Streit-Bianchi,2024-03-12 Big Science Innovation and Societal Contributions offers a connection between Big Science and its societal impacts from a multidisciplinary perspective drawing on physics and astrophysics scholars to explain the reasoning behind their work and how such knowledge can be applied to everyday life Through simplifying complex scientific concepts Big Science Innovation and Societal Contributions explains the evolution of Big Science experiments and what it takes to manage and maintain complex scientific experiments with a human centred approach Further it examines the motivations behind international efforts to develop capital intensive and human resource rich large scale multi national scientific investments to solve fundamental research problems concerning our future Drawing on reliable scientific evidence multi disciplinary perspectives and personal insights from collider physics detectors accelerator and telescopes research the volume outlines the mechanisms benefits and methodologies as well as the potential challenges and short comings of Big Science to learn and reflect on for future initiatives This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations **Fuzzy Techniques for Decision Making 2018** José Carlos R. Alcantud,2020-12-02

Zadeh's fuzzy set theory incorporates the impreciseness of data and evaluations by imputting the degrees by which each object belongs to a set. Its success fostered theories that codify the subjectivity, uncertainty, imprecision, or roughness of the evaluations. Their rationale is to produce new flexible methodologies in order to model a variety of concrete decision problems more realistically. This Special Issue garners contributions addressing novel tools, techniques, and methodologies for decision making inclusive of both individual and group, single or multi-criteria decision making in the context of these theories. It contains 38 research articles that contribute to a variety of setups that combine fuzziness, hesitancy, roughness, covering sets, and linguistic approaches. Their ranges vary from fundamental or technical to applied approaches.

Truth, Existence and Explanation Mario Piazza, Gabriele Pulcini, 2018-10-24. This book contains more than 15 essays that explore issues in truth, existence, and explanation. It features cutting-edge research in the philosophy of mathematics and logic. Renowned philosophers, mathematicians, and younger scholars provide an insightful contribution to the lively debate in this interdisciplinary field of inquiry. The essays look at realism vs. anti-realism, as well as inflationary vs. deflationary theories of truth. The contributors also consider mathematical fictionalism, structuralism, the nature and role of axioms, constructive existence, and generality. In addition, coverage also looks at the explanatory role of mathematics and the philosophical relevance of mathematical explanation. The book will appeal to a broad mathematical and philosophical audience. It contains work from FilMat, the Italian Network for the Philosophy of Mathematics. These papers collected here were also presented at their second international conference held at the University of Chieti-Pescara, May 2016.

Food futures: ethics, science and culture I. Anna S. Olsson, Sofia M. Araújo, M. Fátima Vieira, 2023-07-31. Food is at the centre of human existence. We eat every day not only to satisfy our physical needs but also as part of cultural and social interaction. Food choices and markets shape the agricultural landscape and the cities we live in. Whereas what we choose to eat and feed our family is part of who we are, a growing number of actors compete to influence our food habits through marketing strategies and nutritional advice. And ethical considerations are coupled with every choice over food, whether related to production, distribution, consumption, food waste, policy in general, marketing, or advice. Given the variety of implications, the food problem entails the construction of an inclusive society must redirect the concerns about food in the present to the imagination of future alternatives. The search for innovative solutions calls for multidisciplinary critical enquiry and utopian thinking will be instrumental in that regard. This book brings together work by scholars in a wide range of disciplines addressing many different topics related to food futures. Topics covered include food and literature, food waste, food communication, food policy, corporate social responsibility, and public procurement in food supply, responsible research and innovation in food production, as well as sustainability and animal ethics and welfare.

Subversion 2.0 Christopher Whyte, 2024. Why are conspiracy theories, extremist rhetoric, and acts of antagonism by fringe elements of society so much more visible today than in years past? In *Subversion 2.0*, Christopher Whyte makes the case that leaderlessness, characterized by an evolving and uneven feedback loop linking fringe spaces to

mainstream elite rhetoric and popular discourse has emerged as the default format of subversive activity in the digital age By examining the uneven feedback loop of leaderlessness Whyte argues that social Internet platforms act as a vehicle for transmitting and amplifying extreme rhetoric but often fail to moderate extremism in turn *How to Prepare a Standout College Application* Alison Cooper Chisolm, Anna Ivey, 2013-08-06 Demystifying the process of completing a college application Written by two former admissions officers at top universities and current admissions coaches this book is a must have for preparing a winning college application The authors reveal the mystery behind what college admissions officers are looking for and show applicants how to leverage their credentials stand out in the over crowded applicants pool and make a genuine memorable impression This is the book that will help the college bound get off the like many others pile and onto the acceptance list Includes instructions and examples for every component of the college application from writing the essay to answering questions like Why do you want to go to College X Shows how to avoid underestimating the importance of critical features on any application Includes the latest information on the Common Application 4 0 and corrects outdated holdover advice still stressed in many other books This book is filled with step by step advice that students and parents can use immediately and will refer to again and again *Neural Mechanisms Underlying Movement-Based Embodied Contemplative Practices* Laura Schmalzl, Catherine E. Kerr, 2016-07-05 Relative to the extensive neuroscientific work on seated meditation practices far less studies have investigated the neural mechanisms underlying movement based contemplative practices such as yoga or tai chi Movement based practices have however been found to be effective for relieving the symptoms of several clinical conditions and to elicit measurable changes in physiological neural and behavioral parameters in healthy individuals An important challenge for neuroscience is therefore to advance our understanding of the neurophysiological and neurocognitive mechanisms underlying these observed effects and this Research Topic aims to make a contribution in this regard It showcases the current state of the art of investigations on movement based practices including yoga tai chi the Feldenkrais Method as well as dance Featured contributions include empirical research proposals of theoretical frameworks as well as novel perspectives on a variety of issues relevant to the field This Research Topic is the first of its kind to specifically attempt a neurophysiological and neurocognitive characterization that spans multiple mindful movement approaches and we trust it will be of interest to basic scientists clinical researchers and contemplative practitioners alike
