**Improving Learning Through Assessment Rubrics: Student Awareness of What and How They Learn** Gonsalves, Chahna,Pearson, Jayne,2023-08-14 Assessment by rubrics has emerged as a tool with great potential to guide successful student learning from a competency based approach Rubrics as instruments that make it possible to share the criteria for carrying out learning and assessment tasks with students are excellent roadmaps for student learning largely because they allow students to know what they are expected to do and what they are expected to achieve by carrying out the learning tasks Improving Learning Through Assessment Rubrics Student Awareness of What and How They Learn contributes to the improvement of what is being evaluated by identifying the strengths as well as the weaknesses of the didactic use of rubrics in the assessment of university learning The book also provides a set of theoretical issues methodological elements and practical resources for the assessment of university learning using rubrics Covering topics such as active learning self assessment and teacher identity this reference work is ideal for administrators policymakers researchers scholars academicians practitioners educators and students

Perception, Action, and Cognition Snehlata Jaswal,2016-11-09 Even as simple a task as quenching thirst with a glass of water involves a sequence of perceptions and actions woven together by expectations and experience What are the myriad links between perception and action and what does cognition have to do with them Intuitively we think that perception precedes action but we also know that action moulds perception The reciprocal links between perception and action are now accepted almost universally The discovery of mirror neurons that encode observed actions has further emphasized the coupling of perception and action The real aim of this research topic is to go beyond identifying the evidence for perception action coupling and study the cognitive entities and processes that influence the perception action link For example the internal representations of perceived and produced events are created and modified through experience Yet the perception action link is considered relatively automatic To what extent is the perception action link affected by representations and their manipulations by cognitive processes Does selective attention modify the perception action coupling How and to what extent does the context provide sources of cognitive control The developmental trajectory of the perception action link and the influence of cognition at various stages of development could be another line of important evidence The responses to these and other such questions contribute to our understanding of this research area with significant implications for perception action coupling

**Technology-Enhanced Language Learning for Specialized Domains** Elena Martín-Monje,Izaskun Elorza,Blanca García Riaza,2016-03-10 Technology Enhanced Language Learning for

Specialized Domains provides an exploration of the latest developments in technology enhanced learning and the processing of languages for specific purposes. It combines theoretical and applied research from an interdisciplinary angle covering general issues related to learning languages with computers, assessment, mobile assisted language learning, the new language massive open online courses, corpus based research and computer assisted aspects of translation. The chapters in this collection include contributions from a number of international experts in the field with a wide range of experience in the use of technologies to enhance the language learning process. The essays have been brought together precisely in recognition of the demand for this kind of specialised tuition offering state of the art technological and methodological innovation and practical applications. The topics covered revolve around the practical consequences of the current possibilities of mobility for both learners and teachers as well as the applicability of updated technological advances to language learning and teaching particularly in specialized domains. This is achieved through the description and discussion of practical examples of those applications in a variety of educational contexts. At the beginning of each thematic section readers will find an introductory chapter which contextualises the topic and links the different examples discussed. Drawing together rich primary research and empirical studies related to specialized tuition and the processing of languages, *Technology Enhanced Language Learning for Specialized Domains* will be an invaluable resource for academics, researchers and postgraduate students in the fields of education, computer assisted language learning, languages and linguistics and language teaching.

Transparency in Assessment - Exploring the Influence of Explicit Assessment Criteria Anders Jönsson, Frans Prins, 2019-04-03

In many schools and higher education institutions it has become common practice to share assessment criteria with students. Sometimes it is required for accountability purposes, at other times criteria are used as a means to communicate expectations to students. However, the idea that explicit assessment criteria should be shared with students has been contested. On the one hand, research has shown that explicit criteria may positively affect student performance, reduce their anxiety as well as support students' use of self-regulated learning strategies. On the other hand, there are fears that explicit criteria may have a restraining influence on students' learning as well as limiting their autonomy and creativity. There are also indications of students becoming more performance oriented as opposed to learning oriented when being provided with explicit assessment criteria. Taken together, it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria and under which circumstances it is not. In particular, empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence. In this book we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria. A deeper understanding of the influence of explicit assessment criteria on students' understanding of criteria, motivation and learning is equally imperative for future research and educational practice, both of which need to go beyond individual

opinions and convictions      **Handbook on Water Security** Claudia Pahl-Wostl, Anik Bhaduri, Joyeeta Gupta, 2016-01-29

Water security has received increasing attention in the scientific and public policy communities in recent years. The Handbook on Water Security is a much needed resource that helps the reader navigate between the differing interpretations of water security. It explains the various dimensions of the topic by approaching it both conceptually and thematically as well as in relation to experiences in different regions of the world. The international contributors explore the various perspectives on water security to show that it has multiple meanings that cannot easily be reconciled. Topics discussed include challenges from human security to consumerism, how trade policies can help to achieve water security in a transboundary setting, the potential of risk based governance arrangements and the ecology of water security. Scholars and postgraduate students in the social sciences working on water related issues will find this book to be of substantial interest. It will strongly appeal to policymakers and practitioners looking at the strengths and limitations of water security.

