songs I reviewed his repertoire for an applicable title for this book Since the book is about my last year on earth before turning 60 years of age I initially considered Slip Slidin Away but thought that might project a negative connotation towards getting older Instead I chose one of Simons more popular songs and gave it my own slant as I wanted to do 50 things Id never done before in the 12 months leading up to becoming a sexagenarian dont get the wrong idea it just means a person between 60 and 69 years of age On my 60th birthday December 10 2014 someone asked me how I felt I said just like I did when I was 59 Heck it was only yesterday although my grandson calls it lasterday which if you really think about it makes a lot more sense As for the 50 things Id never done before dont expect anything outrageous jumping out of an airplane dangerous wrestling an alligator or spectacular making a dinosaur appear but if I could my grandson would be SO impressed Just 50 things pretty much anyone could do as long as they have the right attitude And by right attitude I mean sometimes you just have to say what the ___ Just because I turned 60 doesnt mean I reached maturity overnight After all maturity is for old people

Low-Calorie Foods and Food Ingredients R. Khan,2012-12-06 amounts can produce a deleterious effect on animals In an attempt to quantify this potential for toxicity and to give sufficient margin for safety JECFA has introduced an acceptable daily intake ADI level for food additives For example the ADI values granted for saccharin aspartame cyclamate acesulfame K and sucralose are 2 5 40 11 9 and 1 3 5 mg kg body weight per day respectively Chapter 2 on regulatory aspects of low calorie food elaborates these points The additives that are to be consumed in large amounts such as a fat replacement product like Olestra or a new bulking material like polydextrose present a more complex problem as far as the evaluation of their toxicity is concerned Normal safety testing of an additive such as a high intensity sweetener requires that the test animals are fed with a sufficiently high dosage in order to produce an effect and then on that basis an ADI value is calculated In cases like Olestra and polydex trose which are not normally present in diet or metabolised to dietary constituents such an approach will obviously not be applicable or of any use in calculating an ADI value Due to these factors the regulatory authorities have not yet been able to produce any guidelines for toxicity trials for additives that are to be taken in food in large quantities
