Volition's Face Andrew Escobedo, 2017-04-30 Modern readers and writers find it natural to contrast the agency of realistic fictional characters to the constrained range of action typical of literary personifications Yet no commentator before the eighteenth century suggests that prosopopoeia signals a form of reduced agency Andrew Escobedo argues that premodern writers including Spenser Marlowe and Milton understood personification as a literary expression of will an essentially energetic figure that depicted passion or concept transforming into action As the will emerged as an isolatable faculty in the Christian Middle Ages it was seen not only as the instrument of human agency but also as perversely independent of other human capacities for example intellect and moral character Renaissance accounts of the will conceived of volition both as the means to self creation and the faculty by which we lose control of ourselves After offering a brief history of the will that isolates the distinctive features of the faculty in medieval and Renaissance thought Escobedo makes his case through an examination of several personified figures in Renaissance literature Conscience in the Tudor interludes Despair in Doctor Faustus and book I of The Faerie Queen Love in books III and IV of The Faerie Queen and Sin in Paradise Lost These examples demonstrate that literary personification did not amount to a dim reflection of realistic fictional character but rather that it provided a literary means to explore the numerous conundrums posed by the premodern notion of the human will This book will be of great interest to faculty and graduate students interested in medieval studies and Renaissance literature

This-Worldly Nibbāna Hsiao-Lan Hu, 2011-12-01 Offering a feminist analysis of foundational Buddhist texts along with a Buddhist approach to social issues in a globalized world Hsiao Lan Hu revitalizes Buddhist social ethics for contemporary times Hu's feminist exegesis references the Nikāyas from the Discourse Basket of the Pāli Canon These texts among the earliest in the Buddhist canon are considered to contain the sayings of the Buddha and his disciples and are recognized by all Buddhist schools At the heart of the ethics that emerges is the Buddhist notion of interdependent co arising which addresses the sexism classism and frequent overemphasis on individual liberation as opposed to communal well being for which Buddhism has been criticized Hu notes the Buddha's challenge to social hierarchies during his life and compares the notion of non Self to the poststructuralist feminist rejection of the autonomous subject maintaining that neither dissolves moral responsibility or agency Notions of kamma nibbāna and dukkha suffering are discussed within the communal context offered by insights from interdependent co arising and the Noble Eightfold Path This work uniquely bridges the worlds of Buddhism feminism social ethics and activism and will be of interest to scholars students and readers in all of these areas

The Volitional Theory of Causation W. J. Mander, 2023 This work traces the development of a philosophical theory about causality the volitional theory of causation which supposes the underlying nature of causation as something revealed to us in the experience of our own will It offers both a history of philosophy and a chance to think about the complex puzzles of both

causation and human will Reading the Buddha's Discourses in Pali Bhikkhu Bodhi, 2020-12-08 Renowned scholar monk and bestselling translator Bhikkhu Bodhi's definitive practical guide on how to read ancient Buddhist texts in the original language Bhikkhu Bodhi's sophisticated and practical instructions on how to read the Pali of the Buddha's discourses will acquaint students of Early Buddhism with the language and idiom of these sacred texts Here the renowned English translator of the Pali Canon opens a window into key suttas from the Sa'yutta Nikaya giving a literal translation of each sentence followed by a more natural English rendering then explaining the grammatical forms involved In this way students can determine the meaning of each word and phrase and gain an intimate familiarity with the distinctive style of the Pali suttas with the words and world of the earliest Buddhist texts Ven Bodhi's meticulously selected anthology of suttas provides a systematic overview of the Buddha's teachings mirroring the four noble truths the most concise formulation of the Buddha's guide to liberation Reading the Buddha's Discourses in Pali shares with readers not only exceptional language instruction but also a nuanced study of the substance style and method of the early Buddhist discourses Feeling and will James Mark Baldwin, 1891 **Volition and Personality** Julius Kuhl, Jürgen Beckmann, 1994 This is an impressive book which presents a profoundly new approach to analyzing human behavior The fundamental concept is to focus on how people link motivation with action and why they do or do not stick with their original intentions The fascinating studies reported here attempt to separate people into two groups 1 State oriented individuals who focus under stress on past present or future states rather than on options available for action versus 2 Action oriented individuals who focus under stress on action alternatives This book will be of great interest to both behavioral and cognitive psychologists psychophysicologists and specialists in sport as well as aviation psychology **The British and Foreign Medico-chirurgical Review, Or, Quarterly Journal of Practical Medicine and Surgery**, 1860 **Subject Properties in Early Modern Germanic Languages** Pierre-Yves Modicom, 2025-04-21 This monograph is devoted to the cross linguistic profile of subjects in Early Modern Germanic languages The typologically complex question of subject criteria is addressed in a functional framework relying on recent developments in Construction Grammar The set of data is extracted from a parallel corpus made up of the 1587 German chapbook about the life of Dr Faustus and its English Dutch and Danish translations all of which had been published by 1592 At that time the syntactic features of English subjects were still comparable to Continental languages like Danish facilitating the inclusion of English in a cross Germanic analysis The analysis makes use of two comparative concepts of subjecthood argumental subjecthood centred on the argument structural characteristics of subjects and informational subjecthood which corresponds to the syntacticization of information structural properties Subjecthood is defined as a labile multi level configuration of argumental and informational parameters This approach sheds new light on notorious tricks of Germanic syntax such as oblique subjects expletives scrambling and subjectless passives History of Englishes Matti Rissanen, Ossi Ihalainen, Terttu Nevalainen, Irma Taavitsainen, 2011-09-08 No detailed description available for History of Englishes The

