daughter research team explores how Italian American working class women from Syracuse New York use food as a symbol and vehicle which carries multiple meanings In these narratives food represents home loss and longing Food also stands in for race class gender sexuality immigration region place and space The authors highlight how food is about family and tradition as well as choice and change These women s narratives reveal that food is related to celebration love power

and shame As this study centers on the intergenerational transmission of culture the authors relationship mirrors these questions as they contend with their similar and disparate experiences and relationships with Italian American identity and food The authors use the recipe as a conversational bridge to elicit narratives about identity and the self They also encourage readers to listen closely to the stories at their own tables to consider how recipes and food are a way for us to claim who we are who we think we are who we want to be and who we are not

Foodscapes, Foodfields, and Identities in Yucatán Steffan Igor Ayora Díaz, 2012 The state of Yucatán has its own distinct culinary tradition and local people are constantly thinking and talking about food They use it as a vehicle for social relations but also to distinguish themselves from Mexicans This book examines the politics surrounding regional cuisine as the author argues that Yucatecan gastronomy has been created and promoted in an effort to affirm the identity of a regional people and to oppose the hegemonic force of central Mexican cultural icons and forms In particular Yucatecan gastronomy counters the homogenizing drive of a national cuisine based on dominant central Mexican appetencies and defies the image of Mexican national cuisine as rooted in indigenous traditions Drawing on post structural and postcolonial theory the author proposes that Yucatecan gastronomy having successfully gained a reputation as distinct and distant from Mexican cuisine is a bifurcation from regional culinary practices However the author warns this leads to a double paradoxical situation that divides the nation while a national cuisine attempts to silence regional cultural diversity the fissures in the project of a homogeneous regional identity are revealed