Advanced Practice Nursing Ivy M. Alexander, Versie Johnson-Mallard, Elizabeth Kostas-Polston, Joyce Cappiello, Joyce D. Cappiello, Heather S. Hubbard, 2023-10-30 Holistically addresses women's health encompassing the needs of transgender and nonbinary individuals and considering ethnicity, social class, and disability/ableness. Delivering incisive and comprehensive information on the healthcare needs of women, transgender, and nonbinary persons, the third edition of this distinguished text incorporates a strong focus on the provision of high value, equitable and unbiased care. It expands research and clinical frameworks for understanding women's health to encompass transgender and nonbinary persons and places women's health within a holistic perspective considering ethnicity, social class, and disability/ableness. All chapters are significantly updated with new evidence based research, clinical updates, and guidelines, drug information, Covid related information, racism, and health disparities. This text also covers current and pertinent health topics such as substance use and abuse, mental health, early pregnancy decision making, and LGBTQ care, as well as abundant integrated information on care of transgender and nonbinary individuals and enhanced information on pregnancy and primary care issues that disproportionately affect females. The book is organized for ease of use and is comprised of three distinct but interrelated sections on theoretical frameworks to guide approach and care, health promotion and prevention, and managing health conditions. Rich instructor resources include mapping content to AACN Essentials, case studies, a test bank, and PowerPoint slides. New to the Third Edition: Focuses on providing equitable, unbiased care for all women, including transgender and nonbinary individuals. Updated with new evidence based research, clinical updates, and guidelines, drug information, Covid related information, and racism and

**Computed Tomography of the Coronary Arteries** Mårten Sandstedt, 2020-10-20 Computed tomography CT is an increasingly used modality for investigations of patients with suspected coronary artery disease CAD Technical advances could improve diagnostic accuracy and lead to clinical workflow improvements Also more prognostic information can optimize clinical follow up strategies and treatments The general aim of this thesis was to explore the use of CT for CAD investigations Three studies aimed to examine new technologies including the evaluation of an on site computed tomography based fractional flow reserve CT FFR software study I the evaluation of an AI based calcium scoring computed tomography CSCT software study III and the evaluation of an photon counting detector PCD CT study IV One study aimed to evaluate the long term prognostic value of coronary computed tomography angiography CCTA in symptomatic patients with no history of CAD study II The software evaluation studies study I and III and the prognostic study study II utilized CT data from clinical patients while the PCD CT evaluation study study IV used CT data from cadaveric specimens The performances of both software programs were compared with standard references being represented by fractional flow reserve FFR measurements study I and coronary artery calcification CAC scores from a semi automatic software study III respectively The PCD CT performance on CAC quantification was compared with corresponding results from an energy integrating detector EID CT using micro CT as the standard reference study IV The prognostic study merged registries to identify major adverse cardiac events MACE having a follow up time of up to 7.5 years study II The CT FFR and CSCT software correlation and agreement to corresponding standard references were good and excellent respectively Also both software programs had time saving potential study I and III The CAC quantification was more accurate using PCD CT than EID CT study IV The prognosis was excellent in patients with normal coronary arteries and progressively impaired in non obstructive and obstructive CAD study II The results in this thesis convey developmental technical CT technology advances for CAD investigations In addition prognostic follow up data is communicated The results may benefit patients by an increased accuracy in the CT evaluation of CAD and can contribute to improve clinical follow up strategies Furthermore the results suggest possibilities to improve the workflow in clinical radiology which potentially could impact health care costs

Datortomografi DT r en kliniskt använt modalitet för utredning av misstänkt kranskärlsjukdom För att förbättra framtida diagnostik klinisk effektivitet och uppföljningsstrategier är det av stor vikt med teknisk vidareutveckling och att erhålla relevant prognostisk information Syftet med

denna avhandling var att studera användandet av DT vid misstänkt kranskärlssjukdom. Tre studier syftade till att utvärdera nya tekniker vilket innefattade utvärderingar av två nya mjukvaror samt en utvärdering av funktionen för DT. En studie syftade till att utvärdera det prognostiska värdet av DT kranskärl. Det första delarbetet utvärderade en mjukvara som använde data från DT kranskärl för att beräkna tryckfall över misstänkta kranskärlsstenoser. Tiden för att erhålla tryckfallsmätningarna registrerades också. Resultaten av tryckfallsmätningarna jämfördes med en standardreferens vilken utgjordes av invasiva kateterburna tryckfallsregistreringar. Det andra delarbetet undersökte prognosen för patienter med olika fynd vid DT kranskärl. Genom registersamkörning erhöles data om kranskärlsrelaterad sjukdom med uppföljningstid upp till 7,5 år. Det tredje delarbetet utvärderade en AI-mjukvara som utförde automatiska mätningar av kranskärlskalk baserat på kliniskt utförda DT undersökningar. För detta ändamål användes calcium scoring. Tiden för att erhålla mätningarna registrerades också. Resultaten jämfördes med en standardreferens vilken utgjordes av en konventionell semi-automatisk metod. Det fjärde delarbetet utvärderade förmågan att kvantifiera kranskärlskalk från avlidna med FRDT. Bilder från både FR-DT och DT användes för kvantifiering av kalkvolym och jämfördes med en standardreferens vilken utgjordes av micro-DT. Korrelationen och överensstämmelsen mellan mjukvarorna och standardreferenserna var god för tryckfallberäkningarna över kranskärlsförändringar och mycket god för AI-baserad mätning av kranskärlskalk. Både mjukvarorna hade tidsbesparande potential. För patienter med normala kranskärl var prognosen utmärkt men den försämrades med ökande grad av kranskärlssjukdom. Användande av FR-DT bidrog till en bättre noggrannhet i DT vid kvantifiering av kranskärlskalk. Avhandlingen förmiddlar värdet av teknisk utveckling vid utredning med DT för misstänkt kranskärlssjukdom. Dessutom presenteras nya prognostiska data. Resultaten kan gynna patienten genom skrapad diagnostik och mer effektiva utredningar vilket kan ge framtida ekonomiska effekter. Därtill kan de prognostiska resultaten bidra till förbättrade kliniska uppföljningsstrategier.
