*Moral Issues in the Natural Sciences and Technologies* Jurie van den Heever,Chris Jones,2019-12-12 This book reflects academically on important and relevant natural scientific disciplines important technologies and related media to determine and communicate the moral issues and challenges within those specific fields of study and how to deal with them morally and from a multidimensional South African context It aims to add scientific technological and ethical value locally and globally by reflecting mainly from the viewpoint of a specific scholars writing about the most pressing moral issues or challenges raised by problems within their specific field of study It is written mainly from a qualitative methodological perspective including autobiographical and participatory views The co authors present in respective chapters their research systematically and intersectionally based on profound theoretical analysis and reasoning Current research in the basic and implied sciences and technologies requires sound ethical practice based on a defensible moral stance Moral norms in our view are deeply grounded and evolved convictions about justice and injustice right and wrong good and bad It is not about rules This scholarly book combines the insights and expertise of established South African scholars from different disciplines and backgrounds The contributors are all deeply committed to the value and validity of science and ethical practice across the moral spectrum Open and responsible discussions around

this topic can lead to the introduction of moral guidelines and regulations to protect the rights of individuals animals and the environment while simultaneously facilitating the growth of scientific practice This collected work with its very specific and carefully selected grouping of academic fields aims to innovatively assist in alleviating the shortage of academic publications reflecting on the moral issues in these specific fields      **Ethics and climate change** ,2015-07-27 Climate change is the

most significant moral and environmental issue of our time This project seeks to help deepen explicit ethical reflection around the world on national responses to climate change by developing a publicly available record on national compliance with ethical obligations for climate change similar to the reports that are now available on national compliance with human rights obligations      **Chemical news and Journal of physical science** ,1870      Drought and Water Scarcity: Addressing Current and Future Challenges Nevil Wyndham Quinn,Ian Holman,Jamie Hannaford,Emma Weitkamp,Kerstin

Stahl,2022-10-19      Creating and Managing a Sustainable Sporting Future Vassilios Ziakas,Aaron Beacom,2020-06-09

Creating and Managing a Sustainable Sporting Future contributes to a critical understanding of the challenges key stakeholders across the globe encounter as they seek to manage periods of transition brought about by policy change relating to the provision of sport and physical activity The book uncovers the global challenges in terms of managing the re orientation of stakeholder activities and organisational strategies in response to the aspirations for a wider range of outcomes through sport based interventions and establishment of partnerships with non sport sectors It illuminates the increasingly erratic trajectory of sport development service providers as the environment within which sport organisations operate changes through for example climate change demographic shifts changing features of local economies and alterations to the structures of local government and governance and the responses of sport organisations to these new realities differ greatly depending on location institutional structures and leadership The chapters highlight the changing social economic environmental and policy contexts within which sports organisations operate and explain the subsequent need for new approaches to partnership working physical activity re scoping and integrated education programming Showing that the international mandate of creating active lifestyles and subsequent re orientation of stakeholders towards physical activity cannot only contribute to re defining sport but also in identifying novel ways for building and managing a sustainable sporting future Creating and Managing a Sustainable Sporting Future is ideal for Sports scholars and particularly those working on Sport Policy and Sustainable sport development This book was originally published as a special issue of Managing Sport and Leisure      *The Space Law Stalemate* Anja Pečujlić,2023-03-21 The governing international space law

regime has been locked in a norm creation stalemate for over 40 years This stalemate endangers the preservation of established guiding legal principles as well as the sustainability of the parts of outer space that humans utilize The discrepancy between norm creation technological advancement and the ecosystem of novel actors could generate serious consequences for future space activities and the nature of international relations Besides the return of old rivalries in a New

Cold War new activities and actors emerging amidst a legal void emphasizes the risks of the stalemate unstable peace fragile cooperation uneven technological development and uncertain eco sustainability The prolonged legal stalemate cannot be treated simply as an academic question for it has broader political and economic implications of growing strategic relevance Unresolved issues in international space law could threaten the survival of space as a global common thus it is essential that the ability of the norm creation mechanism of UN COPUOS is equipped to address the ongoing changes and provide for adequate global governance This book evaluates the current legal state and sheds light on potential future prospects offering an overview of the political context within which it developed providing an assessment of the selected successful examples in international law and analyzing lessons learned It makes recommendations for how the UN COPUOS legal apparatus should be modified in order to ensure that future space activities are possible beyond anarchy greed and ecological irresponsibility and to ensure that the principle of the peaceful uses of outer space remains the governing norm
