Concrete Solutions 2014 Michael Grantham, P A Muhammed Basheer, Bryan Magee, Marios Soutsos, 2014-08-18 The Concrete Solutions series of International Conferences on Concrete Repair began in 2003 with a conference held in St Malo France in association with INSA Rennes Subsequent conferences have seen us partnering with the University of Padua in 2009 and with TU Dresden in 2011 This conference is being held for the first time in the UK in association with Queen s University Belfast and brings together delegates from 36 countries to discuss the latest advances and technologies in concrete repair Earlier conferences were dominated by electrochemical repair but there has been an interesting shift to more unusual methods such as bacterial repair of concrete plus an increased focus on service life design aspects and modelling with debate and discussion on the best techniques and the validity of existing methods Repair of heritage structures is also growing in importance and a number of the papers have focused on the importance of getting this right so that we may preserve our rich cultural heritage of historic structures This book is an essential reference work for those working in the concrete repair field from Engineers to Architects and from Students to Clients

Food Systems and Biodiversity in the Context of Environmental and Climate Risks Mohamed Behnassi, Mirza Barjees Baig, Himangana Gupta, Rachid Sabbahi, Gitanjali Nain Gill, Mahjoub El Haiba, 2025-08-06 Part of the CERES publication series this book explores the critical nexus between food systems biodiversity and climate resilience Through a multi regional analysis it examines how environmental and climate changes driven by unsustainable agriculture land use shifts and pollution disrupt ecosystems and threaten food security Grounded in empirical research particularly from

Asia and Africa it highlights biodiversity's role in sustaining food systems and presents nature based solutions such as agroecology land restoration and the integration of traditional knowledge with scientific innovation A valuable resource for policymakers researchers and practitioners this volume takes a systems based approach to managing trade offs fostering synergies and driving sustainable food and climate strategies

Bridget Riley: The Stripe Paintings 1961-2014 Bridget Riley, 2014-10-31 Published on the occasion of Bridget Riley's major exhibition at David Zwirner in London in the summer of 2014 this fully illustrated catalogue offers intimate explorations of paintings and works on paper produced by the legendary British artist over the past fifty years focusing specifically on her recurrent use of the stripe motif Riley has devoted her practice to actively engaging viewers through elementary shapes such as lines circles curves and squares creating visual experiences that at times trigger optical sensations of vibration and movement The London show her most extensive presentation in the city since her 2003 retrospective at Tate Britain explored the stunning visual variety she has managed to achieve working exclusively with stripes manipulating the surfaces of her vibrant canvases through subtle changes in hue weight rhythm and density As noted by Paul Moorhouse Throughout her development Riley has drawn confirmation from Eugène Delacroix's observation that the first merit of a painting is to be a feast for the eyes Her most recent stripe paintings are a striking reaffirmation of that principle exciting and entrancing the eye in equal measure Created in close collaboration with the artist the publication's beautifully produced color plates offer a selection of the iconic works from the exhibition These include the artist's first stripe works in color from the 1960s a series of vertical compositions from the 1980s that demonstrate her so called Egyptian palette a narrow chromatic range that recalled natural phenomena and an array of her modestly scaled studies executed with gouache on graph paper and rarely before seen A range of texts about Riley's original and enduring practice grounds and contextualizes the images including new scholarship by art historian Richard Shiff texts on both the artist's wall paintings and newest body of work by Paul Moorhouse 20th Century Curator at the National Portrait Gallery in London and a 1978 interview with Robert Kudielka her longtime confidant and foremost critic Additionally the book features little seen archival imagery of Riley at work over the years documentation of her recent commissions for St Mary's Hospital in West London taken especially for this publication and installation views of the exhibition itself installed throughout the three floors of the gallery's eighteenth century Georgian townhouse located in the heart of Mayfair

Food futures: ethics, science and culture I. Anna S. Olsson, Sofia M. Araújo, M. Fátima Vieira, 2023-07-31 Food is at the centre of human existence We eat every day not only to satisfy our physical needs but also as part of cultural and social interaction Food choices and markets shape the agricultural landscape and the cities we live in Whereas what we choose to eat and feed our family is part of who we are a growing number of actors compete to influence our food habits through marketing strategies and nutritional advice And ethical considerations are coupled with every choice over food whether related to production distribution consumption food waste policy in general marketing or advice Given the variety of implications the

food problem entails the construction of an inclusive society must redirect the concerns about food in the present to the imagination of future alternatives The search for innovative solutions calls for multidisciplinary critical enquiry and utopian thinking will be instrumental in that regard This book brings together work by scholars in a wide range of disciplines addressing many different topics related to food futures Topics covered include food and literature food waste food communication food policy corporate social responsibility and public procurement in food supply responsible research and innovation in food production as well as sustainability and animal ethics and welfare
