**Meeting the Challenges to Measurement in an Era of Accountability** Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Decision Making in Emergency Management examines decisions the authors have made over their careers based on their combined training experience and instinct Through a broad range of case studies readers discover how experience impacts decision making in conjunction with research and tools available While the use of science data and industry standards are always the best option when it comes to handling emergency situations not all emergency situations fit one known solution This book comprehensively explores the question Is instinct a viable factor when faced with a challenging situation and how close does it match up with the best science available

**Perspectives on Disability and Rehabilitation** Karen Whalley Hammell, 2006-02-22 The eBook version of this title gives you access to the complete book content electronically Evolve eBooks allows you to quickly search the entire book make notes add highlights and study more efficiently Buying other Evolve eBooks titles makes your learning experience even better all of the eBooks will work together on your electronic bookshelf so that you can search across your entire library of Occupational Therapy eBooks Please note that this version is the eBook only and does not include the printed textbook Alternatively you can buy the Text and Evolve eBooks Package which gives you the printed book plus the eBook Please scroll down to our Related Titles section to find this title The book

provides an accessible introduction to many of the current theoretical perspectives on disability enabling readers to challenge the taken for granted nature of traditional knowledge and assumptions within the rehabilitation health and community care industries and encouraging a more critical approach both to the nature of rehabilitation following injury or illness and to the problem of physical difference and disability Through its interrogation and exploration of new theoretical perspectives on disability and rehabilitation this book provides a unique text for students and practitioners of nursing occupational therapy physiotherapy and social work and for educators and researchers in these fields Although rehabilitation practitioners claim to aspire to client centred practice and advocate participatory modes of research rehabilitation theory remains curiously estranged both from theoretical perspectives developed by disabled disability theorists and from critical perspectives on disability that are emerging from other academic disciplines Thus immune from alternate views rehabilitation practitioners fail to question the premise that their professional assumptions are correct or right Contemporary theorists raise important questions for example about professional power concepts of normality independence and the physical body issues central to rehabilitation as well as to the role of the cultural environment in producing prejudice the role of the social environment in creating disadvantage and to issues of power and privilege and of the systemic oppression of disabled people This book provides an introduction to the expanding body of critical work on disability by theorists from a range of perspectives illustrating ways in which their theories and insights contest or support assumptions within rehabilitation theory The book argues for a cross fertilisation of ideas and challenges hierarchies of power in which nurses and therapists privilege their own assumptions perspectives and knowledge while overlooking or ignoring the perspectives both of disabled people and of other theorists Provides an accessible introduction to current theoretical perspectives on disability Demonstrates how these theoretical perspectives can inform a practitioner s approach to rehabilitation Relevant for all the rehabilitation and health care professions      **National Union Catalog** ,1968 Includes entries for maps and atlases
