

Converting Recipes

Convert a recipe when the yield of the recipe (the amount it provides) is not the same as the amount of product needed.

- The conversion of the recipe affects the cost of the recipe, but not necessarily the cost of the portion.
- When properly converted and prepared, the quality of the product produced from the recipe should not vary from the original, no matter how many portions it yields.
- Sometimes you must change (or convert) a recipe if the yield is not the amount you need.
- Using basic math skills, it's easy to increase or decrease many recipes.
