operation and Development OECD and United Nation UN model tax treaties whether international law and customary principles mandate a strict territorial link with the source state for the assumption of tax jurisdiction whether the economic nexus based tax jurisdiction and absence of a physical presence breach the constitutional doctrine of extraterritoriality or due process and whether retrospective tax legislation breaches the principle of constitutional fairness The book offers a politically informed analysis of the nexus principle and balances the dynamics of physical presence and economic nexus standards based on an in depth survey of the historical evolution of judicial pronouncements and international practices in this regard Dr Singh s book exposes an urgently needed missing link in the international source rule literature and takes a giant step towards solving the thorny question of appropriate tax apportionment It sheds brilliant light on the policies states may adopt when signing new tax treaties so that unintended results may be foreseen and avoided Tax practitioners taxation authorities and academic researchers in the field of international tax law and policy will greatly appreciate the book s forthright enhancement of the ability to defend challenges based on the nexus doctrine
