Cross,2012-12-03 Do these comments sound familiar We would love to be more innovative but we don t have the resources

Innovation works in some companies we just aren't that creative. We get some good ideas but nothing ever happens with them. Unfortunately, they reflect the general perception and environment for innovation in many firms today. In *Lean Innovation: Understanding What's Next in Today's Economy*, Barry Cross explores how to use Lean to free up resources from within the organization to support and fund innovation and inspire a culture of creativity. Easy to read and humorous, Cross's stories resonate and his tactics are very applicable. He demonstrates that you likely have the people needed to drive innovation. Based on Cross's twenty-five years of experience and filled with stories and anecdotes from a number of industries, the book presents a different look at innovation and how to recognize opportunities for moving past merely talking about innovation to action and making it a priority. The author examines roadblocks and how to use enablers like Lean to facilitate and focus the approach on driving the focus forward to the place where creativity in our ranks is more important than responding to an email and where the organization isn't afraid to make an existing product redundant in favor of a new opportunity.

For the Grace of Joe Vickie Morgan, Josh Morgan, 2018-02-18 Vickie Morgan and her partner Josh had a wonderful relationship and were simply enjoying life with their son when they found out they were expecting again. Things were near about perfect and with an impending visitor coming in from North Carolina, Vickie scheduled her 20-week ultrasound a little early so they could have some privacy from her mother-in-law. The scan showed a list of abnormalities and doctors at Maternal Fetal Medicine in Portland, Maine, swarmed the room suggesting medical termination. Vickie asked the gender of the baby so she could at least pick a name for the baby; they wanted her to say goodbye to the gender could not be determined so early and the couple assumed they were having a girl and picked the name Grace. Vickie had often seen families with children who had special needs and said, "there but for the Grace of God go I" and apparently hers had run out. After a non-invasive prenatal testing called the MaterniT21, Josh and Vickie found out they were in fact having a boy who had Trisomy 13, which shows up approximately 1 in 10,000 babies. The strain on their marriage and their relationships with family and friends reached a breaking point over and over again. Navigating medical opinions and the stigma around children and people with special needs was at times too much to comprehend. This story, cowritten by Vickie and Josh Morgan, is one of hope and healing, pain and recovery. It explores the fractured relationships and brutal reality that expectant parents face when making life-altering decisions that are often misunderstood and sometimes not supported by loved ones. It's a prenatal guide that goes so far beyond *What to Expect When You're Expecting*. It's one brave couple's account of how they handled challenges they never could have imagined.
