Economic Analysis of Markets and Games Partha Dasgupta, 1992 These original essays focus on a wide range of topics related to Frank Hahn's distinguished work in economics Ranging from market analysis and game theory to the microeconomic foundations of macroeconomics and from equilibrium and optimality with missing markets to economics and society they reflect the diversity of modern research in economic theory What distinguishes Hahn's work and many of the essays in this book is that the motivation often comes from practical concerns about unemployment savings and investment poverty or the stability of markets The essays in Part I deal with the microeconomic foundations of macroeconomics a field in which Hahn has made important contributions most notably in the theory of monetary economics Topics include an evaluation of Hahn's contribution to the theory of distribution and such macroeconomic themes as coordination failure multiple equilibria and strategic issues Part II contains recent contributions to game theory reflecting Hahn's interest in the question of what is rational behavior The essays in Part III concentrate on general equilibrium theory with missing markets a field in which Hahn has made major advances Although the essays address a different set of issues they share with Hahn's works such themes as market failure indeterminacy of equilibrium and the role of money Partha Dasgupta is Professor of Economics at Cambridge University Douglas Gale is Professor of Economics at Boston University Oliver Hart is Professor of Economics at the Massachusetts Institute of Technology Eric Maskin is Professor of Economics at Harvard University Trajectories in Architecture Michael Jasper, 2023-04-21 *Trajectories in Architecture* Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories These three trajectories the plan as conceptual device a logic of sensation and temporalities serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work revealing architectural conditions and consequent spatial effects little explored to date *Trajectories in Architecture* adds to scholarship and expands our understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture's recent past as a contribution to identifying future possibilities In so doing the book argues for the still latent

potential in modern architecture's traditions and design principles and their future expression Trajectories in Architecture includes analysis of significant projects of Le Corbusier Peter Eisenman Zaha Hadid John Hejduk Louis I Kahn and I M Pei