Lublin Lectures and Works on Max Scheler Karol Wojtyla, 2023-04-28 The Catholic University of America Press is honored to publish the English Critical Edition of the Works of Karol Wojtya a John Paul II Under the auspices of an international editorial board the English Critical Edition will comprise more than 20 volumes covering all of John Paul s writings and correspondence in the years before and during his papacy This collection is essential for several reasons For one thing gaining access to the saint s writings has posed a significant challenge Except for official papal addresses and documents preserved and disseminated by the Vatican St John Paul s works have been scattered and limited Many documents need a new translation Finally English language audiences have faced the challenge even in the case of published texts of dealing with several languages various translations and textual idiosyncrasies The second volume of the series presents Wojtya s lectures at the Catholic University of Lublin and his works on Max Scheler This volume consists of three parts Karol Wojtya s lectures at the Lublin University from 1954 to 1957 during three academic years Wojtya s articles related to the ethical issues discussed in the Lublin lectures and his habilitation thesis on Max Scheler from 1953 with other essays related more closely to Scheler s thought As was the case with Volume 1 Volume 2 also relies on the original manuscripts and typescripts of Wojtya s works These original texts were compared with the Polish published editions and the significant differences between them were marked in the scholarly apparatus Some of the essays in this volume were never published in English others were never published before

An Essay Concerning Human Understanding John Locke, 1844 **Philosophy and Living** Ralph Blumenau, 2014-04-30 Philosophy can be very abstract and apparently remote from our everyday concerns In this book Ralph Blumenau brings out for the non specialist the bearing that thinkers of the past have on the way we live now on the attitude we have towards our lives towards each other and our society towards God and towards the ethical problems that confront us The focus of the book is those aspects of the history of ideas which have something to say to our present preoccupations After expounding the ideas of a particular thinker there follows a discussion of the material and how it relates to issues that are still alive today indented from the margin and set in a different typeface based on the author s classroom debates with his own students Another feature of the book is the many footnotes which refer the reader back to earlier and forward to later pages of the book They are intended to reinforce the idea that throughout the centuries philosophers have often grappled with the same problems sometimes coming up with similar approaches and sometimes with radically different ones

Karol Wojtyla's Personalist Philosophy Miguel Acosta,Adrian Reimers,2016-05-27 This work provides a clear guide to Karol Wojtyla s principal philosophical work Person and Act rigorously analyzing the meaning that the author intended in his exposition An important feature of the work is that the authors rely on the original Polish text *Osoba i czyn* as well as the best translations into Italian and Spanish rather than on a flawed and sometimes misleading English edition of the work

What can we make of theories of embodiment and the role of the human mirror neuron system? Analia Arevalo,Juliana Baldo,Fernando González-Perilli, Agustin Ibanez,2016-03-09 In recent years work surrounding theories of embodiment and the role of the putative mirror neuron system MNS in humans has gained considerable attention If humans have developed a

network of neurons that fire in response to other beings actions as has been shown in macaques this system could have vast implications for all kinds of cognitive processes unique to humans such as language learning empathy and communication in general The goal of tapping into and understanding such a system is a fascinating yet challenging one One form of embodiment embodied linguistics suggests that the way we process linguistic information is linked to our physical experience of the concept conveyed by each word The interaction between these cognitive systems i e language and motor processing may occur thanks to the firing of neurons making up the MNS The possible interdependence between different cognitive systems has implications for healthy as well as pathological profiles and in fact work in recent years has also explored the role of embodiment and or the MNS in clinical populations such as stroke Parkinson s Disease Alzheimer s Disease and Autism among others Research on embodiment and or the MNS has been approached with a number of different methodologies but the results obtained with these different methodologies have not been entirely consistent generating doubts regarding the theories The question has been raised as to what this line of inquiry can gain from the types of evidence contributed by functional neuroimaging methods carried out with healthy volunteers versus behavioral or lesion symptom mapping methods employed with neurologically compromised individuals Of particular interest are the clinical applications of this line of research If indeed a system exists which reflects a tight link between for example the human language and motor systems then the obvious challenge is to tap into this system to create useful therapies that can provide rehabilitation where damage has occurred This Research Topic brought together work conducted with healthy and patient populations using several behavioral and imaging techniques as well as insightful commentaries and opinion pieces We believe the combined work of the participating authors is an important contribution to this intriguing line of research and an excellent point of reference for future work
