With Honors Grace Wen, Success in life takes more than straight A s Melinda is an honors engineering student with a secret she has cheated on every lab assignment since her junior year As graduation day approaches she realizes she can t keep trying to be someone she s not Can she find a way to live her truth This story was previously published in 2012

Scientific and Technical Aerospace Reports ,1995 *Performance Modeling for Computer Architects* C. M. Krishna,1995-10-14 As computers become more complex the number and complexity of the tasks facing the computer architect have increased Computer performance often depends in complex way on the design parameters and intuition that must be supplemented by performance studies to enhance design productivity This book introduces computer architects to computer system performance models and shows how they are relatively simple inexpensive to implement and sufficiently accurate for most purposes It discusses the development of performance models based on queuing theory and probability The text also shows how they are used to provide quick approximate calculations to indicate basic performance tradeoffs and narrow the range of parameters to consider when determining system configurations It illustrates how performance models can demonstrate how a memory system is to be configured what the cache structure should be and what incremental changes in cache size can have on the miss rate A particularly deep knowledge of probability theory or any other mathematical field to understand the papers in this volume is not required **Technical Reports Awareness Circular :**
