

DO-IT-YOURSELF-SERVICE

CHANGING A WHEEL

WARNING

■ If you have a flat tire, move a safe distance off the road. Turn off the engine, turn the emergency flasher on and use other warning devices to alert other motorists.

■ Passengers must not remain in the vehicle when jacked up.

■ Make sure that passengers wait in a safe place away from the vehicle and well away from the roadway and traffic.

■ Before you change a wheel, be sure the ground is level and firm. If necessary, use a board under the jack.

■ Set the parking brake and block the wheel opposite the defective wheel on the other side of the vehicle. Engaging a gear or placing the Automatic transmission selector lever in P (Park) position is not a substitute for fully setting the parking brake.

Step 1

Take jack, tools and spare wheel out of the luggage compartment.

Step 2

Wheel with small protective caps

■ Remove small protective caps for hub and wheel bolts with screwdriver.

Wheel with hub cap

■ Remove hub cap after unscrewing the small allen screw.

Step 3

Loosen all wheel bolts counterclockwise about one turn with lug wrench. Do not yet remove the bolts.

Step 4

There are two jack points on each side under the body marked with a triangular impression.

WARNING

■ Mounting the jack at any other place may damage the vehicle or may result in personal injuries.

■ Provide a firm base for the jack on the ground. If necessary, use a board under the jack.

■ Securely place the jack under the jack point closest to the wheel to be changed.

■ Guide the lifting cradle of the jack under the vehicle body. The ridge underneath the vehicle should engage in the notch on the lifting cradle.

■ Adjust the jack at an angle so that the base is slightly under the vehicle, and the longer portion of the jack base rests firmly on the ground.
