The Climate Bonus Alison Smith, 2013-06-26 We urgently need to transform to a low carbon society yet our progress is painfully slow in part because there is widespread public concern that this will require sacrifice and high costs But this need not be the case Many carbon reduction policies provide a range of additional benefits from reduced air pollution and increased energy security to financial savings and healthier lifestyles that can offset the costs of climate action This book maps out the links between low carbon policies and their co benefits and shows how low carbon policies can lead to cleaner air and water conservation of forests more sustainable agriculture less waste safer and more secure energy cost savings for households and businesses and a stronger and more stable economy The book discusses the ways in which joined up policies can help to maximise the synergies and minimise the conflicts between climate policy and other aspects of sustainability Through rigorous analysis of the facts the author presents well reasoned and evidenced recommendations for policy makers and all those with an interest in making a healthier and happier society This book shows us how instead of being paralysed by the threat of climate change we can use it as a stimulus to escape from our dependence on polluting fossil fuels and make the transition to a cleaner safer and more sustainable future **Science Education Research and Practices in Taiwan** Mei-Hung Chiu, 2015-08-04 This book highlights the development and outcomes of research on and practical experience in science education in Taiwan As the outcomes of the scholarship on science education in Taiwan have garnered attention in science education communities around the world this book gathers the most relevant research on Taiwan presenting it in a cohesive overview that will move science education forward in terms of policy research and practice **Global Handbook on Noncommunicable Diseases and Health Promotion** David V. Impacts of Teacher Evaluation and Professional Development on Student Outcomes Edward Crowe, Rena F. Subotnik, 2012-07-01 This particular case study is designed to explore the extent to which a teacher evaluation system is effective. It also addresses the challenge of measuring student achievement gains when the students in question are already at the high end of the scale, a different yet important problem in an era when many concentrate on low hanging fruit or students on the bubble between failure and marginal performance. By presenting a realworld case, various research methods for studying issues raised by the case and the interchange among scholars engaged in this effort, this volume will allow educational policymakers and practitioners to decide if a proposed approach is compelling and relevant for their settings. Concurrently, a comparison of various research methods addressing a real school based problem provides an important learning tool for the research community and for those who study and make policy. We also believe that the case study and the research designs will be useful for those with responsibility for framing and funding a research agenda in education that utilizes strong research designs applied to topics that matter to student outcomes at all levels of the U S education system and at all levels of pupil performance. And finally, we hope that doctoral programs that seek to prepare the next generation of education researchers will find our approach helpful in their work.

New evidence on the Psychological Impacts and Consequences of Covid-19 on Mental Workload Healthcare Workers in Diverse Regions in the World Davod Afshari, Edith Kamaru Kwobah, Krystyna Kowalczyk, Stephen X. Zhang, 2023-10-16 The Covid 19 pandemic has had a significant global impact on our daily lives. At the center of the pandemic are healthcare workers who have faced a great psychological burden in attempting to counter the virus in both short and long terms contexts. The goal of this Research Topic is to offer new evidence on the mental health experiences of healthcare workers under the Covid 19 pandemic by taking on a broad global perspective. We are particularly interested in new evidence that extends the existing meta analyses on the topic to build further knowledge.

Scientific American, 1899 **Crustal Earth Materials** Loren A. Raymond, Neil E. Johnson, 2017-10-20 An understanding of rocks and the minerals that comprise them lies at the core of every geologist's education. As more curricula combine mineralogy and petrology into a single course, Raymond and Johnson have responded with a concise introduction to the study of Earth materials. The authors have written at a level that won't intimidate students encountering fundamental concepts for the first time yet with enough rigor that they'll be well prepared for future study. A broad approach to the subject that incorporates fluids and soils will appeal to instructors who teach engineering and environmental science students as well as future geoscientists. Abundant illustrations reinforce all of the ideas in the text. Many images are presented in color, with additional color images available at waveland.com. Raymond Johnson Problems appear throughout the book, encouraging a deeper understanding for students. Helpful appendices make it easy for instructors to assign further exercises in rock and mineral identification as well as optical mineralogy and petrography.

Montaggioni, 2023-02-24 The health status and future of tropical coral reefs as tourist destinations are regularly subjected to media coverage Many documentaries recognize the natural beauty and biological richness of the Australian Great Barrier Reef and French Polynesian lagoons but point to the equally significant risk that would result from current global warming and human made hazards The future of coral reefs is usually a matter of death foretold real or purely imaginary In this context it has become necessary to differentiate between what is falling within reality of scientific facts or fantasy To this end the present general review in the expert translation of Charlotte Fontan aims at 1 defining the conditions and life requirements of reefbuilding corals 2 the history of corals along with that of a number of associated skeletal organisms involved in reef building since the very beginning i e the last 540 million years including the ups and downs they have experienced 3 giving special reference to the development patterns of recent and modern reefs 4 projecting corals and reefs into a still unknown future Understanding how corals and reefs have originated how they have been able to face the major biological crises which have punctuated the Earth s history how they have survived is a prerequisite to better gain a significant picture of their future Cancer, Radiation Therapy, and the Market Barbara Bridgman Perkins, 2017-08-16 Appraising cancer as a major medical market in the 2010s Wall Street investors placed their bets on single technology treatment facilities costing 100 300 million each Critics inside medicine called the widely publicized proton center boom crazy medicine and unsustainable public policy There was no valid evidence they claimed that proton beams were more effective than less costly alternatives But developers expected insurance to cover their centers staggeringly high costs and debts Was speculation like this new to health care Cancer Radiation Therapy and the Market shows how the radiation therapy specialty in the United States later called radiation oncology coevolved with its device industry throughout the twentieth century Academic engineers and physicians acquired financing to develop increasingly powerful radiation devices initiated companies to manufacture the devices competitively and designed hospital and freestanding procedure units to utilize them In the process they incorporated market strategies into medical organization and practice Although palliative benefits and striking tumor reductions fueled hopes of curing cancer scientific

research all too often found serious patient harm and disappointing beneficial impact on cancer survival This thoroughly documented and provocative inquiry concludes that public health policy needs to re evaluate market driven high tech medicine and build evidence based health care systems
