Reid, Sean Wray, Yoko Yamazaki, 2012-07-12 Academic Writing Skills is a three volume essay writing course for students that develops students abilities to compose college level essays Academic Writing Skills 1 takes students through a step by step process from writing a paragraph to essays It is appropriate for students new to academic writing who need general training in essay writing skills The Neuropsychology Casebook Donna L. Orsini, Wilfred G. Van Gorp, Kyle B. Boone, 2013-11-11

The Neuropsychology Casebook was developed to fill the existing gap in the current body of literature on clinical neuropsychology Although texts are available that describe neuropsychological tests and others provide information on syndromes this volume provides descriptions of neuropsychological test performance for individuals with various syndromes It was designed to illustrate the process of clinical interpretation of test findings and report writing for the individual case Our aims are to provide both the student and practicing professional with a collection of actual neuropsychological case studies that typify many of the cardinal disorders or syndromes frequently seen by practicing clinical neuropsychologists We have not provided an exhaustive survey of case studies representing many of the disorders commonly seen in neuropsychology rather we have focused on a few select cases that illustrate some of the more common disorders This book includes detailed case reports complete with referral questions historical information relevant neuroradiological findings actual neuropsychological test data and clinical interpretations that take into account all available information on the patient The cases are discussed in the chapter commentaries with reference to how each compares and contrasts with the prototypic case for that disorder or syndrome Such case studies help to highlight the various types of behavioral and cognitive sequelae associated with common clinical disorders The case studies which are examined through an hypothesis testing approach are also aimed at demonstrating how neuropsychological principles and methods are applied **The Role of interest in Learning and Development**

K. Ann Renninger, Suzanne Hidi, Andreas Krapp, Ann Renninger, 2014-02-04 Interest is just emerging as a critical bridge between cognitive and affective issues in both learning and development This developing interest in interest appears to be linked to an increasing concern for studying the individual in context examining affective variables as opposed to purely structural features of text analyzing the interrelationship of cognitive and social development understanding practical applications of theories of motivation and recognizing the importance of developmental psychology for the study of learning This book addresses both how individual interest and interest inherent in stimuli books text toys etc across subjects affect cognitive performance While the book's particular emphasis is on theory driven research each of the contributing authors offers a unique perspective on understanding interest and its effects on learning and development As such each has contributed a chapter in which particular questions in interest research are described and linked to a clearly stated theoretical perspective and recent findings Relevant material from the broader literatures of psychology and education are analyzed in the context of these discussions In addition the introductory and concluding chapters build on the contributions to the volume by providing the basis of a coherent view of interest across genres such as stories and expository text and

domains as varied as play reading and mathematics

**Reading Across the Life Span** Steven R. Yussen, M Cecil

Smith, 2012-12-06 One of the liveliest areas of research in the social sciences is reading. Scholarly activity is currently proceeding along a number of different disciplinary lines addressing a multitude of questions and issues about reading. A short list of disciplines involved in the study of reading would include linguistics, psychology, education, history, and gerontology. Among the important questions being addressed are some long-standing concerns: How are reading skills acquired? What are the basic components of reading skill? How do skilled readers differ from less skilled ones? What are the best ways to approach instruction for different groups of readers: young, beginning, readers, poor readers, with learning problems, and teenage and adult illiterates? How can reading skill best be measured: what standardized instruments and observational techniques are most useful? The large volume of textbooks and scholarly books that issue forth each year is clear evidence of the dynamic nature of the field. The purpose of this volume is to survey some of the best work going on in the field today and reflect what we know about reading as it unfolds across the life span. Reading is clearly an activity that spans each of our lives. Yet most accounts of it focus on some narrow period of development and fail to consider the range of questions that serious scholarship needs to address for us to have a richer understanding of reading. The book is divided into four parts.

**Value Investing** James Montier, 2009-12-02 As with his weekly column, James Montier's Value Investing is a must read for all students of the financial markets. In short order, Montier shreds the efficient market hypothesis, elucidates the pertinence of behavioral finance, and explains the crucial difference between investment process and investment outcomes. Montier makes his arguments with clear insight and spirited good humor, and then backs them up with cold, hard facts. Buy this book for yourself and for anyone you know who cares about their capital. Seth Klarman, President, The Baupost Group, LLC. The seductive elegance of classical finance theory is powerful, yet value investing requires that we reject both the precepts of modern portfolio theory (MPT) and pretty much all of its tools and techniques. In this important new book, the highly respected and controversial value investor and behavioural analyst, James Montier, explains how value investing is the only tried and tested method of delivering sustainable long-term returns. James shows you why everything you learnt at business school is wrong: how to think properly about valuation and risk; how to avoid the dangers of growth investing; how to be a contrarian; how to short stocks; how to avoid value traps; how to hedge ignorance using cheap insurance. Crucially, he also gives real-time examples of the principles outlined in the context of the 2008-09 financial crisis. In this book, James shares his tried and tested techniques and provides the latest and most cutting-edge tools you will need to deploy the value approach successfully. It provides you with the tools to start thinking in a different fashion about the way in which you invest, introducing the ways of overcoming the emotional distractions that will bedevil the pursuit of a value approach and ultimately think and act differently from the herd.

**HC 203 - Child Sexual Exploitation and the Response to Localised**

**Grooming: Follow-Up** Great Britain. Parliament. House of Commons. Home Affairs Committee, 2014 This report is a follow

up to the Committee's second report of session 2013-14. That report revealed results of an inquiry into children being treated in an appalling way not just by their abusers but because of catastrophic failures by the very agencies that society has appointed to protect them. There is no mechanism at all to suspend or remove a Police and Crime Commissioner for behaviour which falls short of criminal. The current report includes a draft Bill which suggests mechanisms for removing PCCs from their post. It is vital that children's services are dramatically improved to prevent a similar situation from happening again. It was shocking that evidence of child sexual exploitation in Rotherham was ignored by both Rotherham Council and South Yorkshire Police. A number of individuals attempted to bring these crimes to light only to face obstacles from the Council and Police which in some cases questioned their credibility and the veracity of their claims. If the Council and Police had taken these warnings seriously the abusers could have been brought to justice more quickly and some of the later victims could have been spared their ordeal. The proliferation of revelations about files which can no longer be located gives rise to public suspicion of a deliberate cover up. The only way to address these concerns is with a full transparent and urgent investigation.

**EBOOK: Psychology: The Science of Mind and Behaviour** Nigel Holt, Andy Bremner, Ed Sutherland, Michael Vliek, Michael Passer, Ronald Smith, 2015-02-16. Psychology: The Science of Mind and Behaviour is here with a new fully updated and revised third edition. Bringing new developments in the field and its renowned pedagogical design, the third edition offers an exciting and engaging introduction to the study of psychology. This book's scientific approach which brings together international research, practical application and the levels of analysis framework encourages critical thinking about psychology and its impact on our daily lives. Key features: Fully updated research and data throughout the book as well as increased cross-cultural references. Restructured Chapter 3 on Genes, Environment and Behaviour which now starts with a discussion of Darwinian theory before moving on to Mendelian genetics. Core subject updates such as DSM 5 for psychological disorders and imaging techniques on the brain are fully integrated. Revised and updated Research Close Up boxes. Current Issues and hot topics such as the study of happiness and schizophrenia, intelligence testing, the influence of the media and conflict and terrorism are discussed to prompt debates and questions facing psychologists today. New to this edition is Recommended Reading of both classic and contemporary studies at the end of chapters.
