Manspeizer,2015-08-26 Extensive field studies on the African and North American plates during this past decade have yielded a wealth of new data and ideas about rift basins and the origin of passive margins New surface and subsurface basins have been identified fossils abound in strata that only recently were considered barren oil exploration is being actively pursued in continental strata of the Richmond Taylorsville Sanford and Newark basins Late Triassic marine strata have been identified in Georges Bank off the coast of Massachusetts and the roles of wrench tectonics successor basins and listric normal faults have challenged the classical view that these are simple extensional basins This two part work brings together representative examples of these studies It is not intended as an exhaustive synthesis of the subject but rather a vehicle to present new data new ideas and alternative views Some of the papers present regional summaries others attempt to relate local features to regional questions while others describe modern rift basins as possible analogs of early Mesozoic basins Geologic data from the Atlantic passive margins record that continental rifting of central Pangaea occurred during the latest Triassic earliest Jurassic Liassic and that sea floor spreading probably began no later than the Middle Jurassic The primary subject of this book focuses on the Triassic Jurassic rifting events that led to the breakup of Pangaea and the opening of the central Atlantic Ocean Whereas other treatises have focused on the origin of the passive margins inferred primarily from geophysical data of the offshore basins this volume primarily and uniquely focuses on land based field studies of the onshore synrift basins Offshore studies of

synrift basins are also included and add substantially to our understanding of the breakup. However, the onshore data base while complementary is different, thus providing researchers with a different insight to the questions at hand. The book is organized into four sections. Section I, Pangaea in Time and Space, first locates Pangaea in space and then places the Triassic basins within an historical context on the Alleghanian Variscan Orogens. Section 2, the offshore and onshore basins of the North American and African Plates, comprises about 70% of all papers in this book and includes papers on structural geology, petrology, paleontology, sedimentation, organic geochemistry, vulcanism, and mineral resources. Section 3, Related Mesozoic Atlantic Rift Basins, includes papers on Iberia, Western Europe, the Benue Trough, and Brazil. The final section of the book, Analogs, includes the rift basins of East Africa, the Red Sea, the Gulf of Elat, Aqaba, the Dead Sea, and the Rio Grande. The book is richly illustrated throughout with figures, photographs, tables, and fold-out maps, including nine in full colour.

**Conference** Ramin Homayouni, Huixiao Hong, Prashanti Manda, Bindu Nanduri, Inimary Toby, 2022-07-07 *Key Issues in Petroleum Geology* F. John Gregory, Philip Copestake, Julian M. Pearce, 2007 This volume contains a compilation of 17 seminal papers taken from various Geological Society Special Publications and the Journal of the Geological Society on the use and application of stratigraphy in petroleum geology over the last 20 years. The volume focuses on case studies in fundamental stratigraphy, applied and integrated stratigraphy, and alternative methods of stratigraphy. The book is introduced with an original scientific and historical review of the subject; all papers are set in context with both the benefits of the techniques and some of the shortcomings highlighted. By compiling these papers, commercial stratigraphers John Gregory, Philip Copestake, and Julian Pearce have created a volume intended for a wide readership. However, it is of particular relevance for the training of undergraduate students studying courses on petroleum geology, basin development, and sequence stratigraphy, as well as for all postgraduate students working in petroleum-related scientific fields. It is also intended as a volume of general use for geoscientists entering the petroleum industry, as well as current workers requiring an overview.
